**Was Tortured With Eczema For Years**

Mrs. George Shambler, 119 Creighton St., Halifax, N.S., writes:—"After being tortured with eczema, for years, and trying everything possible from doctors and drug stores, a friend recommended me to take

BURDOCK BLOOD BITTERS

I sent my husband to get me a bottle, and after I had taken it I noticed the cooling of my blood, so he advised me to continue, and after taking several bottles I can truly say it is a wonderful medicine."

## SUCCESSFUL BANQUET BY MOOSEHEART LADIES

**Enjoyable Afair Last Night in Boston Cabaret With 36 in Attendance**

Thirty-six members of the Women's Mooseheart Legion, Chapter No. 211, sat down to a successful and enjoyable banquet last evening in the Boston Cabaret. A sumptuous chicken supper was spread and Mrs. Charles M. Nickerson, senior regent, presided. The toast to the senior regent was proposed by Mrs. Simon A. Swanson and Mrs. Nickerson replied suitably. The program also included a recitation by Mrs. Robert McCarthy.

After the supper cards were played and the prize winners were: First, Mrs. D. C. Schubert; second, Mrs. P. J. Ryan; third, Mrs. Ed. Unger.

The event was under the convenership of Mrs. Simon A. Swanson and those assisting were Mrs. C. M. Nickerson, Mrs. P. J. Ryan, Mrs. A. G. Bartlett, Mrs. Richard Long and Mrs. James Weir.

## NEW OFFICERS FOR BOARD OF TRADE CHOSEN

**Milton Gonzales is President with George P. Tinker Vice-Presient This Year**

**MANY MATTERS DISCUSSED**

**Proposal Made to Establish Radiophone at Digby Island to Benefit Canneries and Others**

The annual meeting of the Prince Rupert Board of Trade last night elected Milton Gonzales president, G. P. Tinker, vice-presient, and A. Brooksbank secretary-treasurer, and a strong council consisting of Olof Hanson, C. H. Orme, W. O. Fulton, W. H. Tobey, John Dybhavn, F. G. Dawson, B. J. Mellish, P. M. Ray, J. H. Thomson, J. D. Fraser, C. V. Evitt, George McAfee, George Munro and D. G. Stewart. Reports on the work of the year were received from President J. W. Nicholls and Secretary Brooksbank, the latter of whom drew special attention to the fact that it was twenty years ago since the organization was formed and he read a list of the charter members and also a list of all the presidents since then.

The application for membership of M. A. Burbank was accepted and he was elected.

Letters from W. A. Found and Dr. J. H. King were read in regard to American boats fishing in Canadian waters and using Canadian harbors. The board was assured that Canadian interests would be protected.

A letter from the city council was read enclosing a check for $40.

A telegram was received from Paul Armour who is in Vancouver advising that a committee be formed to take up the matter of the establishment of a radiophone at Digby Island to enable canneries and cannery tenders, tugboats and other coasting vessels to communicate with that station more easily than at present.

The question of the meeting of the Canadian Chamber of Commerce next September was mentioned. The meeting will be held at Edmonton and Calgary and will be followed by a tour through the Peace River country. At this meeting there will be 60 delegates from the Old Country and Vancouver expects to be fully represented. It was urged that a strong delegation should go from Prince Rupert.

A resolution was received from the Terrace Board of Trade asking the local board to back the proposal to build a road to the head of Kitimat Arm from Lakelse. This was referred to a committee.

J. C. Brady brought up the dangers to halibut boats toward the end of the season pointing out that there had been loss of life at such times. He urged the establishment of a patrol system.

George Nickerson agreed that the suggestion had merit, but he thought the establishment of a life saving station on the west coast of Queen Charlotte Islands would be more important. The matter was referred to the fisheries committee for report.

In his annual report Colonel Nicholls thanked the retiring officers who had helped him substantially in the work and especially the new president, Milton Gonzales, who had officiated during his absence. The new president then took the chair and thanked the board for the honor they had done him.

## FIRST DRAFT OF POWER AGREEMENT IS PRACTICALLY COMPLETED SO FAR AS THE COUNCIL IS CONCERNED

(Continued from page one)

ment subject to the approval of the council, the Power Corporation to retain its responsibility in connection with any new company that might be formed. This amendment was acceptable to Mr. Patmore.

Clause 2, providing for transfer to the company from the city of title to all the assets of the light and power department, including dam, penstock, power house, lands and water rights, machinery, transmission lines, equipment, etc., with the reservation that supply of water to the city mains be always protected and that the company be responsible for the keeping of the dam in a fit state of repair at all times gave rise to discussion as to how the safety level for the city water supply and repair of the dam were to be determined. The suggestion was made that the city should retain ownership of the dam but, after lengthy discussion on the point, it was decided that the city should reserve the right to say when the company should stop taking water from Woodworth Lake for power purposes and also when repairs to the dam were necessary. The agreement contains a clause providing that the dam should revert to the city in the event of the Woodworth Lake power site being abandoned by the company.

**Maintain Plant**

Clause 3 providing that the company shall maintain the Woodworth Lake power plant intact in case of any other power development being undertaken was accepted without discussion. It was stated by the city solicitor during the reading of this clause that, throughout the agreement, reference to Falls River development was being deleted as the company might eventually decide to develop power other than at Falls River.

There was considerable discussion on the clause providing for the payment by the company to the city of $375,000 subject to $150,000 being placed in a trust fund until such time as debentures against the plant had been paid up and the city could deliver a free title, the city to receive the interest from this fund. This was to protect the company against obligations still owed by the city, Mr. Patmore explained, in the shape of bonded indebtedness. It was just like an ordinary purchase of property with a mortgage standing against it. Amendment was made providing for the turning over to the city of this trust fund as soon as all obligations were paid which will be in twenty years or less.

