T. P. L. "Barney" Mulvany Honored on 80th Birthday

(Special to The Daily News)

BURNS LAKE—When T. P. Lyster (Barney) Mulvany of Burns Lake celebrated his 80th birthday on Thursday, May 17, greetings and good wishes were received from all across Canada and the United States, as well as a number from England, including cards from the owners of the Wild Lands at Ootsa Lake, now living at Hythe, Kent.

A great many friends called in during the day to give Barney their birthday greetings in person and in the evening a birthday party was held at the home of Mr. and Mrs. W. G. Mummery. Other guests were Mr. and Mrs. Percy Reynolds. Mrs. Reynolds, the former Betty Clarke, is the daughter of Bill Clarke, one of Mr. Mulvany's oldest friends, who helped build the first telegraph line through to the Yukon, and whose home at Forestdale was one of his favorite stopping places on his pack train trips up from Quesnel.

Mrs. Mummery's parents, Mr. and Mrs. John Keefe, of Francois Lake, were unfortunately unable to attend. They are also old-timers who have known Mr. Mulvany for many years.

Mr. Mulvany conducted pack trains through the Omineca district years before Burns Lake was established. The year after the railroad was built, he set up the first hotel in Burns Lake, a large tent on a board frame, near the present railway station.

As expansion became necessary, he added more tents, and later built a wooden hotel surrounded by cabins.

A few years ago, he resigned his position as stipendiary magistrate, but continued to act as a notary public until just recently.

Scouts Enjoy Digby Camp

Thirty-six Boy Scouts and three leaders returned yesterday afternoon from Digby Island after a successful three-day camp at Casey Cove.

Scoutmaster Jim Waite, who was in charge of the camp, said the Scouts took part in an extended hike across the island, tracking practice, tree-felling and bridge building. During Saturday's warm weather the boys enjoyed swimming and most of them got the start of good tans.

Yesterday during the rain they were able to take advantage of the many buildings at Casey Cove and the rain failed to dampen spirits.

Bungalows by Burro

The United Nations estimates that 150 million families in underdeveloped areas lack adequate housing.

One answer is a frameless, build-it-yourself house designed by Canadians of Canadian aluminum. It needs no foundation; is non-corrosive and verminproof; is so lightweight that it is packed in cartons easily carried by plane, jeep or even burro.

The Colombian government has ordered 3,200 of them to help relieve the shortage of rural housing in that South American country. So it's not surprising, with aluminum travelling so far and doing so much, that Alcan is again increasing its smelting capacity in both Quebec and British Columbia.
