SUNRISE SERVICE AT VICTORIA ARRANGED

Illuminated Cross There Each Evening this Week: Amplifiers Arranged to Carry Easter Message

VICTORIA, April 1.— During this week an illuminated cross has been displayed on Mount Tolmie each evening to announce to the people of Victoria and the neighborhood that the annual Easter sunrise service will be conducted there. Should the weather be fine it is expected that at least ten thousand people will take part. Special Street cars and buses are arranging to run there and people who have automobiles will carry their friends.

This is the fourth occasion of the kind arranged by Dr. Clem Davies of the City Temple. Special amplifiers will be installed so that everyone on the hill will hear the Easter mesage. The service commences at 7 a.m.

J. E. Milne, assistant district engineer for the provincial department of public works, returned from Queen Charlotte City on the Prince John this morning.

IN DEFENSE OF THE CROW

Victoria Naturalist Objects to Efforts to Kill off Birds This Time of Year

VICTORIA, April 1. — "The essence of cruelty," was the way in which the Provincial Game Conservation Board's plan for the wholesale slaughter of crows in the next two months, was stigmatized yesterday by Walter Burton, distinguished naturalist.

Announcement that the Government had declared a 10-cent bounty on crows during the period from April 1 to May 31, and that the Game Board intended to push the campaign for the extermination of the crows in British Columbia to the limit of its powers, has aroused lovers of birds throughout the Province to a high pitch of indignation.

It would be a very cruel thing to make war on crows during the nesting period, Mr. Burton said. It would mean that hunters would wait beneath the nests and shoot the birds as they returned with food for their young. The young crows would then be left to starve.

Importation Prohibited

That was the way in which the egret was hunted for its beautiful plumage, the well-know ornithologist went on. The plumage was at its most brilliant best during the nesting season, but slaughter of the birds entailed the starving of their young. Because of the cruelty involved, the United States Government had prohibited the importation of the much-prized feathers.

"Half the crows in British Columbia have never tasted a game bird's egg," said Mr. Burton, "and they never touch a song-bird. The white man, not the crow, is killing off the game birds.

"Crows do a certain amount of harm, it is true, but they also do a great deal of good. The trouble is that the authorities forget the good the birds do and only remember the harm.

Crow is Good Scavenger

"What would our beaches be like if it wasn't for the crows"? Mr. Burton asked, pointing out that the crow is the most industrious scavenger. "Why, they would be in a filthy condition. In addition to offal and various kinds of refuse, the crow feeds on worms and insect pests," Mr. Burton indicated.

"I'm dead against the proposal," he said. "It is the essence of cruelty. I wouldn't mind so much if the campaign were not to be carried out during the nesting season, for the crow is a wise bird and well knows how to take care of himself. But the parents will carry food to their young, whatever the danger, and that means that they will be easily hunted and their young will be left to starve to death."

FOURTEEN YEAR OLD GIRL KEPT LIGHT BURNING THREE NIGHTS

Keeper of St. Helen's Marooned Ashore But Brave Daughter Without Food Carries on

LONDON, April 1.—The light in St. Helen's lighthouse, near Cambridge, on the Isle ofWhite, was kept flashing for three nights by the 14-year-old dauzhter of the lighthouse keeper, Langtan. The girl was marooned there Saturday afternoon without food, except one loaf of bread and a small piece of cake, but nevertheless she carried out her father's duties valiantly.

Langtan and his wife on Saturday rowed ashore in a rough sea to fetch food and oil to the lighthouse, says the Daily Mail. While they were ashore the sea rose in its fury and, notwithstanding several attempts made in a lifeboat and a motorboat, the father and mother were unable to return to the beacon.

Aside from anxiety for his daughter, left alone in the lighthouse with scarcely any food, Langtan worried as to whether she would realize the necessity to light the lamp, which is one of the important ones along the coast. Great was his relief when punctually the light beamed and remained flashing throughout the night.

The gale raged all day Sunday, making vain the attempts of the lifeboatmen and fishermen to take the keeper back. Again night fell and again the light shone at the appointed hour. As time passed the anxiety of the parents deepened; they pictured the girl as hungry, and perhaps frightened and going without sleep.

They and the girl, however, were domed to keep the ordeal, for Monday the gale was worse than ever, the passage across the three miles of raging seas was impossible.

The third night came, and again the light gleamed forth at the proper hour, as if the lighthouse keeper himself had been there at his task. Not until 5 o'clock Tuesday afternoon did the seas abate sufficiently to enable the parents to return. They reached the lighthouse in a motorboat. This was so badly buffeted by the waves that the crew did not venture to return to the mainland.

As the flash worked regularly while Mr. and Mrs. Langtan were ashore, it was evident that the girl kept awake at night and wound every four hours the clockwork apparatus which turned the light.

BIOLOGICAL SURVEY OF U.S. BUILDING BOAT

SEATTLE, April 1. — The patrol boat Seal of the Biological Survey which was launched here last week will cost $35,000, is sixty-nine feet long with an internal combustion engine.

It will be used in Alaska. A speed of ten knots and a cruising radius of 4,000 miles is provided. The boat will accommodate ten men. Captain K. C. Talmadge has been promised command.

Don't let them gyp you

Orange-CRUSH does not have to be labelled "Imitation" on either bottles or crowns, because *it is a true fruit drink.* All the flavor comes from the orange. But—

The country is flooded with cheap imitations—yet you don't need to be cheated. Only inexperienced or unprincipled dealers will substitute. Most dealers will hand you Orange-CRUSH when you ask for it. Give *them* your patronage. *Orange-CRUSH costs more than they pay for inferior imitations,* but in the end they make more, because Orange-CRUSH is the most popular drink in the world today. Why should you accept a substitute made from—goodness only knows what? When you ask for Orange-CRUSH *don't let them gyp you.*

47 Countries Drink It

NO wonder Orange-CRUSH is the world's most popular drink. To healthful carbonated water is added the juice of luscious oranges—the delicate flavor of their peel—the zestful tang of the fruit acid found in oranges, lemons and limes—a pure food color, such as you use in your cakes and candies—pure cane sugar. You get all the flavor as well as the aroma of the actual fruit.

When driving or walking—anywhere you go—look for the Orange-CRUSH signs. The dealer who displays them sells a Quality beverage. Step inside—call for Orange-CRUSH—look for the name Orange-CRUSH blown right into the Krinkly Bottle—then drink its cool deliciousness.

Orange-CRUSH is good for your children because *it has real food value.* A 6-oz. Krinkly Bottle of Orange-CRUSH has food value, measured in calories, equal to 1½ times that found in a medium-sized, fresh, ripe orange.

Either at meals—as a refreshing treat when thirsty—when guests drop in for a visit—serve Orange-CRUSH. Order a case today from your nearest dealer.

Orange-CRUSH
Lemon-CRUSH **Lime-CRUSH**
