Progressives Out For Senate Reform.

Apparently the Progressives are out for Senate reform. Joseph T. Shaw, member for Calgary, waded right into the upper chamber in the House of Commons and placed them just where they belong. According to Mr. Shaw it is wrongly constituted and has worked to the disadvantage of the country.

Mr. Shaw is a moderate. He would not abolish the chamber but would change it from being an "old men's home" to a real live body of live men representing the people of today instead of the politicians of a generation ago.

A suggestion made by Mr. Shaw is worth pondering. He says that the reactionary is given full opportunity for his activities but that the man seeking the slightest measure of reform finds himself opposed by all kinds of checks and balances.

Logging And Mining Alice Arm This Year.

Both logging and mining are to be active at Alice Arm this year. While there is no suggestion made yet that the Granby Company will continue their logging operations, the Abbotsford Logging Co. will get out logs for the Prince Rupert mill.

In the mining field there are a great many properties that will be developed and if there is truth in the rumor that the Dolly Varden is to operate, the mining town will boom once more.

With Stewart in full swing and Alice Arm going strong, mining in the north should be one of the leading industries.

Protect Dogs Of The City.

There are a great many dog lovers in this city who have valuable animals and they think a great deal of them and care for them well. There are other dogs of a nondescript variety that roam the streets along with a few of the better class and seem to have no owners. There seem to be more dogs to the block in Prince Rupert than in any other city of the continent, judging from the number on the streets.

Just what steps should be taken to see that the dogs are cared for and the useless ones destroyed, is not for a newspaper to suggest. We draw attention to a condition that exists here and which for a long time seems to have called for action on the part of the authorities.

Great Work For Football Association.

Organizations such as the Football and Baseball Associations can do excellent work in a place like Prince Rupert. They can encourage the young people to play the game and play it in a sportsmanlike manner. They can help to keep up interest in sports and games and can also do a great deal to encourage a desire to play the game for the games sake rather than for the trophy. The Football Association is just starting out on what should prove to be a banner year.

News Of Boat Race Goes All Over World.

The Oxford and Cambridge annual boat race is a sport event that is watched by people all over the world. It is a struggle for supremacy between the two big English universities and has been rowed so often and talked about so much that there is today no quarter of the globe where someone is not following the fortunes of the dark blue or the light.

The event takes place tomorrow on the Thames River from Putney to Mortlake and it is the seventy-seventh of the series. While possibly half a million people will be out to view the big event, all London is waiting for the result. Canada gets the news earlier than some parts of Britain, and if the wires are in order the result should arrive here tomorrow about noon.

These Cubes are Real Money Savers Because—

Though small in bulk, they are very high in food value—concentrated, pure, rich nourishment from the best prime beef, with no waste.

OXO Cubes add variety to your cooking and enable you to use food which might otherwise be wasted. To new dishes they add the finishing touch—to old ones they give new life and tastiness, transforming "Left-overs" into appetizing delicacies.

Try OXO Cubes in soups, sauces, gravies, stews, hash, meat-pies, paste for sandwiches, or for beef tea and other hot drinks.

OXO Cubes in tins of 4 - 15c. and in tins of 10 - 30c.

The Great Beef Economy

URGE PROTECT B.C FORESTS

Reproduction Going on as Fast as Depletion Says E. C. Manning

VALUE TO PROVINCE

Cut Could be Twice as Large if no Losses From Fire and Insects

That British Columbia is the only province in Canada where the forests are reproducing themselves as fast as they are being depleted and that if properly protected from fire and insect depredations the cut could be twice as large and still not exceed the production, was a statement made by E. C. Manning of the British Columbia forestry department, formerly district forester here, at the Rotary Club luncheon yesterday.

Mr. Manning urged that the forests be considered a crop and not a mine to be exploited. It was one of British Columbia's greatest sources of wealth. The crop needed protection and he urged that no man was entitled to his freedom who was careless with fire.