Clause 5 grants the company the sole and exclusive right for a period of 25 years to operate the system within the limits of the city for the sale of electric light and power, entering all thoroughfares and public places necessary for transmission and distribution. Clause 7 provides that all such reconstruction work shall be subject to the approval of the city and Clause 8 provides that the company shall complete such work on the streets as speedily as possible and restore the streets to their original condition or be liable to pay the city for such work.

Clause 6 provides that the city shall have the right at the end of 25 years to buy all property of the company within the corporate limits of the city or in connection with Woodworth Lake or to renew the contract with the company for another 25 years.

**Taking Over Service**

Clause 9 provides that the company shall take possession of the generating plant as soon as the purchase price in full is paid, the city to collect light and power accounts up to such date and the company thereafter.

Clause 10, upon which there was discussion of a few minor details, provides that the company shall proceed at once with power development other than that at Woodward Lake and within two years, with six months' grace, shall complete the development of not less than 5,000 horsepower and then up to or over 100,000 horsepower if required by private or commercial uses of the citizens or industries.

Clause 11 provides that on and after the date of the agreement the company shall supply energy demanded by the city and the citizens and shall maintain a reasonable surplus for new demands.

Clause 12 was deleted, having been duplicated by another clause.

In Clause 13, the right is reserved by the city to make reasonable use of the company's light poles for such purposes of telephone wires and fire alarm boxes, providing such use does not interfere with the company's operations. Payment for such use by the city of company poles shall be under the Bell Telephone agreement.

Clause 14 provides that the company shall assume all obligations of the city in connection with agreements between the city and such power customers as the Elevator, dry dock and Cold Storage plant.

In Clause 15 the city agrees to take all its electric requirements in the way of light, heat and power from the company, allowing no other company to use the public places for such distribution.

Clause 16 sets the rates for street lighting at a flat rate of $15 per year per 100 watts, the company to supply lamps to the city at cost. This clause also includes provision that the company, on demand of the city, shall instal at its own (the company's) expense a fully modern system of ornamental street lighting on the city streets, the style of such to be determined by the city. Other regulations in the matter of street lighting are also set. Objection was taken to the right being given the company to increase the charge for street lighting in case of increased taxation or other charges and this was struck out. Street lighting rates shall be effective upon execution of the agreement.

**Rates to Consumers**

Another clause provides that the maximum rates to consumers for light and power shall be set by the present city schedule though the company may sell at lower rates if warranted, providing that there shall be no discrimination in this connecton. The company shall not sell power at lower schedules outside the city than in the city.

Provision is also made that the agreement shall come under the Public Utilities Comimssion of the province should such board be established. It was pointed out that this would be more to the benefit of the city than the company.

Nothing in the agreement releases the company from liability for damages through its ommissions and the city is indemnifed against such damages.

The company shall not be exempt from municipal taxation though the city is bound not to impose discriminatory taxes.

The clause providing that the company may increase rates as a result of taxation imposed by the provincial government or as a result of licenses or royalties was one which the company would not consider waiving, Mr. Patmore said. The council took the view that the plebiscite had settled the people's acceptance of this clause.

In the event of default by the company for more than 24 hours not caused by Act of God etc., City Solicitor E. F. Jones has prepared a clause whereby the city may take possession of the plant and operate it for the benefit of the citizens until such time as the company shall resume operations under the agreement. It is provided in addition that the company shall transfer the plant back to the city on payment of its valuation subject to daily damages for such default. The sum of $1,000 was mentioned as a possible daily amount of damage in case the company fail to supply power and light. Further inforamtion is to be obtained before the amount is definitely set. On the whole default clause, the city solicitor is to obtain an outside opinion.

Clause 25, dealing with the scale of wages to be paid by the company, was amended at the suggestion of Ald. Brown, to provide that the company shall pay the prevailing scale for skilled labor and the civic scale for unskilled labor, this to apply to the Woodworth Lake development as well as all company work within the corporate limits of the city. Doubt was expressed as to the power of the city to govern wages paid outside the city. Mr. Patmore gave assurance that it was the policy of the company to pay the established local rates of wages.

**Matter of Industries**

At the suggestion of Ald. Collart, a clause will be incorporated in the agreement providing, as promised by the company in its tender, that its industrial bureau shall be placed at the disposal of the city council and the Board of Trade for the encouragement of local industries.

It was pointed out that the agreement was still in the draft stage and would be subject to such further amendments and revisions as may be deemed necessary or advisable. It has already been decided that Mr. Jones must get an opinion on the whole by law from outside counsel and competent engineer.

After the agreement is finally rafted, Ald. Rudderham suggested that public meetings should be called to explain it to the people. Ald. Prudhomme and Mayor McMordie were in accordance with this suggestion.

# Church Services

**CHRISTIAN SCIENCE**

Christian Science Society, 245 Second Avenue

This Society is a branch of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

Sunday Service at 11 a.m., subject, "God."

Service will be conducted by Bishop Rix at St. Peter's Church, Seal Cove, Sunday, January, 6, at 11 o'clock. Sunday School at 10:30.

**EUROPE TO CANADA IN THREE DAYS**

The amazing British airship, R-100, is at present undergoing tests at Howden, England, preparatory to flying to Canada in the spring. This giant dirigible is 709 feet long, 130 feet high, and will easily carry 135 passengers, inclusive of crew. Six Rolls Royce egnines will drive her through the air at a cruising speed of 75 miles an hour, and she is expected to complete the ocean flight in less than three days. The above picture shows members of the Mother Parliament having tea aboard the R-100 at her formal unveiling to the public. Inset is Lieutenant George Norville, who will navigate the giant air liner on her maiden voyage.
