Soap that *soaks* clothes clean

different from anything you have ever used before

Rinso is an entirely new kind of soap, every granule made of pure materials perfectly combined.

Just by *soaking*, in its big lasting suds, the most ground-in dirt is gently loosened and dissolved. Only the very dirtiest places need to be rubbed at all.

NOTE: In *hard* water it takes from ½ to 1 package of Rinso to a tub to make good suds. In *very hard* water you will need from 1½ to 2 packages to a tub to get the big lasting suds that loosen all the dirt.
