The Human Voice

Since the advent of the radio people everywhere have become more interested than at any time in the past in a study of the human voice. There are so many kinds of voices and they mean so much that they are bound to attract attention. There are radio announcers who feel so proud of their voices that they try to make them express some of the sentiments of music, alternating explanations with illustrative musical selections, mostly of a plaintiff or sleep inducing nature. Some of these voices blend most delightfully with the music and then again others do not. The efforts to make them blend are often most painful to the listener.

In Prince Rupert we are not educating our children to make the most of their voices, either in the playground or in the schoolrooms. Many of the children's voices are loud and raucous. The boys and girls seem to vie with each other to see which can talk the other down. It is most painful to the listener. It is not an expression of joy or delight or even of pleasure of a mild kind. It is simply a horrible habit that will ruin their voices for all time.

The voice has such wonderful possibilities that it seems a pity to spoil it. It can convey sentiments such as contentment, joy, peace, enthusiasm, exuberance and even extatic passion if it is not spoiled by making it habitually loud and discordant in early life.

This Is Normalcy

Roger W. Babson says that business conditions have just reached normal after seven years of crashing downwards and climbing slowly back. This does not mean that we are again up to 1929 which was an abnormal year but that we are back to the average of 1925, 1926 and possibly 1927. As a nation we are that but individually we may not be there. Some have slipped during the depression and others have slipped in the upward climb. Some communities will never recover. The depression gave some people time to get their second wind and renew their efforts, to them it meant only a resting period in preparation for renewed efforts.

In Prince Rupert we are evidently back to normal. Some people are making money, some are losing and others again are about holding their own. We are all hoping that before the end of the year we shall have passed higher than the normal mark for it may be expected that conditions will continue to improve for three or four years but they may not improve as rapidly as we expect if the plans of a number of financiers are carried out and efforts are made to prevent any recurrence of the 1929 period of inflation with its inevitable crash.

WORK AT HOSPITAL

Continued from Page 1

the board to remember this when the new building is under construction as it may be more economical to instal the elevator in the new building with a runway connecting with the present operating room and case room.

'A fleuroscopic table was added to the X Ray equipment at a cost of $378 and has proved a useful addition to the department.

"Spare parts have been purchased, and are on hand, for the automatic stoker in the hospital as a precautionary measure against accident. The iron fireman installed in the Nurse's Home last year has proved itself an economy. Fuel costs are down and the Home has been kept much warmer.

"An electric mixer, hotplate covers, coffee and tea pots have been added to the kitchen equipment during the year.

"J. R. Morrison, the city fire chief, has made monthly inspection of the hospital and a regular test of the fire alarm to the Nurses' Home and has reported everything to be in good order.

"During 1936 the provincial government put its program for fighting tuberculosis into effect. Dr. Large was placed in charge locally and your board offered the co-operatioon of the hospital and of our x-ray equipment at a nominal charge.

"A very successful dance was organized by the Premier Orchestra and a substantial sum was handed to your board as a result. This has been added to the funds for the new hospital building and the thanks of the board were extended to the members of the orchestra as well as to the merchants who so kindly donated the prizes for the drawing.

"A letter of appreciation and thanks was also sent to the Cambrai Chapter, Imperial Order, Daughters of the Empire, for the gift of a very fine overbed table with chromium covered top. A gift of this kind is extremely useful and adds considerably to the comfort of the patients.

Suggestions For 1937

"The following items are suggested for the consideration of the house committee for 1937:—New blinds for the Nurses' Home; better equipment for the private ward trays; a supply of new mattresses and linen; the widening of the doors of the private wards, tenders for which have been called."

ICE HARVEST AT SMITHERS

Big Houses at Lake Seymour And Lake Kathlyn Being Filled

SMITHERS, Jan. 27:—The annual ice harvest is under way now here.

James Capling is filling local ice houses from Lake Seymour with a fine quality of ice of about twenty inches thickness.

Not content with the ice Mr. Capling also sampled the quality of the water in the lake Monday when he received a ducking by stepping onto some thin ice and he was pulled out of the cold water by the men working there at the time.

Charles Wilson will start shortly with the work of filling his large ice houses at Lake Kathlyn. He will put on the regular crew of men to work on this job which will take him a couple of weeks.

"Any woman can catch a man, but very, very few know how to manage him when caught."

So said Rudyard Kipling, who thought himself "learned about wimmen." But nowadays, there's more than just managing him. There's keeping him caught! A housekeeper may be paid, but you can't pay a wife to be interesting.

"Feed the brute"—that's another way; comfort, mental as well as physical, at home; "two pairs of feet on a fender" before a good fire. But every woman knows these things!

And when it comes to a good fire, there's nothing like Albert & McCaffery's coal. For twenty years it has been the best available. It is the best today. And if better could be got, we would have it. It gives you the most heat for the least money—and that's what you want.

So, the next time you need coal, just phone 116 or 117 to Albert & McCaffery and order Nanaimo-Wellington for furnace and heater; Alberta-sootless for the kitchen range.

You deserve the best!
