SOUTH WALES MINERS AGREE TO STRIKE SETTLEMENT

South Wales Miners Accept Terms Decided by Executive Council

CARDIFF, November 15.—The executive council of the South Wales Miners' Federation have agreed to the proposed terms of the Government for a settlement of the coal tieup. While it may be a week or more before there is a general resumption of work, the recommendation of the delegates to the conference, if carried out by the various federations, is looked upon as bringing to a termination the long period of industrial strife.

Secretary Cook of the miners' federation, whose slogan during the strike has been "not a penny off the pay, not a minute on the day" of which nothing now remains, is reported to be suffering from heart attack due to the strain of prolonging the struggle and is ordered to take a rest.

INSPECTION ON THIS COAST

DEPUTY MINISTER OF MARINE VISITING IN THE CITY TODAY

In the course of an inspection trip to the Pacific Coast, Alex. Johnston, deputy minister of marine, and Commander C. P. Edwards, director of the Radiotelegraph service of Canada, arrived aboard the hydrographic servey steamer, Lilloet, at Digby Island this morning. They paid a visit to the marine and wireless stations this morning and then came in to town on the Birnie. Mrs. Johnston is accompanying her husband and included in the party is S. C. Jackson, chief of the Gonzales Hill wireless station and formerly chief here.

Mr. Johnston and Commander Edwards will return south tonight enroute East. They have been on the coast for several weeks.

FOR CONSOLIDATION

Mr. Johnston has come to Prince Rupert more particularly to ascertain if consolidation may not be possible of various of the department's operations at this port. There are half a dozen institutions now working separately here that might be combined to bring about better economy and, at the same time, not impair efficiency.

Regarding the report that has been current here recently that the marine station on Digby Island might be moved to the waterfront of the city and the wireless station moved to the present marine station site, Mr. Johnston said that this was one of the matters he had come here to investigate. There are circumstances for and against the move and no decision in this or other matters, he said, would be reached until he had returned to Ottawa and consulted with the minister.

With regard to the matter of a direction finding station being established at or near Prince Rupert, Mr. Johnston remarked that wireless service at this port wos likely to be expanded instead of decreased.
