FOR ANY PAIN

Have you ever found any quicker relief than this?

Anyone can take Aspirin, for doctors have declared these tablets perfectly safe.

And there is no quicker form of relief for any pain.

It is well to remember these things when anyone tries to persuade you to try anything in place of these tablets.

Aspirin may be taken as often as there is any need of its comfort: to stop a headache, throw off a cold, drive away the pains from neuralgia, neuritis, rheumatism, lumbago, etc.

Whenever you take Aspirin you know you are going to get immediate results — and you know there will be no ill effects. *You know what you are taking.*

Why take chances on some form of relief which may not be as swift—may not be as safe? The new reduced price on bottles of 100 tablets has removed the last reason for ever experimenting with any substitute for Aspirin!

Aspirin is a trade-mark registered in Canada

WILL GIVE MEN WORK

President Signs Bill to Enlist a Quarter of Million for Forest Reserve Employment

WASHINGTON, April 1—President Roosevelt yesterday signed the bill which provides for the enlisting of quarter of a million men under the war department to work in the federal forest reserves of the country.

It is the understanding that the men will be paid a dollar a day and their board and clothes and will be subject to army discipline.

The President is given complete power to arrange for the camps, set the pay of the men and the conditions under which they shall work.

WEATHER IMPROVED

More Sunshine and Less Rain This Year Than Last, Official Figures Reveal

Depression or no depression, the Weather Man in Prince Rupert is getting off to a better start this year than he did last according to official figures compiled from the Digby Island meteorological bureau returns. So far this year there has been sunshine to the amount of 114.7 hours here as compared with 109.4 hours in the first quarter of last year. The rainfall this year so far has aggregated 23 inches which is very substantially lower than the 30.81 inches recorded in the first three months of 1932.

In March this year there was a total of 56.6 hours of sunshine in comparison with 54 in the same month last year. Precipitation this March amounted to 6.8 inches in comparison with 6.6 inches in March last year.

Following is the weather summary for March this year as announced today by R. G. Emmerson, Dominion meteorologist:

Highest barometer reading at sea level, 30.43 on March 8.

Lowest barometer reading at sea level, 29.24 on March 12.

Maximum temperature, 59 on March 28.

Minimum temperature, 23 on March 1.

Mean temperature, 38.5.

Total precpitation, 6.8 inches.

Sunshne, 56.6 hours.

District News

VANDERHOOF

A pianoforte recital was held in the Canadian Legion Hall last Friday by the pupils of Mrs. J. Warren Johnson. Various items on the program were presented under the auspices of the United Church choir for the purpose of raising funds for the new gowns worn by the lady members of the choir.

Corporal L. Fielder, R.C.M.P., and A. J. Rae of the Dominion Department of Indian Affairs have returned from an official trip to the Cariboo and Prince George districts.

A meeting of the Nechako Farmers' Institute was held on Saturday when the problem of opening up the local creamery was discussed. The question of financing this institution is the real "sticker" and the paramount difficulty. It is definite that H. B. M. Valentin of Prince Rupert is not going to finish the lease and agreement he had with the Provincial Government of Agriculture.

Sergeant F. J. Watson, R.C.M.P., was in Vanderhoof last week on an official inspection trip.

PLANT IS INSPECTED

Production Manager of CeePeeCee Packing Co. Paying Visit to City

To make an inspection of the plant with a view to taking it over and operating it, Mr. Anderson, production manager of the CeePeeCee Packing Co., which operates on the West Coast of Vancouver Island, arrived in the city on the Princess Adelaide yesterday afternoon and is today visiting the Rupert Marine Products reduction plant in Tucks Inlet. No announcement as to the disposition of the plant was available up to this afternoon.

WATERFRONT WHIFFS

Preparing For Salmon Canning Season—Fishermen Buy Electric Plant For Dundas Island—Herring Fishing Continues

With Inverness cannery reported to have announced that it will be in the market for sockeye this season at 40c per fish, the expectation is that the other companies will fall in line and that this will be the prevailing 1933 price for this popular and luscious variety of salmon for packing purposes. This is 10c per fish higher than was finally settled upon last year after the fishermen had been on strike for several weeks early in the season against the canners' first offer of 27½c per fish. The official scale of salmon prices for the season has not, as yet, been announced but is expected to be available in the very near future.

Meantime, with improved prices in prospect, the expectation is that the progress of the industry will not be impeded by disputes between the canners and the fishermen such as was the case last year. Cannery officials and crews have commenced during the past week or so to arrive on the Skeena and Naas Rivers and the large majority of them will be on the ground in the course of the next fortnight to get preparations for the season's work under way. A larger pack and a generally more profitable season in 1933 is anticipated and there is a healthy feeling all around at the improved outlook.

Having been indifferent health for some time, Frank Charnley, member of the scientific staff of the Prince Rupert Fisheries Experimental Station staff, leaves Prince Rupert next Tuesday for the Fraser Valley where he will enjoy an extended holiday which it is hoped will prove beneficial. Mr. Charnley will be accompanied by his wife and family.

