FIVE FEATURES!..

But the Kootenay Doesn't Stop there

EVERY vital part of the range is built to resist rust and corrosion! The flues and smoke-box are enamel clad! The oven is of *white nickeled* (washable) steel. The range is of smooth construction with no bolt heads exposed. Burns any kind of fuel . . . ideal for burning all the cheaper grades of Western fuel.

Here is a McClary range that fairly teems with convenient features . . . specially planned to meet your own special requirements . . . *and it sells at the price of an ordinary cook stove!* See it! or write for full particulars and enclose 25c for your copy of Modern Housekeepers' Guide and Cookbook to General Steel Wares, Limited, Vancouver.

AN ACTUAL ANALYSIS OF WESTERN FUEL

Moisture	8.5%
Gas	34.5%
Carbon	49.4%
Ash	7.6%

Most ranges burn only the fixed carbon, 49.4%. The Kootenay Firebox burns Carbon, 49.4% and Gas, 34.5%.

News of the Mines

AROUND PRINCE RUPERT

Portland Canal Described In Special Article; Is Important Camp; Railway Possibilities

During the year 1928 the Portland Canal and Naas River mining divisions produced 73.7 per cent of the total lode gold, 36 per cent of the silver, and 34.5 per cent of the copper produced in British Columbia, says a special article in the Mining and Industrial Record. This came almost entirely from two companies, Granby Consolidated Mining, Smelting & Power Co., Ltd., operating the Hidden Creek mine and Anyox smelter, and the Premier Gold Mining Co., Ltd., operating the Premier mine, near Stewart. Granby's output is largely copper, while Premier is the gold-silver mine of the north.

Premier can reckon its output in tons, four and one-half tons of gold and 250 tons of silver, 1468 tons of lead and 104 tons of copper having been obtained from 275,811 tons of ore mined.

It produced 11.3 per cent of the total gold and 12.5 per cent of the total silver output of all Canadian mines during the year.

General

The country tributary to Observatory Inlet and Portland Canal is a mining country, and nothing else. The mountains rise from the sea to altitudes of six and seven thousand feet. In places there is some timber, but not in the large stands seen down the coast. Farmers, lumbermen and fishermen are conspicuous by their absence.

If one goes to Stewart expecting to find a boom camp he will be disappointed. There is an air of satisfaction, of firm belief in the continued growth of the camp. Thirty-nine properties are under development and, generally, responding satisfactorily. One is shipping on a large scale. Five are getting out high-grade ore for shipment. A score of others are tied up through lack of finances or company re-organization.

The Railway

The people of Stewart do not anticipate speedy construction of the Canadian Northeastern Railway to Peace River, development of a large seaport and influx of population. The prevalent idea is that the railway will be put in shape to the George Copper mine, on Upper Bear River, at an early date and that a tramway will be built in due time from American Creek to the Big Missouri; that the railway will probably be extended to the Naas and Groundhog, and ultimately to Peace River.

Those who know the section to the north of Premier mine are firmly convinced that it will be an important camp. Interest centres on the Big Missouri as the key to transportation facilities being employed on that property, on which work is being done by Consolidated. Considerable tunnelling has been carried out, but now the mine is being tested by diamond drilling. Some stringers of very high-grade ore have been located but no commercial tonnage has yet been proven.

When the time comes for the installation of a mill and tramway in the camp, Consolidated will be placed in a very strong position for securing the entire production of the locality. It is certain that mines will be developed in proximity to the Big Missouri and the great drawback of difficult transportation of ore shipments, under which the camp has been handicapped, would be overcome by such a system. The acquisition of the Canadian Northeastern Railway by the Consolidated interests, which control George Copper and Big Missouri, therefore holds out hopes of early benefits to Stewart.

However, we reiterate that the extension of the railway to Peace River, connecting with the railway from Edmonton to Peace River Crossing and Berwyn, and providing transportation to Ingenika, Hudsons Hope and Groundhog, will come about in the near future.

THISTLES BEAT EMPRESS CLUB

League Football Game Last Night Resulted In Score of Five to Nil

In the first league football fixture to be played in two weeks, the Thistles blanked the Empress Social Club by a score of 5 to 0 last night. The weight of the Scots over the young Empress players was somewhat of a factor in deciding the issue. Both clubs fielded full teams. The losers, however, put up better resistance than the score might indicate.

Dave Jack scored the only goal in the first half. After the change over, the Thistles had things pretty well their own way on the down grade and Jock Campbell scored three goals in quick succession. Charlie Baptie made the concluding goal.

William Barton refereed and Sam Currie and A. Clapperton acted as linesmen. Weather conditionse were ideal and a good-sized crowd witnessed the match.

With four games yet to be played the league standing for the Mobley Cup is now as follows:

	W.	L.	Pts.
Thistles	3	0	6
Empress	2	2	4
Regiment	0	3	0

The next game will be played next Tuesday evening between the Thistles and Regiment.

Making Repairs Wireless Wharf

John Currie & Son Also Awarded Contract For Breakwater Near Old Quarantine Wharf

John Currie & Son, who are now proceeding with the erection of sheds and marine ways near the marine depot for the fisheries department, have been awarded another contract for the repairing of the old quarantine wharf which is now used as a landing for the wireless station and the construction of a breakwater there.

Repairs to the section of the old quarantine wharf used by the wireless station will consist principally of redecking. The breakwater will be at one end of the wharf and is being cut into shelter floats which departmental boats use. It will be built of piles and lumber.

The work is being commenced at once by the contractors.

DRYDOCK WINS SOFTBALL GAME

Defeated Round House and Will Play Off For Second Half Honors

In a postponed scheduled softball game last night, the Dry Dock beat the Round House 11 to 10, in a fast game. Both teams played good ball, with lots of thrills for the fans, and it was anybody's game right to the last man to bat. Bond, playing shortstop for the Shops, played a brilliant game and took everything that came his way. Gawthorne, for the Dry Dock, played a nice, steady game.

The teams:

Dry Dock — McKeown, Gawthorne, Smith, Kelsey, Howe, Reid, Hedstrom, McFee(Palmer.

Round House—Cameron, Tulluch, Peterson, Ferguson, Bond, Foreman, Strachan, Mair.

Umpires—Jackson and Comadina.

The play-off for the second half will take place tonight at 6:30 sharp, between the Dry Dock and Station.

This afternoon's train, due from the east at 3:30, was reported this morning to be on time.
