Radio Broadcasting

CHANGES ARE PROPOSED FOR RADIO CONTROL

Victoria Radio Club Making Recommendations to the Commission on April 15

The local radio association has received a letter from the Victoria Radio Club enclosing a copy of their constitution and also a copy of the suggestion that club is making to the radio commission which sits there April 15. In the summary of the presentation, it is noted that radio broadcasting in western Canada is unsatisfactory in that, owing to the lack of quality in Canadian stations, people are forced to listen to United States programs. It suggests that conditions could be bettered by having Canadian stations owned or subsidized by the Dominion government.

It suggests that as the United States has monopolized the wave channels, leaving only six clear and six shared wave lengths for Canada, the only solution is to have a chain of six super-power Canadian stations with a minimum power of 50,000 watts operating on the six clear wave lengths. It also suggests the taking over of the Canadian National stations since they are at present holding the clear channels. The shared channels should be distributed among present broadcasters, the stations to have power not exceeding 100 watts and to operate during the day only, or else when the key stations are not in use.

Each section of the country should be properly represented on the national programs.

Financing of the stations should be largely by means of licenses, which should be increased to $2.50 with $1 only for crystal sets. A minimum fine of $25 should be levied on anyone one month or more in arrears in paying the license fee.

The use of oscillating sets on the broadcast should be prohibited and any such set be confiscated when found and the license of the owner cancelled.

An adequate system of inspection to be put in force for tracing interference, the inspectors to be given much more power than at present.

The final recommendation is that the manufacture, importation or sale of vibrating charges be prohibited, all electrical apparatus to be fitted with proper filter circuits for eliminating interference.

INTERVIEWED HEAD OF RADIO DEPARTMENT

Word has been received from the president of the Prince Rupert Radio Association, who is now in the south, that he has interviewed E. J. Haughton, superintendent of radio for the province at Victoria, and will report to the association later. He is expected home probably on Wednesday.

10:00—Puget Sound Power & Light Co.'s "Big Show."
12:00—News flashes.
12:15—Piano and tenor solos.

MORE PIANOS THAN EVER ARE MADE IN GREAT BRITAIN TODAY

LONDON, April 9:—Despite the popularity of the gramaphone and the radio, the number of pianos manufactured in Great Britain last year was the largest recorded since 1913. The Federation of British Music Industries in its annual survey says this revival would seem to prove that gramaphone and wireless music has stimulated public interest in music generally, with the result that there is an increased interest in the piano.

RAILWAY EXTENSION

PORT ANGELES, April 9:—The Port Angeles western railway will be extended another nine miles immediately in order to handle the logs from a huge tract of timber, some of which is spruce.

Sister (to brother who has tried to shoot an apple off his sleeping father's head): "There!—I told you you'd want a lot more practice before you were as good as William Tell."
—The Passing Show, London.

AMERICANS FOR ALBERTA LANDS

Advertising Is Bringing Results in Setlement of That Province

EDMONTON, April 9.—Stating that a large contingent of settlers will arrive from the state of Nebraska to take up land in northern Alberta, W. L. Stimsman of Max, Nebraska, accompanied by Mrs. Stimsman and three children, reached Edmonton on their way to High Prairie, where they will settle on the land.

The party arrived in a motor truck loaded with household equipment, and also sent forward two freight car loads of goods by rail.

The car and effects were cleared through the customs office on Thursday, and the party will proceed to their destination by rail.

It was the intention of the new settler to make the journey by truck, but the recent snow has caused him to store it in Edmonton until the roads into the north are in better condition.

Mr. Stimsman is the first American settler to be cleared through the local customs this year, and immigration officials state that this season will see one of the heaviest influx of United States settlers in recent years.

According to Mr. Stimsman, the propaganda work that has been carried on by the publicity department of the department of agriculture has caused a large number of farmers to sell out their holdings throughout the middle west states and seek farms in northern Alberta.

THE CUE

Maid—The master has gone in to take his bath.

Cook—Righto! Tell me when he starts the chorus and I'll put his eggs on.—Humor.

Now that Radio Reception has improved in the city, let us demonstrate in your own home the superb qualities of

PHILCO Electric RADIO
"neutrodyne-plus"

Radio is not only a winter's pastime—your Philco will pick up good programs the year round. A choice of over 100 stations at the turn of one dial.

Truly a find

"THIS," say the Snick-snack boys, "is truly a find!"

And you'll agree with them, when you taste the new "King's Choice" Chocolate Bar by Moirs.

Fresh—delicious—sweet, but not too sweet—with just the right chocolate flavor.

Made of fresh pineapple and fresh cocoanut, dipped in butterscotch and coated with milk chocolate. A bar developed only after years of experience in the making of choice confections!
