EXPERIENCE IS QUESTION

School Board Discusses Whether Experience In American Schools Should Be Given Credit

There was a rather protracted debate at last night's meeting of the school board on the matter of whether a teacher who had had some of her experience in schools of the United States should be credited with those years in fixing her position in the salary schedule. The case of one of the teachers who had had eight years experience, two in California and the rest in British Columbia, but had been credited by the department with only six years, was under discussion.

Mrs. Spencer, the chairman, was strongly in favor of the teacher in question being given credit for the whole eight years in fixing her salary. Experience was experience no matter where a teacher obtained it, Mrs. Spencer felt.

L. W. Waugh was in favor of enquiring from the department why the teacher had been credited with only six instead of eight years' experience. He suggested that the matter be taken up with the education department.

Mrs. Spencer thought that it was up to the board and not to the department to set the salaries of teachers and decide what increment they were entitled to. No matter what the deparment might state, she would insist that the teacher in question was entitled to the full increment of eight years' experience.

W. R. McAfee thought that two years' experience in United States was as good as two years in Canada.

Earl Barrie could see no harm in obtaining the information suggested by Mr. Waugh.

It was decided to communicate with the department in regard to the matter.

In her report for Booth Memorial School, at last night's board meeting Miss E. A. Mercer, principal, expressed her appreciation to the board for a number of supplementary readers which had been provided.
