FOR SALE—Dining room suite, good condition. 974 Ambrose Ave. Red 752. (238)

DONATE MONEY FOR RESEARCH

A sum of $6,126, representing the unexpended funds of the British Columbia Salt Fish Board have been donated to the British Columbia Research Council for research in fisheries, it is announced jointly by Leslie H. Eyres, chairman of the council and newly appointed commissioner of fisheries, and Hugh Dalton, ex-chairman of the Salt Fish Board.

Under conditions of the donation, funds will be used for investigation of markets and market extension work in connection with dried salt herring or such other fisheries research as may be recommended by the council's technical advisory committee on fisheries.

RESEARCH CO-OPERATION

Commenting on the donation, Mr. Eyres stated that this was another example of how industrial groups in the province were co-operating with the British Columbia Research Council in order to implement a research program for the benefit of particular industries.

Under the direction of Dr. S. E. Maddigan, director of the council, plans for suitable research projects are already being prepared for the attention of the fisheries advisory committee. It is planned that research will commence immediately approval has been given by the committee, and all results of the work carried out will be made available to the fishing industry.

OF GREAT BENEFIT

Mr. Dalton stated this was the most practical application to which the unexpended funds could be put and felt sure that results from the council's research would be of great benefit to the fishing industry.

Chairman of the council's fisheries advisory committee is G. Alexander, assistant commissioner of fisheries.

FRIENDS HONOR ENGLISH BRIDE

Prince Rupert's latest war bride was welcomed by friends and members of her husband's family Monday night at a shower given in honor of Mrs. Jack Micholuk, who recently arrived in the city from England to join her husband.

The shower was held at their home on Taylor Street and was highlighted by the presentation of a number of gifts by seven-year-old Jacqueline Micholuk, who wheeled them in in a decorated baby buggy.

The evening was spent in community singing and in playing games, after which refreshments were served.

Those present were Mr. and Mrs. B. Mintenko, Mrs. M. Mintenko, Fred Micholuk, Mr. and Mrs. Louis Astoria, Mrs. Stella Kurulok, Miss E. Mintenko, Neil Mintenko, Leo Micholuk, Mickey Micholuk, Mike Corney, Mr. and Mrs. G. S. Kurulok, Miss Jacqueline Micholuk. Miss Mary Micholuk, William Pilfold and Steve Mintenko.

OLDEST CITY

Susa, near the Persian Gulf, is considered to have the longest continuous existence of any city in history—from 400 B.C. to 650 A.D.

TINY STEEL BALLS, 7,000 TO OUNCE, WORTH FOUR TIMES THAT OF GOLD

PHILADELPHIA — High-precision steel balls half the size of a pinhead and four times more valuable than gold are being produced now for industry, it was announced by Richard H. Demott, vice-president of SKF Industries, Inc. He said the minute balls, 1-millimeter in diameter, were designed especially for new-type fountain pens, but that they also will be available for delicate instrument bearings and other applications.

Untouched by human hands during manufacture, and inspected, gauged and packaged under rigidly controlled temperature conditions, the balls are so tiny that 7,000 weigh only a ounce. Priced to sell at about two cents apiece, an ounce would be worth approximately $140 in contrast to $35 for gold of the same weight.

Made to extremely fine tolerances, the 1-millimeter balls average within 5/1,000,000th of an inch of being perfectly round and have a diameter variation of 50/1,000,000th of an inch or less.

A special process imparts a satin-like finish to the balls so as to give inks and lubricants greater surface cohesion, Mr. DeMott said. This finish, he added, consists of minute scratches on the balls which are invisible unless highly magnified.

The balls are made from high carbon and chromium wire 45/1,000th of an inch thick which is fed into machines that cold-press ball blanks at the rate of 18,000 an hour. Grinding operations before and after heat-treating and tempering "peel" from 4/1,000th to 8/1,000th of an inch at a time from the balls until they are reduced to the final size of 39/1,000th of an inch. Nine distinct operations and about 190 machine hours are required to process a batch of half a million balls.

Inspection for surface deformities is accomplished with the use of binoculars and an automatic machine developed by the company, which rotates the balls in the field of magnification. A needle-sized magnet is used to remove defective balls from the machine.

54,000,000 Bushels Of Wheat For Sask.

REGINA—Wheat production in Saskatchewan is expected to total 216 million bushels this fall, an increase of 54 million bushels over 1945. Oat production is estimated at 126 million bushels, down 17 millions from last year; barley, 49 millions, down five millions; rye, 3,688,000, up 1,068,000; flax, 4,050,000, up 250,000.

Cutting of wheat and coarse grains up to the week ended Sept. 21 was nearing completion in southeastern, Regina-Weyburn and east-central districts and only 15 per cent to 20 per cent remained to be cut in other districts. Taking the province as a whole, 87 per cent of the wheat and coarse grains and 26 per cent of the flax acreages have been cut.

Wheat yields are turning out fairly well in the eastern half of the province, on the heavy land in the west-central districts and in the extreme northwest areas; elsewhere the outturns are only fair to poor. About 15 per cent of the threshed grain is grading No. 1 Northern and 61 per cent Nos. 2 and 3.

HEALTH-MINDED GREEKS

In ancient Greece, health was considered one of the highest goods, and disease a great evil that made man inferior.

KEEP LABOR FREE OF POLITICS TO MAINTAIN PEACE

WINNIPEG (AP)—Political interest must be separated from labor-management disputes if industrial peace is to be permanently restored, H. Grenville Smith of Montreal told the annual meeting of the Canadian Chamber of Commerce today.

He charged labor groups with publicizing the "misrepresentation" that all who oppose union proposals are necessarily anti-labor.

HITS TAX POLICIES

At the opening session Tuesday, the chamber heard sharp criticism of federal tax policies by C. Gordon Brodie, Vancouver, who declared Finance Minister J. L. Ilsley's budget last June was "so discouraging there was no incentive whatsoever for private enterprise to proceed with expansion."

Today Smith warned against permitting unions to usurp too much authority, contending the right of the employee to determine whether or not he wished to affiliate himself with any la-

The chamber adopted a resolution recording its "unswerving support of private competitive enterprise and opposition to anything which would weaken and destroy the rights of freedom of individual citizens."

"PSEUDO PROSPERITY"

In his presidential address, C. Gordon Cockshutt of Brantford said Canada must increase production in order to stem the trend toward "pseudo prosperity" of the post-war period.

Criticizing what he termed "sporific policies" of socialists, he said "our wealth must be created through dynamic enterprise and of free working in a free environment."

"I fought off a pack of hungry shoppers to bag this package of crisp, crunchy, delicious Grape-Nuts Flakes!"

"Bravo, Sir Archibald! And I'd believe you if you said you fought through a jungle full of lions for that malty-rich, sweet-as-a-nut flavor of Post's Grape-Nuts Flakes!"

"And of course, Gentlemen, we must remember that Grape-Nuts Flakes are not only marvellously delicious—they supply carbohydrates for energy; proteins for muscle; phosphorus for teeth and bones; iron for the blood; and other food essentials."

"Those two golden grains wheat and malted barley are combined in Grape-Nuts Flakes. They're specially blended, baked and toasted for flavor, crispness, easy digestion."

"Let us repair to the breakfast room and shoot a giant economy package."