Restocking Goes On

Much of timber used today was from 100 to 500 years old and being mature should be disposed of as soon as a market could be found for it. Restocking was going on chiefly by disposing of the slashing and leaving seed trees. Conservation was the difficult matter. All lands not used for any other purpose should be growing timber. Money was needed to protect the forests in order to preserve the equilibrium between growth and production.

People did not realize that one-sixth of the revenue of the government came from timber direct and indirectly twice that much. One-third of the provincial payroll and half the freight originating in the province came from forest products.

Two-thirds of the newsprint used in the United States is obtained from Canada. Three-fifths of the timber of the United States is now cut over. In 1912 the cut in this province amounted to fourteen hundred million feet. Last year it had amounted to twenty-five hundred and fifty million. No country or province could afford the present drain from fire and insects that was going on.

From here to Fraser Lake half a million dollars was spent annually on getting out ties and quarter of a million on poles. Unless the timber was protected this could not continue long. The timber regulated the water flow and provided a splendid playground for those living in the cities.

Mr. Manning was thanked by President Kergin for his interesting and able address.

FIRST YEAR OF BROADCASTING

Sir Henry Thornton Sends Brief Message Over Radio Celebrating Event

WINNIPEG, Mar. 27. — Celebrating the termination of one year of successful radio broadcasting in western Canada radio station CNRW located in the Fort Garry Hotel, Winnipeg, went on the air last night with one of the most ambitious programs of entertainment and addresses which has yet been staged in western Canada. The Canadian National Railways policy of radio broadcasting was extended to the prairie provinces on March 27 last and since the commencement then with the use of the Manitoba government telephones station at Winnipeg has been extended to cover broadcast from Regina, Saskatoon, Calgary and Edmonton. Work is now being started on a new station at Vancouver which will operate under the call letters CNRV and be known as "the voice of the Pacific." The new station at Moncton CNRA is known as "the voice of the Atlantic," and over in the United States CNRW at Winnipeg has become known as "the voice of the Prairies and Lakes," on account of its proximity to the lake district of Ontario and Manitoba.

Sir Henry's Message

The extensions which have been made in radio operation during the past year was referred to in a brief message from Sir Henry Thornton, chairman and president of the Canadian National Railway system. During the evening nine broadcasting stations were now in operation from the Atlantic to the Rocky Mountains, said Sir Henry, and the tenth would be added toward the end of May when it was hoped the Vancouver station would take its place as one of the most powerful in Canada. Most trains have been radio-equipped during the year and the comments of the passengers left no doubt as to their satisfaction with the radio service rendered them during their journey between points on the Canadian National system. The president's message carried a word of thanks to officers and employees of the system in western Canada for the splendid service they had given the company during the past year and assured them as well as the radio public of western Canada and the United States that the Canadian National was out this year to make 1925 a record year for the company.

Extends Invitation

A. A. Tisdale, assistant to the general manager of western region, spoke in the absence of A. E. Warren, general manager, and extended to Americans a hearty invitation to visit western Canada and learn at first hand of the beauties of her rivers, woods and lakes, and also of the magnificent mountain scenery awaiting the tourist in the Canadian Rockies. "If you have a vacation to spend," said Mr. Tisdale, in his address, "Come and spend it with us and I am sure you will not return home disappointed with your outing."

The Fort Garry Hotel trio and Frank Wright's Country Club Orchestra, also a Fort Garry organization, together with the Transcona shops brass band, an organization formed of the company's employees, together with Earl Hill's Capitol Orchestra furnished the instrumental features of the evening, while vocal selections were provided by Miss Hazel Mills and Messrs. Kilgour and Oscar Noel.

Souvenirs

Special souvenirs on the "birthday party" are being distributed to kiddies and grown-ups who wrote the station during or after the broadcasting. No stone was left unturned to make this an outstanding event.

ALICE ARM LA ROSE CO. IS RAISING $15,000

Local Company Propose Continuing Development Work this Year on Mine

The Alice Arm La Rose Mining Co., ltd. of which Dr. W. T. Kergin is president, Jas. H. Thompson, vice-president and E. H. Mortimer, secretary with Joe Wells and Miles Donald of Alice Arm, both old timers in this district, also directors, is in the market for $15,000 for immediate development work. This company, controlled thus by local men, offers one of the best gambles, as all mining is a gamble, in the local field today, according to J. M. Morrison, of Alice Arm, who is in town now raising the necessary funds.

