LOCAL NEWS

R. L. McIntosh who has been on a business trip to Toronto, returned to the city on the Prince Rupert this morning via Vancouver.

Matt Johnson appeared before Magistrate McClymont in city police court this morning on a charge of attempting to stab John Kajander with a pocket knife in a local pool room last night and was remanded for eight days.

H. N. Brocklesby, acting director of the Prince Rupert Fisheries Experimental Station, returned to the city on the Prince Rupert this morning from a trip east in the course of which he attended the annual meeting of the Biological Board of Canada in Ottawa and visited eastern points on official duties. He was accompanied home by Mrs. Brocklesby and family who have been visiting in Winnipeg.

The fire department had a call at 6:30 last evening to Rose, Cowan & Latta's stationery store on Third Avenue where an overflow of fuel was burning from an oil burner. Considerable smoke had caused an alarm to be sent in from Parkin & Stuart's electrical goods store next door. The fire was extinguished by turning off the oil, no damage being done.

The monthly meeting of the Prince Rupert Retail Merchants was further postponed for another week last evening.

A charge of vagrancy against Charles Sunberg was dismissed by Magistrate McClymont in city police court this morning.

Mrs. A. G. Bowie and child, who have been on a trip to Vancouver, arrived in the city on the Prince Rupert this morning from the south and proceeded by train this afternoon to their home in Smithers.

After having spent a holiday ashore in Vancouver, Capt. Dan Donald has returned to the command of the steamer Prince Rupert on its present voyage north. Capt. H. E. Nedden, who was relieving on the Prince Rupert during his absence, will go to the ss. Prince George which is shortly to be recommissioned in service.

Radions' Meeting

(Continued from Page 1)

on a recent visit here, had informed J. J. Little, manager of the Northern B. C. Power Co., that, if insulators on the line were changed to the suspension type, there would probably be considerable improvement in reception. During the year the association had had seven general meetings. Felix Batt, part time radio inspector, had attended to many complaints during the year. Transformers had been checked and necessary repairs made by the Northern B. C. Power Co.

A letter from H. L. Taylor, inspector of electrical energy for the province, advised the association that the transmission line of the Northern B. C. Power Co. had been approved both by the city and the office of the inspector of electrical energy. Mr. Taylor stated, however, that the matter had been taken up with the Dominion radio inspection service in Vancouver with a view to having the situation cleared up.

A letter from C. P. Edwards, director of radio service for Canada, stated that, in co-operation with the Power Corporation of Canada, efforts had already been made to minimize the interference caused by the transmission line in Prince Rupert. Several inspections had been made and experiments applied but, to date, without much success. The interference was more noticeable in Prince Rupert because of the lesser receptivity due to long distance from the broadcasting stations. Such interference would not be so noticeable in centres nearer the broadcasters. The Power Corporation, the letter continued, had been doing all economically possible to further reduce the induction and engineers of the department and the company had met to confer on the matter. All known means of eliminating the interference had been applied but further means would be sought. In the meantime, everything possible was being done to clean up the situation.

Information Given

Felix Batt, part time radio inspector, stated that the department had been given the most complete information by him as to all details in connection with the transmission line. The department was fully acquainted with the situation and he (Mr. Batt) thought it would be presumptuous on the part of the association to advise experts of the department as to what should be done. Mr. Gray, radio inspector, while here, had expressed the opinion that, if a new type of insulator were installed, the interference might be reduced 50 to 75%. Mr. Little, however, said that the cost of making the proposed changes would probably be $10,000.

After some discussion, the meeting decided to get the regulations covering high power lines to ascertain whether or not everything here was in order.

The meeting passed a resolution, moved by F. W. Wesch and J. W. McAuley, that a telegram be sent to station CFCN of Calgary congratulating it on its service and programs. This station was now one of the best in Prince Rupert.

Fred Riffou suggested that radio owners and sympathizers boycott the power company by discontinuing taking light service until reception conditions were improved.

After considerable discussion on the matter, the association agreed to a suggestion of R. T. J. Rose that the local inspector, subject to approval by the executive of the association, be empowered to instal where it was deemed necessary condensers or other devices necessary to eliminate interference from private sources such as from sewing machines, regenerative sets, etc.

On motion of J. W. McAuley the association decided to ask Ottawa to give an increase in salary to the local part time inspector so that he would be able to give more time to the work. The valuable work that Mr. Batt was doing not only in the city but also in the district was referred to. It was estimated that there were now upwards of 700 receivers in the district. Support for the salary increase move will also be sought from Terrace and Smithers.

While Mr. Batt expressed the belief that the average furnace oil burner was not a cause of radio interference, the Association decided to ask the city council that all electric installations in the city in future be subject to approval by the radio inspector.

Radio dealers of the city will be asked by the association to furnish Mr. Batt with names of all new radio purchasers in the city.

In answer to a question by Mr. Wesch, Mr. Batt expressed the opinion that short wave communication by amateurs in the city was not an appreciable interference to ordinary radio reception.

C.N.R steamer Prince Rupert, Capt. Dan Donald, arrived in port on time at 10:30 this morning from Vancouver, Powell River and Ocean Falls and will sail at 4 o'clock this afternoon for Anyox, Stewart and other northern points whence she will return here tomorrow evening
