EASTER MESSAGE

We suggest as our Easter message to the people of Prince Rupert that they refuse to worry or become excited over what they read or hear over the radio. Many of the despatches are exaggerations or at any rate are given an importance that is not warranted by the circumstances.

It is difficult to get into the proper mood to fully realize the Easter message that good is bound to triumph over evil. When we look at Europe and Asia today we must feel it difficult to realize that there is a guiding hand in all the affairs of man and that what may today seem something terrible is the working out of a definite plan.

As we look over our gardens we see the resurrection of the plant life everywhere apparent. Sometimes we see plants injured by the late frost. Again we see them cut down by injurious insects. In places the garden is choked by weeds. All these things can teach us valuable Easter lessons. Because things do not happen the way we would like, we think they are wrong when very often they are right and we are wrong.

Possibly some day there will be a great awakening when we shall realize more clearly than we do today the plan that is being worked out. What seems most clear is that there is a plan and that there is a master hand arranging and carrying out this plan. Also we must realize that the same force which is making the lilies bloom is making the thistle grow, the insect live and thrive on our finest flowers and it also brings the killing frost which sometimes creates havoc. It is all part of the plan.

MORE FAITH SAID THE ELDERS

Our mothers used to tell us that we should have more faith. It was pointed out to us that all things worked together for good. It was a great relief to be able to sit back and feel that they were right. Today, however, we feel that it is up to us to help the Creator in his work. We have a duty to our neighbors all over the world which in the old days we did not feel. We have a duty to protect and encourage and help. Faith is not of much value if we do not work, using brain and brawn to bring about desired results.

INTERNATIONAL IRRITABILITY

There is a general feeling of irritability over the international situation. While we must admit that in the present state of feeling anything may happen, yet we must always remember that most of the nations do not want war and this particularly applies to Great Britain. Some countries are taking advantage of this known reluctance to plunge the world into another terrible conflict but of late it has been made clear that they may go too far. Twisting the lion's tail may become something more than a game.

T. H. Johnson, former general manager of the Canadian Fish and Cold Storage Co. at Prince Rupert but now of Victoria, is leaving with Mrs. Johnson on Thursday next for Vancouver enroute to England and the European continent by the Motorship Canada via the Panama Canal. They expect to return by the same route about the end of September.

FILM LAID IN 'FRISCO

"Fisherman's Wharf," Starring Bobby Breen, Is Feature Offering At Capitol Theatre

"Fishermen's Wharf," a colorful story of San Francisco's waterfront with Bobby Breen as the star and a cast featuring Leo Carillo, Henry Armetta, Lee Patrick and Sticker, the famous acting seal, is tonight's principal attraction at the Capitol Theatre.

The picture depicts the eleven year old youngster as the son and heiner of Carrillo, a San Francisco Sicilian crab fisherman. The boy demonstrates his ability to use his fists as well as his voice. The plot, a fast-moving one, concerns Bobby's hatred for a cousin and aunt who attempt to break up the companionship that had developed between the father and the lad.

Nearly all the outdoor scenes are set against the background of fisherman's wharf and the San Francisco Bay country. Among the famous landmarks to be seen are the Golden Gate Bridge, the San Francisco-Oakland Bridge, the Ferry Building, Alcatraz Island and the famous Treasure Island, scene of the Golden Gate International Exposition.

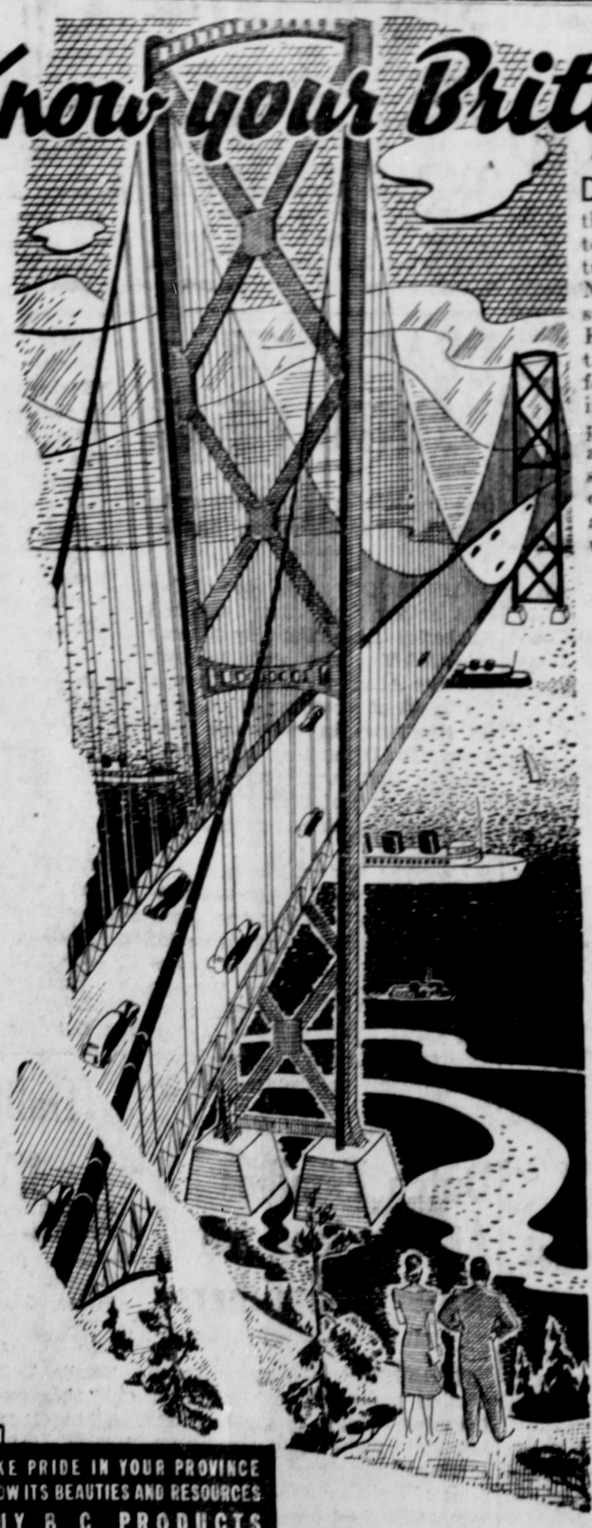
Know your British Columbia



DID YOU KNOW THAT... the beautiful First Narrows entrance to Vancouver Harbour was noted for two great engineering achievements? Not only is it spanned by the longest suspension bridge in the British Empire, but four hundred feet below the surface is a seven and one-half foot tunnel, thirty-one hundred feet in length, which is the only high-pressure tunnel to pass under navigable salt water. This tunnel, with a static pressure of 210 pounds is the only one of its type in the Empire, and carries Vancouver's unexcelled water supply.
