MINING IN INTERIOR

(Continued from page one)

fidently to seeing something definite done towards it at the Empire Economic Conference this summer. Copper prices are also too low to encourage the owners of copper mines and there are none operating in the Omineca district at present.

But the gold mines are receiving more attention than usual. Prospectors are out in many different parts of the district looking for placer gold. Just a few days ago some gold and black sand was brought in from Maxim Creek, south of Rose Lake. There are some more prospectors looking into the placer possibilities of Bob Creek, south of Houston. Many have gone off to the northern part of Omineca Mining Division to the McConnell Creek and other regions but they are a long way from transportation and are areas only suitable to companies with plenty of money or individual prospectors accustomed to living off the country. Cost of getting supplies there is too great for the ordinary individual.

In Babine Range

In the Babine Range, across the valley from Smithers, some prospectors are working on their claims at present and an extension is being made by the Department of Mines to the Driftwood Creek road, which leads up to the head of Driftwood Creek, directly opposite Smithers. There is a gold area at Dome Mountain, east of Telkwa, and Babine Gold Mines Ltd. will be working on their property there during this summer. Alex G. Chisholm, a Smithers prospector, located the mineral claims last fall, and another large block of mineral claims is held there by Dome Mountain Gold Mining Co. Ltd. on which work was done a few years ago.

The Bulkley Valley Coal Mine near Telkwa is being worked continuously by Frank M. Dockrill and a number of men are at work there getting out coal which is used along the railway line and in Prince Rupert. Mr. McGill tells that Smithers users who have given the coal a real try-out will not have any other. It gives more heat and a steadier heat than any other coal that has ever been used in the district and is ideal for heating and general domestic use.

On Hudson Bay Mountain there are a number of gold properties—Glacier Gulch, Mamie, Yukon, and others that have every indication of making profitable gold mines. The only one of these which is working just now is the Jessie Gold Mine, the others being closed for lack of money to carry on. The location of the Jessie property was pointed out on the side of the mountain and its workings can be clearly seen from the town, from which they are distant only four and a half miles. Men have been at work there since June 15 driving a tunnel on the gold-bearing ore and the shots from their blasting can easily be heard in the town. Supplies have been taken up on packhorses to continue the work all summer. Nearly all of the Smithers people have an interest in this, which is practically a town mine with a local board of directors and Mr. McGill as the manager.

DOES YOUR BUSINESS NEED A DOCTOR?

Now, Mr. Businessman, have you ever tried to diagnose the reason for that sudden drop in profit over the figures of "last month?" If the temperature of your business alarms you there is no need for you to lose any sleep—the remedy is simple.

ADVERTISE

"Ah!" you say, "But that's all very well. I'm only a small man and can't afford it." That's the reason the small man remains a small man. The big men in business today did not become big by hiding their light under a bushel, they advertised, and Advertised, and ADVERTISED. Advertising is as necessary to a "sick" business as the doctor's services are to a sick person. And it will find the money to pay its own bills, if done judiciously, from the increased volume of **increased** profits. Start with a small appropriation
