NEW KIND OF MONEY

BERLIN, Nov. 18:—The Germans, this fall, are going to be presented with a new kind of paper money that has some remarkable claims made for it. It is a new type of paper currency guaranteed not to burn, tear or crumple.

The new notes will be thoroughly workmanlike. The ten-mark and twenty-mark denominations will be made from steel-engraved plates. The former will bear "an agricultural design," and the latter a pattern of industrial inspiration. In a white circle a distinguishing watermark will show when the paper is held up against the light.

The money will be made non-inflammable by spraying it with a metal. If it becomes the general fashion to fireproof paper money in this way, some of our most cherished expressions will have to go.

The rich will no longer have "money to burn," and the extravagant will not be able to offer the excuse that their money "burns a hole in their pockets." And to "run through money which is non-tearable" will be impossible.

The real point, of course, is that this fall "Germans armed with a wad of bills that will not burn, tear or crumple, may find their money lasting well, even under the wear and tear of a Christmas shopping season."
