NORTHERN B. C. NEWS

STEWART

Business blocks and private dwellings in Stewart have been receiving treatment from the paint brush during the past several weeks. Fifth Street, in particular, is undergoing an extensive brightening up program and will present a clean and favorable aspect to the many visitors who will tread its streets this summer.

Cars have been getting up the Salmon River road as far as Fish Creek and, in a few days, it is expected they will be able to get through to Nine Mile. The upper end of the road is still in bad shape.

The Stewart Board of Trade has recommended the names of Howard Campbell, W. R. Tooth and John Campbell as temporary village commissioners for Stewart pending the holding of the first civic election here next January.

The three-times a week mail service for Stewart has been started this week. The steamer Prince Rupert as well as the Prince George and Catala now bring mail here.

Melvin Lee left last week for Vancouver where he will take tests preparatory to joining the Royal Flying Corps.

Jim Easton left last week to join the staff of the Big Missouri mine.

Bert Shearme was in town last week from the Georgia River mine for a brief visit.

Mrs. Allan Carolan returned to town last week from a brief trip to Vancouver.

Leslie Chapman of the engineering staff of the Premier mine left last week for a month's holiday trip to Vancouver.

PRINCE GEORGE

The Board of Works has presented an $8.000 sidewalk program for the year to the city council. In all, $12,000 has been appropriated for sidewalk work in the city this year.

Miss Phyllis Ireland has been named May Queen here and will be crowned on June 7 under the auspices of the Women's Hospital Auxiliary. Helen Styles, Alice Johnson and Florence Belina will be maids of honor.

The city council has ordered a strict clean-up in Prince George and has instructed the health officer to take action if long standing nuisances are not abated at once. At the council meeting last Monday night Ald. Fraser declared that he believed Prince George to be "the dirtiest town in the Province of British Columbia."

The contract for the construction of the 12-mile cut-off which will take the C. N. R. line up McLennan Creek to Swift Creek to connect with the main line in that vicinity has been awarded to the Thompson Construction Co. of Winnipeg. Work will commence as soon as the railway estimates are passed at Ottawa.

BURNS LAKE

A motion was passed by the Burns Lake and District Board of Trade at a meeting last week asking the provincial government to reopen commercial fishing in lakes over four miles long. Surprise was expressed by members of the Board at the action of the government in closing so many large lakes in this district to commercial fishing after the Board had endorsed this business venture.

Burns Lake defeated Rose Lake by a score of 2 to 1 last week in about the best football game that has ever been seen here.

The village commissioners have decided to insist that the traffic bylaw be observed in Burns Lake and signs will be erected at various points warning auto drivers not to exceed fifteen miles an hour within the town limits. Turning except at specified intersections is also prohibited.

A start was made last week in getting the local tennis courts in shape and the sport will soon be on in full swing here.

K. Engstad has taken a position in Phil Brunell's store here.

A. R. Brown and Kenneth Warner have completed the building of a new house for Mr. and Mrs. A. E. Kissock and the latter have now moved in.

Neil Van de Veen and R. G. Stearns of Tintagel were visitors in town last week.

S. S. Phillips, district agriculturalist, Smithers, was a visitor last week in the Lakes district on official duties.

While the days are hot, there have been night frosts here constantly during the past few weeks and the garden stuff is slow in starting to grow.

SMITHERS

Olof Hanson is here on his way back to Prince Rupert after a business trip to Ottawa, Montreal and Washington, D.C. On his way west he was called to Kamloops to attend the funeral of his brother, Bert Hanson, who was killed in an accident. Mr. Hanson will leave in a day or so for Prince Rupert.

The action of Joseph S. Kelly of Smithers vs. J. F. Duthie of Seattle, which was to have been heard at the Supreme Court Assizes in Prince George, has been settled out of court by the payment to the plaintiff of $600. The original claim was for $5,000 as recompense for machinery which plaintiff claimed was used wrongfully by the defendant.

