Here's Quickest, Simplest Way to Stop a Cold

1. Take 2 Aspirin Tablets.
2. Drink full glass of water. Repeat treatment in 2 hours.
3. If throat is sore, crush and dissolve 3 Aspirin Tablets in a half glass of water and gargle according to directions in box.

Almost Instant Relief in this Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICKEST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you caught it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets. Aspirin is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve almost instantly. And thus work almost instantly when you take them. And for a gargle, Aspirin Tablets dissolve so completely they leave no irritating particles. Get a box of 12 tablets or a bottle of 24 or 100 at any drug store.

Another Test Run

The Socony-Vacuum Corporation of New York conducted a test run of many makes of cars on a route through the Peace River Country, Alberta, touching at Edmonton, Saskatoon, Moose Jaw, Regina, North Portal and down through the United States and on into Mexico. The leading car was a Ford V-8 Fordor, owned by the Socony-Vacuum, and bringing up the rear was a V-8 Cabriolet which was driven by the Secretary of the Expedition.

Included in the tour were a Chevrolet, Buick, Oldsmobile, LaSalle, Cadillac, two Pierce Arrows, G. M. C. truck, Studebaker, Pontiac, and other makes, as well as two Fords.

It is interesting to note that it was reported on the arrival of the caravan at Edmonton from the Peace River Country that the V-8's were the only units which made the round trip through mud without having to be towed. On a close check we find one of the V-8's travelled ten continuous hours in low gear, the temperature never exceeded 140 degrees and gasoline consumption was one gallon to ten miles while running in low gear. All the other cars had boiling radiators and required repeated additions of water.
