PASSES AT SMITHERS

Edward A. Peterson, Railway Fireman, Succumbs To Heart Attack

SMITHERS, May 8:—The death occurred suddenly from heart failure in Smithers on Saturday evening of Edward A. Peterson. Mr. Peterson was a locomotive fireman in the employ of the Canadian National Railways. He had not been in good health for some time but was around town all day Saturday as usual. He had stopped at the house of a friend early in the evening when he complained of feeling very weak. A doctor was called but he passed away shortly afterward.

Mr. Peterson leaves his wife and family in Smithers where they have resided for the past few years.

The funeral was held on Tuesday afternoon.

MENNONITE MIGRATION

Party Of Ninety-Nine Take Up Cheslatta Lake Land

SMITHERS, May 8:—A contingent of 99 Mennonites arrived in Burns Lake on Tuesday's train from Alberta to form a settlement in the Cheslatta Lake district between Francois and Ootsa Lake and about 25 miles south of Burns Lake.

Men, women and children, they have about 20 cars on the train to accomodate themselves, their stock and equipment.

This is quite an important addition to the farming population of the Burns Lake area.

STEWART

Construction of an airplane float at Hyder has been commenced. It will be somewhat similar to a float which was installed at Stewart a few years ago.

The first softball game of the season between Big Missouri and Stewart was played last Sunday. A softball circuit, also including Stewart, is to be operated this summer.

Dr. C. H. Hankinson of Prince Rupert paid a visit to the Stewart Masonic Lodge last week in his capacity as district deputy g and master. He was taken on a tour of Portland Canal mining operations with which he was much impressed.

Archie McPhail, pioneer mining man of the Portland Canal and Alice Arm camps, was found dead at Alice Arm a few days ago. He was seventy-two years of age and was one of the best known prospectors and miners of the north. His death occurred under tragic circumstances.

Arthur Noble left last week on his return to Vancouver after having relieved W. G. Broad, customs officer at Stewart, while the latter was on vacation.

A. J. Edlund, construction foreman for Government Telegraphs, left Stewart last week on his return to Prince Rupert after a visit there on official duties.

Several of Stewart youthful pianists presented a program which was an outstanding feature of a tea held last week by the Women of the Moose at Stewart.

RECALL KINGSFORD-SMITH

SYNDEY, Australia, May 8: (CP) —The Southern Cross, plane in which the late Sir Charles Kingsford-Smith pioneered many air routes, lies neglected in a hangar here. The property of the nation it is too big for any museum.

GAS-TEST TIME IN WAR ZONE

French soldiers, wearing their gas masks, leave a gas chamber after a gas test in the French war zone. Poison gas hasn't been used in the war with Germany to date, but there is always the chance that the enemy may lay a barrage of it at any time.

Whifflets From The Waterfront

New Oil Plant on Local Waterfront Almost Finished—Large Cannery Camp Being Built

The new oil plant of J. H. Carson Co. Ltd., another imposing local waterfront structure, has now been almost completed as far as building work is concerned and it will not be long now before the plant will be operating there. The building is a large two-storey one complete with boiler plant. The site is just this side of the Imperial Oil Co. dock on the lease formerly held by C. C. Ketchum which also contains the old Prince Rupert Shellfish Co. plant more recently used for salmon curing by the Prince Rupert Fishermen's Co-operative.

John Currie & Son have under construction in front of the old Prince Rupert Shellfish Co. plant a fine new cannery camp float for B. C. Packers. The float, containing large store quarters, net rack space and other appurtenances of a cannery camp, will be stationed at Minktrap Bay on the West Coast of Banks Island where salmon fishing activities during recent years have become more extensive, the Canadian Fishing Co. also operating in that area. The new camp, measuring about eighty by fifty feet, will be completed in about a week or ten days' time, it is expected.