One of Prince Rupert's pioneers although resident in Alice Arm for several years past, Mr. Morrison is convinced that his enthusiasm for the success of the La Rose is amply justified, as the last fifty tons of ore extracted and shipped gave average returns of over 250 oz. silver to the ton.

With the re-opening of the Dolly Varden railway this year, it is intended to resume operations by driving a new tunnel as suggested in the report of the Minister of Mines for 1919. The mine is approximately some seven miles from Alice Arm. Every dollar raised now for this purpose will be applied directly to development. The shares now being sold are all treasury stock as the present holders are not disposing of what they already own. By selling locally direct, the company will be under no brokerage expense nor any other of the heavy costs attached to an ordinary stock selling campaign.

As a legimate mining venture, Mr. Morrison is recommending La Rose shares which may be obtained at 50c a share in lots of 200 either from Mr. Morrison at Alice Arm or from the company's secretary E. H. Morthmer, 324 Second Avenue.

GERMANY SHOULDERS BURDEN OF PAYMENTS DECLARES FINANCE CO.

MONTREAL, Mar. 27.— Germany is shouldering the burdens placed upon her by the Allies for the payments against their claims for reparations under the Dawes plan in a manner that is likely to prove the most remarkable example of the resilience of a great nation that the financial history of the world affords, writes the Berlin correspondent of the Investment House of C. M. Cordasco & Company in the March issue of their Foreign Exchange Bulletin.

The agent-general for reparations, he continues, has issued a statement covering receipts and disbursements during the first two months of the present year. During January, Germany paid over $21,000,000 and for February the receipts were $46,000,000 including $25,000,000 from the German railways.

The industrial situation is improving. The iron and steel branches are enjoying great activity; the coal market is better and the textile trade is booming. German trade representatives are at present negotiating favored-nation treaties with almost every country of any importance on the continent.

WATER NOTICE.

DIVERSION AND USE.

TAKE NOTICE that the Skeena River Packing Company, Limited, whose address is 1318 Standard Bank Building, Vancouver, B.C., will apply for a licence to take and use 5 cubic feet per second of water out of Wolf Creek which flows northwesterly and drains into Porpoise Harbour about north end of 11th Avenue, Port Edward Townsite. The water will be diverted from the stream at a point about one and a half miles from the mouth at point of diversion of Port Edward Townsite water, system and will be used for industrial purpose upon the land described as part of foreshore Lot number 1476, Range 5, Coast District. This notice was posted on the ground on the 23rd day of March, 1925. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder, Prince Rupert, B.C. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is March 26th, 1925.

SKEENA RIVER PACKING COMPANY, LIMITED, Applicant.
By A. J. Matheson, Agent.

WATER NOTICE.

USE AND STORAGE

TAKE NOTICE that the Canadian Lumber Yards, Limited, whose address is 912 Standard Bank Bldg., Vancouver, B.C., will apply for a licence to take and use 250 cubic feet per second and to store 50,000 acre feet of water out of Ian, Skundale, and Ain Lakes, and Ain River, which flows southerly and drains into Massett Inlet, through Indian Reserve No. 6. The storage-dam will be located at or near the outlet of Ain Lake. The capacity of the reservoir to be created is about 50,000 acre feet, and it will flood about (to be determined) acres of land. The water will be diverted from the stream at a point at or near the storage-dam, and will be used for Industrial Power purpose upon the land described as Part of Indian Reserve No. 6. This notice was posted on the ground on the 4th day of March, 1925. A copy of this notice and an application pursuant thereto and to the "Water Act, 1914," will be filed in the office of the Water Recorder at Prince Rupert. Objections to the application may be filed with the said Water Recorder or with the Comptroller of Water Rights, Parliament Buildings, Victoria, B.C., within thirty days after the first appearance of this notice in a local newspaper. The date of the first publication of this notice is March 13, 1925.
