
"For economy's sake I buy a supply and let it age"

—says Mrs. Experience, speaking of the economical use of soap.

"I always keep a good supply of Sunlight Soap on the shelf because I find that Sunlight actually improves with age. It becomes harder and so goes much further.

"With this added economy of lasting longer, I've learned that Sunlight is by far the most economical soap I can buy. The reason is that every particle of Sunlight is pure, cleansing soap—a little of it does a lot of work. Sunlight, you know, is guaranteed to contain no injurious chemicals or harsh filling materials to make the bar large and hard. These filling materials, of course, are just so much waste as far as cleaning goes.

"To any woman who wants to get real cleaning value out of a soap for her money, I decidedly say, 'Use Sunlight,' and keep a good supply on the shelf." Sunlight is made by Lever Brothers Limited, largest soap-makers in the world.

Blake, mechanical superintendent for the Forest Branch, plans on returning to Victoria Sunday night on the Prince Rupert.

Going along a suburban road a man saw an acquaintance busy in a field. "Hello," he sung out: "surveying a little?"

"No," returned the other, "surveying a lot."

## CROP CONDITIONS FAVORABLE SO FAR

**Northern and Central Alberta Outlook is Very Good Says Report**

That wheat seeding is practically completed over the central and northern section of the province at the end of the present week is the information conveyed in the first of the season's series of monthly crop reports compiled on the information secured from its country correspondents says the Edmonton Journal. As a result of a questionnaire sent out to points throughout this area information as to the progress made with spring work in approximately 100 districts is made available.

**Ground in Fine Shape**

These reports indicate, without exception, that conditions at the present time are more favorable than they have been at this season for a number of years, and as far as they can be predicted at this time, prospects are exceptionally bright for the 1925 crop. Moisture in every instance is abundant and the seed bed is in splendid shape. Early sown wheat in a number of districts is well above the ground, and in the case of later seeding, germination is well under way.

Spring preparation of land has been delayed to some extent in a number of localities by the abundance of moisture, but the winds of the last week have in most cases, remedied this condition. Another factor which has retarded seeding in many cases is the fact that a comparatively small percentage of land for the 1925 crop was plowed last fall. This, unfortunately has resulted in a larger than usual acreage being "stubbed in," a situation which will cause little difficulty if the present ample supply of moisture in the ground is supplemented by sufficient rainfall in June.

**Acreage Increased**

That there will be a considerably increased acreage sown in this part of the province this spring is evident, the estimated increase running from five per cent. in some districts to as high as 25 or 30 per cent. in others. This increase, it is pointed out, has been reduced in some instances by the lateness of the spring. Another factor which is considered very promising is the large acreage summerfallowed in 1924. This land is in the best possible shape at the present time and is practically all under wheat.

### DOCKING FISH BOATS

The Canadian halibut schooners Margaret No. 1, Ternan and Wave will be taken on the local dry dock tomorrow for cleaning, painting and minor repairs.

### TRAIN IS LATE

Delayed by floods and fires east of Prince George, the passenger train, due from the East at 3.30 this afternoon, is 4 hours and 50 minutes late so will arrive at 8.20.
