DETERMINATION
(Continued from page 6)

ed, he has a grandson and a granddaughter, and a nephew going to high school. In addition, his sister-in-law was accompanied from Germany by her son, sister and brother.

Grateful that Canada offered him so many opportunities to get ahead, Mr. Kraupner expresses his appreciation by being a strong community booster. For 10 years he was a Jaycee and for the last eight has been a member of the senior Chamber of Commerce. He is a trustee of the Elks' Lodge and has become a self-appointed publicity man for Prince Rupert by distributing to outside points thousands of "dope" capsules containing a list of the city's attractions.

With some nostalgia, he takes a look every now and then at a little certificate he keeps in his desk. Dated 1932, it shows that he completed the course given by the Alberta Institute of Technology and Art in methods of chemistry applied to laundry work. He figures that since then he has come a long way, and none will deny that his pride is justified.

EFFICIENCY OF PLANT
(Continued from page 6)

Cleaners and Laundry is three days. For special rush cases, however, there is a 24-hour service. These become more numerous in the summer as visitors pass rapidly through the city. To handle all the business it is then necessary to put on a night shift. After August, which is the month of peak activity, operations gradually return to a normal level.

As indicated by its name, Ideal Cleaners and Laundry provides two different services. While the laundry is going through its paces, another part of the staff and another set of equipment are handling another type of goods for cleaning.

In this department, one of the first things that meets the eye is a large vat in which articles are cleaned by a dry solvent. Through an ingenious system, the dirty solvent is removed, cleansed and returned to the vat until a glass detection piece confirms that there is no dirt left.

To eliminate all odor, the articles are next placed in a cylindrical machine through which heated fresh air courses under pressure. Later all obstinate spots are removed by a steam gun or chemical. As in the case of laundry, each article in this department is handled according to the type of its fabric. Besides being a means of identification, tags are used to denote special requests such as waterproofing, moth-proofing and repairs.

A finishing touch for form-fitting garments is the application of forced steam from inside which pushes its way through such tricky parts as sleeves and leaves a smooth, fresh cloth. Pleats and other folds of similar nature are handled by the old-fashioned but indispensable flat-iron. In the final phase, the thread and needle go to work if repairs are needed.

In Mr. Kraupner's establishment, spots and wrinkles do not stand a chance. The Ideal Cleaners and Laundry is aptly named.

How to KEEP FIT after 50

In the old days fifty seemed the signal to slow down—take things easy—watch your diet—get more rest. It's still good advice. But these days you can face fifty with many interesting and active years ahead,—active, that is, if you can avoid backache and the "tired-out" feeling, due to kidney and bladder disorders, that often develop around that age. For more than 60 years Dodd's Kidney Pills have been helping men and women of all ages to keep kidneys and bladder in good order,—helping them to feel better, to work better, and get more fun out of life. If you are approaching fifty, or past it, Dodd's Kidney Pills may help you, too. You can depend on Dodd's. 54
