SEES DOOM OF GAME BIRDS ON THE CONTINENT

Ducks and Geese Cannot Last Long Says Famous Authority on Birds

HORNADAY'S APPEAL

NEW YORK, Feb. 9.—The migratory game birds of North America are threatened with practical extinction, in the opinion of Dr. W. T. Hornaday, noted naturalist and defender of wild birds and animals. Ducks and geese may come to the vanishing point in ten years if the present rate of slaughter continues. "The doom of our non-migratory birds as well is sounded unless bag limits are immediately reduced," Dr. Hornaday declares.

"An army of 6,000,000 hunters equipped with the most modern devices of slaughter has reduced to a certainty the practical extermination of the game girds if the present unparalleled rate of destruction continues" the speaker said. "There has never before been anything equalling the present pursuit of bird life in American history. Not even the destruction of the buffalo was more persistent or widespread.

Danger of Auto

"It is generally admitted that the automobile has doubled the perils of the game, because it has placed every stretch of water where ducks may be reported, and every hunting ground within the reach of hunters living within a radius of 200 miles or more.

"Under the ruling of the Department of Agriculture the bag limit that may be shot by a single hunter in one day is 25 ducks of all kinds, except the wood duck and eider duck, and eight geese and eight brandt. The season lasts for three months or more. These limits are most wasteful. No man or ordinary sized family can eat 25 ducks in one day, nor more than one-fifth of that number, and since their sale is forbidden in most states, indications are that a large percentage of a full bag must be given away or become a loss by decay.

"The awful limit of 25 ducks a day now prevails in 29 states, fatally including all the states where the ducks find winter feed and where they congregate in greatest numbers in winter. Although no hunter gets his limit every day, and in many states where ducks were once plentiful he will now be fortunate if he kills one duck, yet in those diminishing areas where ducks seek winter protection and food, he often gets the limit by the time most of us are breakfasting.

Thing of Past

"Without further legal restrictions, in ten years our migratory game birds will have become so shot to pieces and weakened as to be reduced to the vanishing point. Unless steps are taken further to protect the birds against the millions of hunters arrayed against them for three months of the year the slaughter will automatically make duck shooting a thing of the past, and many species may pass permanently from our list of game birds. I appeal not only to the sportsmen but to all bird lovers, to the women of the country, to all others who are interested in preserving our wild life for future generations, to act now, before it is too late."

PLANNING OPERATE DRUM LUMMON MINE

New Syndicate has been Organized from Shareholders of Former Defunct Company

A syndicate organized from the shareholders of the former company has secured an option on the Drum Lummon mine, which is now in the hands of an assignee, with a view to protecting those who are interested in it. Arrangements have been practically made to meet the first payment and funds are being secured to drive a low level tunnel as nearly as possible at sea level to avoid the necessity of the more expensive plan of sinking a shaft.

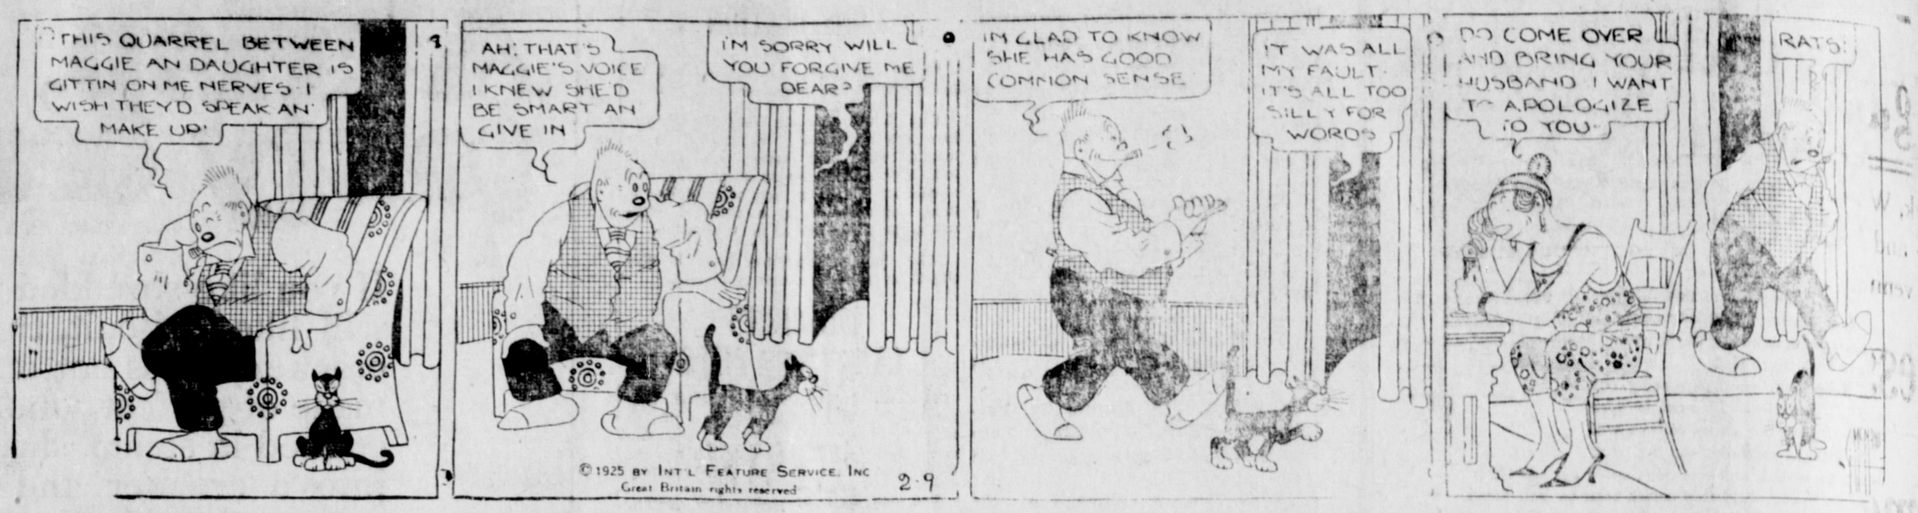
BRINGING UP FATHER

By George McManus



PRINCE RUPERT BIG PRODUCER

This District Led Province in Tie Cutting Last Year; Came Second in Saw Log Scale