George Bryant and son, Jim, had a real funny feeling Sunday evening when their well known power cruiser Harla, upon which they were working, lost balance on the Prince Rupert Rowing & Yacht Club cradle. Fortunately, the lines held and what might have been a rather serious accident was averted. Later in the evening the vessel was refloated on the high tide and went back to her berth.

Hull work in connection with her annual overhaul having been completed, C.N.R. steamer Prince Charles was removed from the pontoons of the local dry dock the latter part of last week and is now tied up at the pier again. With heavy tourist traffic assured and much activity in logging and salmon canning on the Queen Charlotte Islands anticipated, the Prince Charles will have a busy summer this year and it will probably be necessary to press the Prince John into service to assist her with the traffic.

Launching of a new 60-foot halibut boat for Einar Peterson and Stanley Sagstad took place at Salman Bay, Seattle, yesterday afternoon. The vessel is named Susan for the daughter of Peterson, formerly of the Oceanus. The vessel has a 120 h.p. Fairbanks-Morse diesel engine.

The International Fisheries Commission announces halibut landings at all ports on the coast from all areas this April as slightly less than one million pounds of an increase over the same month of last year. The total this April was 7,806,000 pounds as compared with 6,824,000 pounds in April 1939. The increase was equally divided between Area No. 2 and No. 3 and was due to the greatly increased size of the fleet. The individual boat catches of the Seattle fleet were two-thirds of what they might have been brought in under the voluntary curtailment plan.

Three halibut vessels sold catches at Seattle yesterday totalling 64,000 pounds at an average price of 9¾c. The sales were: Martindale 40,000 pounds, San Juan, 9⅝c; Thelma II., 10,500, Washington, 10¼c and 9c (1000 pounds mixed cod, 3c) Yaquina, 13,000, Whiz, 10⅛c and 9c.

C. N. R. steamer Prince George, Capt. H. E. Nedden, arrived in port at 10:15 this morning from Vancouver, Powell River and Ocean Falls and sailed this afternoon for Ketchikan and Stewart whence she will return here tomorrow evening southbound. The vessel brought north a good-sized passenger list as well as a substantial freight cargo.

Five thousand Prince Rupert people read the Daily News. It pays to let them know what you have to sell.

TIRED and ACHEY

Sluggish kidneys may be to blame. Gin Pills help eliminate toxic wastes that tend to slow up kidney action. In the United States ask for "Gino Pills".

Civic Centre Committee To Stage Big Carnival This Fall To Raise Funds For Community Project

The central committee representing the Prince Rupert Gyro and Rotary Clubs and Junior Chamber of Commerce in connection with the local community centre project is about to institute its drive for funds for the project. Publicity and canvass committees are being appointed and it has been decided to stage a carnival of a few days' duration in August to raise funds for the project. Robert Parker heads the publicity committee and Gordon German the canvassing committee.

The civic centre committee, of which Dr. Large is chairman, continues undiminished enthusiasm and is confident of success in the big undertaking of raising the $25,000 which it is estimated will be necessary to finance the project.

Whether or not the city is to obtain the civic centre will depend on the success or otherwise of the drive which is about to be launched.

Inspection Of Booth School

Ratepayers' Association Asking That It Be Examined From Structural Standpoint

The Prince Rupert Ratepayers' Association, which has been active recently in connection with a number of municipal problems, is, in addition to asking for complete repeal of the zoning bylaw as being unsuitable to local conditions, seeking a thorough inspection from a structural standpoint of the Booth Memorial School building.

SMELTER SHIPMENT

SMITHERS, May 8:—A shipment of 40 tons of ore came down from the Duthie mine last Saturday for shipment to the smelter at Trail. This shipment is being made by Messrs. Kellie & Harper, owners of the Duthie property. Several shipments made before all yielded good returns.

Twelve tons of concentrate and twenty-eight tons of high-grade ore make up this shipment. Many samples from the ore show a great deal of silver and it is expected that there will be some high returns for enterprising men who are owning the property.

About half a dozen men have been employed on the property. There are now about twenty including the families, now living at the Duthie camp.
