WEATHER OUTLOOK of most of Canada is for hot weather to continue during the next 30 days according to this map prepared on the basis of the United States Weather Bureau long-range forecast. Most of central Canada will have normal or above-normal temperatures while the west coast will have below-normal weather. Above map by courtesy Toronto Star. (CP Photo)

Hurricane Threatens Nova Scotia

By The Associated Press

Hurricane Connie, her winds swirling over 500 miles of open sea, moved northward in the Atlantic today and posed a direct threat to Nova Scotia.

The powerful storm, with winds of 135 miles an hour near the centre, was about 450 miles off the Florida coast this morning, driving steadily toward the north at 10 to 12 miles an hour.

The threat to the south Florida coast was passed, but forecasters won't predict the storm's future path.

A strong high-pressure area moving eastward across the United States lies ahead of the big, burly hurricane, and the forecasters hope this might block Connie's forward movement.

MISS UNIVERSE, Sweden's Hillevi Rombin, shown above displaying the skill that won her fame as a top gymnast, has started her film career. She has a six-word speaking part in a film about clarinettist Benny Goodman. Her speech! "Just one more, please, Mr. Goodman." She ran through the scene yesterday after only one rehearsal — fewer than average for a beginner, said Hollywood studio old-timers. Miss Rombin, who speaks English and four other languages, was cast in the role of an autograph-hunting American bobby-soxer in "The Benny Goodman Story."

A YOUNG MOOSE from the Quebec zoo at Orsainville is fed a bottle of milk aboard the liner Maplecove as it is shipped to London, England, zoo. The moose, being fed the milk as part of his special diet to ward off sea-sickness, is one of three being shipped to London zoo in exchange for two camels. (CP Photo)

TURPIN'S TAVERN TO GO

PLAISTOW, Essex, England (AP) —The Green Gate, a 325-year-old tavern said to have been patronized by highwayman Dick Turpin, is to be pulled down. It was badly damaged by a bomb during the war and will be replaced by a new building.

South Africa's total gold output increased to 13,237,000 ounces in 1954 from 11,911,000 in 1953.

Russians Describe Atomic Plant

GENEVA (AP) — The Soviet Union told the atoms-for-peace conference today that its first small commercial atomic power plant promises to provide electricity for areas remote from coal supplies.

But the Russians conceded that their nuclear power now costs "considerably" more than the output of large Soviet stations burning conventional fuel.

"An atomic power station now is already more profitable than a coal station in regions situated far from coal mines or than coal stations operating on low-quality fuel," Russian scientists D. I. Blokhintsev and N. A. Nikolayev said in their report to the 72-country congress sponsored by the United Nations.

Three United States scientists also held out promise for remote areas with a paper disclosing development of a new "boiling water" atomic process. They described it as "an important step toward the economical production of nuclear power."

The American experts, from the Argonne laboratories in Illinois, said their process involves generation of the steam for the turbines inside the reactor rather than in an external boiler. The boiling inside the reactor previously had been considered unsafe, but the report said this has been disproved.

Small plants using this process would be "suitable for use in remote areas or in conjunction with mining or manufacturing operations."
