Dolls realistic

MONTREAL (CP) — With dolls that can walk, talk and even eat, realism is the order of the day in the Canadian toy market. Sold with a little kit containing simulated pablum and a bottle, spoon and bowl, the "eating" doll is emptied by a plug in its back. It was introduced this year at the 22nd all-Canadian Toy Fair, the show that last year introduced the "talking" doll.

Another novelty doll, new this year, has a realistically screw-up infant's face and limbs that thrash about for several minutes when a central key is wound tight.

IT'S A WONDERFUL WAY TO FEEL MERRY! There's still nearly ten months to go until Christmas, but I've got that "Merry Christmas" feeling already. You see, yesterday I visited the BANK OF MONTREAL and opened a special Christmas Savings Account to take care of my holiday expenses when that wonderful season rolls around again. I figured out the money I would need. Then divided the amount by the number of pays left. That amount will go into this special account each pay-day until it's time to start my Christmas shopping. Imagine—Christmas shopping without worrying about the cost. I feel so merry I can hardly wait!