A large tractor and several men are now engaged in removing stumps from the new aviation field here so as to make it suitable for airplane landings.

The town scavenging contract has been quite a problem for the village council. George Godwin has submitted a tender to do the work at a slightly lower figure than is at present charged.

Quite a camp for unemployed who drift into Smithers has been established just west of town.

At a meeting this week of the Smithers Assembly of the Native Sons of Canada, prizes were presented by President A. C. Fowler to the winners in a recent public school essay contest. The winners were: Kathleen Powell, Alice Dimock, Alfred Bamford, Molly Priest, Lorna Apps, Fred Small, Jerry Warner, Margaret Windt, Hildur Fagerlid.

Home Canning Made Easy By New Free Book

Summer Foods in Winter Help Preserve Health and Provide Ready-Cooked Meals

Just prior to the war some remarkable discoveries were made in regard to the canning of food products, discoveries that have greatly enlarged the scope of food preservation and made it possible to put up for future use almost every kind of fruit, vegetable and meat.

These developments are described in a new booklet entitled "Home Canning," just issued by the Bank of Montreal, dealing with their food problems in the modern scientific way. With this booklet as her guide, the farm housewife is able to provide just such a wide range of healthful foods in winter as in summer. Furthermore, when busy days arrive or when unexpected company drops in, she is no longer flustered by the problem of meals—she has good, appetizing foods right at hand in plenty, only waiting to be warmed up and served.

Here are some of the things that one can now easily preserve in all their original freshness, and with the health-giving vitamines retained: Tomatoes, string beans, peas, corn, greens, asparagus, carrots, beets, rhubarb, berries, cherries, plums, peaches, pears, chicken, beef, pork, soup and fish.

Of course, to preserve these foods properly, you have got to know how. The booklet describes how. It deals with cold packs and hot packs, glass jars and tin can containers, and with best methods of processing, whether in the ordinary boiler or in that wonderful little invention, the steam pressure cooker, which latter, by the way, can be used to great advantage in ordinary cooking.

Lots of people wonder why they need headache cures and tonics during the winter and in spring—the lack of those healthful qualities which fresh fruit and vegetables contain. This booklet shows how to get summer food all the year round, to the great advantage of the health and the pocket book. Food that would otherwise be wasted can be saved and enjoyed at any time; chickens, pigs and calves that would otherwise be eating their heads off can be killed when they are ready, stored in glass jars or cans, and eaten when required, with no loss of flavor or other qualities.

In fact, there is nothing relating to the subject of canning which is not dealt with in the booklet in a way which makes canning easy to all. Copies of the booklet may be obtained free from the local branch of the Bank of Montreal.

U. S. DEPENDENT ON OTHER COUNTRIES

The United States is dependent upon foreign countries for ten metals or materials vital to American industry. These materials are chromium, maganese, nickel, antimony, tin, mica, platinum, tungsten, vanadium, and graphite. Of these, perhaps chromium, manganese and nickel are the most important.

Evidences of Progress

There are a number of very material evidences of the progress of Prince Rupert just now. Among them may be noted:

The construction of the first unit of a large hydro-electric power plant for the use of the city and neighborhood.

Plans all laid for building of new Canadian National Railway Hotel to commence this year.

Tenders being called for new Liquor Store for Provincial Government on Third Ave.

Work proceeding on construction of highway by Provincial Government.

Securing of contract by local shipyard for building large railway car barge for use in the south, the work to be done this year.

Extensive new fishermen's floats being built by Federal Government.

New Post Office expected to be built by the Federal Government.

Work on new addition to Fisheries Experimental Station nearing completion.

Number of buildings being planned for private interests.

Increased tourist service being given and better stop-offs arranged by railway company.

New steamship to make home port at Prince Rupert just commenced new service.

General spirit of co-operation and optimism on the part of the people of the city, officials of the railway company, power corporation and country generally in regard to future prospects for city and district.
