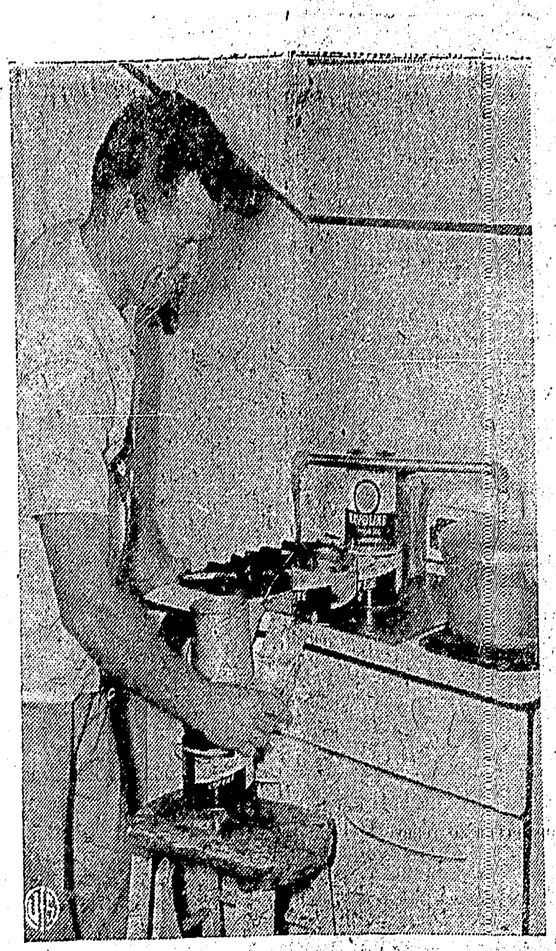
ANCIENT HOARD

Thousands of fossils of ancient animals have been recovered from Rusinga Island in Lake Victoria, East Africa.



DE-SALTING WATER IN TEXAS — A Dallas fireman, Davis B. Hilton, demonstrates his new water-distilling gadget in the kitchen of his home. His homemade machine turns out the purest water in his part of Dallas, where fresh water is scarce. Here's how it works: in a pressure cooker, the hydrant water vaporizes and passes as steam through the copper tubing. Then, inside the coffee can, it is turned back to pure water, the salt grains remaining behind in the cooker. Ordinary tap water in additional cans is used to cool and condense the steam. The pure water is drawn off in a glass and the cooling water drained off into an old coffee pot. He gets a gallon every 30 minutes.

Septic Tank Regulations Now Available

Regulations and specifications for the type of concrete septic tank approved for installation in the city are available at City Hall, J. C. Ewart, city building inspector said yesterday.

The type of tank has been approved by the Department of Health and adopted by the City of Prince Rupert.

Mr. Ewart, along with sanitary inspector for the Skeena Health Unit, R. G. Scott, advised that where a lot is not serviced by a sewer, soil conditions must be examined by both the building and sanitary inspector to determine its suitability for septic tank disposal.

Persons putting in septic tanks will be advised to the best location for the tank and disposal field and inspection of all installations is called for prior to backfilling, Mr. Ewart said.

Under city regulations steel septic tanks are not permitted and wooden septic tanks will be allowed only when sewers are assured within a specified time and only then when permission is given by superintendent of works C. J. Gustafson.

LARGE RESERVES

Chile is estimated to have the largest known copper reserves in the world.