According to figures that have been issued by the Forest Branch at Victoria, Prince Rupert district led the province in tie production last year with 1,116,832 pieces. Prince George was next with 966,782 pieces and was followed by Cranbrook 952,983 pieces, and Nelson, Vancouver and Vernon.

Vancouver forest district led in saw log production, the cut being 1,709,248,000 feet. Prince Rupert, with 171,593,000 feet came second, followed by Cranbrook, Prince George, Nelson, Vernon and Kamloops.

In pole production, Vancouver led with 9,787,000 lineal feet; Nelson, 5,455,000 lineal feet; Kamloops, 2,648,000 lineal feet; Prince Rupert, 2,225,000 lineal feet.

The total log production in British Columbia for the year was 2,549,700,181 feet which was 28,000,000 feet greater than the year previous.

PRINCE GEORGE

J. H. Johnson has been elected president of the Prince George Agricultural and Industrial Association. Fred D. Taylor is secretary and M. E. Harper treasurer.

Ole Ellingsen, Norwegian, committed suicide last week by strangling himself in a local hotel. He has been here about a year, having come from Norway.

Mrs. Arthur Leith and daughter, who have been visiting in Winnipeg for the past three months, have returned to the city.

The Prince George Property Owners' Association has recommended that the salary of Mayor Aylward be increased from $400 to $600 per year.

Chief Shelton has cleaned up the town of vagrants and pimps and is now giving his attention to the enforcement of the Government Liquor Act. He has secured a number of convictions for bootlegging and is going after the local hotelmen whom he considers remiss in their observance of the liquor act.

This Lassie Has Her Colds "Rubbed Away"

The mother of this attractive little girl, Mrs. E. E. Emmans, of 215 Seventh Ave., N. E., Portage La Prairie, Man., is one of the many Canadian mothers who are enthusiastic about the vaporizing salve, Vicks VapoRub, for treating children's colds. Mrs. Emmans writes: "My little girl had croup at night pretty badly and Vicks did her a lot of good. I have also used it with very satisfactory results for head and chest colds."

Vicks is just "rubbed on" for sore throat, tonsilitis, bronchitis, croup or deep chest colds. When so applied, Vicks has a double direct action: *internally* medicated vapors are inhaled while, at the same time, *externally*, it is absorbed through and stimulates the skin.

A GOOD WAY TO INCREASE BUSINESS

Many advertising messages fail to attract attention because they are either unattractive or are too stereotyped.

This is the opinion of one of our busiest and most successful business firms—Albert & McCaffery, Ltd. They have succeeded in interesting many new customers in the story of the famous Nanaimo - Wellington coal and since the coal itself lives up to its reputation these customers are coming back daily for more. Nanaimo- Wellington coal is the premier fuel for the fireplace, range and furnace. More heat—less ash—no rock or clinkers.

You should try Nanaimo-Wellington as soon as your present supply gets low. Better still, if you order some now you can test it out with the coal you are now using. Nanaimo - Wellington stands supreme when a comparative test is made.

To secure a supply phone Albert & McCaffery Ltd., who are sole agents here. Their phone numbers are 116 and 564. tf

BATTALION ORDERS

BIG GRANT FOR PUBLIC HEALTH

Social Hygiene Council Supported in Combating National Menace

(By Canadian Press)

TORONTO, Feb. 7.—Impressed by the character and effectiveness of the public health work being done in Canada by the Canadian Social Hygiene Council and the very definite effect this work is likely to have in lengthening the span of human life, one of the big insurance companies of New York, which makes a specialty of encouraging scientific effort of this kind on this continent, has offered to the council a grant of $25,000 for the year 1925.

It is understood that this offer has come through the very favorable report made by the officials at the Canadian headquarters of this company in Ottawa, regarding the activities and program of the Social Hygiene Council in its combat with the national menace of venereal diseases.

Two Weaknesses

In speaking of the uses to which this money is likely to be put Dr. Gordon Bates, General Secretary of the Council, said: "Though we have 50 branches of our council throughout Canada, and a national program of social hygiene, there have been two definitely weak spots in our movement, and these we now hope to remedy. One has been the need of organizers in both eastern and western Canada. These we hope to appoint at once and so to get a much firmer hold on points distant from headquarters, which need not only inspiration as to programs of activity but assistance in carrying them out.

"The second weakness has been in our failure to work out a national scheme for the adequate scientific education of adolescents and children in the meaning of social hygiene, so that from the earliest years onward, there may come to them through proper channels a gradual but accurate knowledge regarding certain biological facts, the maintenance of clean standards of conduct, and the responsibility of every individual for the building up of those fine and healthful social conditions which are the aim of every scientific hygienist.

Adults and Parents

"In our work so far we have aimed at these objectives by educative work for adults and parents. But we feel that there should be a more aggressive and definite plan to ensure child education along all these lines.

TO REDUCE ARMY

TOKIO, Feb. 9—Four divisions comprising 40,000 men of the Japanese army will be dismissed by May 1, in accordance with the general retrenchment plan of the government. The divisions abolished have been selected largely with a view to the economic results in the regions where they are stationed.