The new camp being built by the Northern B. C. Fishermen's Association for use at Dundas Island this year is being equipped with electric light, a plant having been purchased at the recent sale of National Airplane Lumber Co.'s assets at Bullmor. It is expected to be ready to move to the Islands about the middle of the month.

In view of the recent regulations in regard to moving salmon a long distance after being caught, it is pointed out that, last year, the spring salmon taken at North Island were sold at New Westminster where they were mild cured. When inspected they were found to be in excellent condition and were graded number one.

Herring Fishing

The seiner Chatham Sound from Jap Inlet was in port yesterday with her first big catch of herring from the inlet. A herring pound has been started there with no difficulty in filling it. The herring are very numerous and one or two sets will fill the pound. There are four men on a house boat and Louie Sears, with his boat, is bringing the fish into town for disposal. He managed to sell his last catch to the fishermen but had a few left over to give to those who were hungry for a feed of herring.

With herring showing up in quantities like they are this year salmon trolling should be good. Over in Jap Inlet, they are picking up enough for their own use, one of the boys going out the other day caught six springs in less than fifteen minutes.

There have been a few good catches of 300 or 400 pounds of springs brought into town the last week from Port Simpson and Metlakatla but the fleet has not left yet for the grounds because the weather is too cold and and generally unpleasant for good fishing. Around the latter part of April is usually the time for the boys to start "driving her." There are a few hand trollers out in Pearl Harbor but the weather has been so disagreeable that the catches are few and far between.

According to a report from Port Simpson yesterday, the majority of the villagers have left for the Naas River for the annual oolachan run which is now in progress. Those who were in yesterday will be leaving soon but they had to come in and play basketball with the local team. These boys are very athletic-minded, even sacrificing their annual pilgrimage to the fishing grounds to play in this sport.

The troller Wakesia at Cow Bay, which has been lying idle for years, is being patched up and new decking put on her so that she will be able to go into service this summer.

The Nuba, Pioneer and Cape Race II are all on the docks at Lipsett's getting cleaned up and ready for copper painting.

The lighthouse tender Birnie had trouble with her crank shaft on Wednesday and had to be towed in by the ferry boat Catherine B. to the dry dock where the difficulty was soon rectified and she is back on the job again.

Government Wharf Busy

The government wharf was quite a busy place yesterday afternoon with the steamers Princess Norah and Adelaide in port at the one time. It was a ticklish job landing the Norah with the other boat in the way but it was done, however, at the small cost of one porthole glass. "The depression must be over,' said a bystander as he stood watching the two boats unloading freight at the one time and a train switching around in the yards.

Dave Ritchie, the well known skipper of the halibut boat Unome, says that it is terrible now that they have put the extra tax on sugar. Davie claims that it is pretty hard going with those like himself who use three teaspoons of sugar with every cup of tea and with prices of halibut the way they are.

So far there has been no word brought back from the Livingstone wreck on the west coast of Dundas Island but Paul Armour and his crew are still out working trying to raise her. There have been heavy winds blowing out in the open the last few days and it is likely that the weather is holding the salvors back considerably.

FIRE CALLS MORE NUMEROUS

The city fire department responded to twelve alarms during the month of March this year as compared with four in the same month last year. So far this year twenty-four calls have engaged the attention of the department as against nineteen calls in the first quarter of 1932.

CHANGING STEAMERS

Catala and Cardena to Get Back on Regular Runs Within Next Two Or Three Weeks

At the conclusion of her present voyage, Union steamer Catala, which was in port last evening from the south, will be withdrawn from the Vancouver-Bella Coola-Ocean Falls-Skeena River-Prince Rupert route, on which she has been relieving for the past two weeks, and, after completing annual overhaul and inspection at Vancouver, will be here on April 16 northbound resuming her regular run on the Vancouver - Prince Rupert - Naas River-Anyox-Stewart route.

The steamer Venture, which has been undergoing repairs in Vancouver during the past two weeks following a stranding in the Skeena River, will be back next week on the Vancouver-Bella Coola-Ocean Falls-Skeena River-Prince Rupert route on which it is expected she will make two voyages before being replaced for the summer by the steamer Cardena which is to make two more trips on the regular run of the steamer Catala. The Cardena is due here from the south on April 21 resuming her service on the cannery route.

Tonight's train, due from the East at 10:15, was reported this afternoon to be thirty minutes late.

Pains Around Her Heart

Tired Out After Doing Housework

MILBURN'S HEART AND NERVE PILLS

Mrs. Henry Ranch, Muriel Lake, Alta., writes:—"Last fall I had bad pains around my heart, and each morning, after doing a little housework, I seemed to get dizzy and feel all tired out.

Seeing that Milburn's Heart and Nerve Pills were good for these troubles I sent for a box, and after taking the Pills for a few days I felt a whole lot better. Since then I have had no return of the dizzy spells and pains around the heart."
