Here's another attractive

MAGIC MENU

Look for this mark on every tin. It is a guarantee that Magic does not contain alum or any harmful ingredient.

Most women find it difficult to think up new ideas for attractive menus . . . This one, suggested by Miss Katherine M. Caldwell, cookery authority of Canadian Home Journal, Toronto, is therefore sure to please.

LUNCHEON MENU
Cheese and Vegetable Soufflé with Cream Sauce
Buttered Whole Wheat Toast
Sweet Pickles
Hot Raspberry Biscuits*
Chase & Sanborn's Tea

For afternoon tea, there is nothing nicer than these same Raspberry Biscuits, shaped daintily with a tiny cutter—split, buttered and served piping hot, with a cup of perfect tea!

Miss Caldwell says: "Magic Baking Powder is easy to use because its uniform, high quality never varies. I use and recommend Magic because my experience has proven that it always gives consistently better baking results."

Try Miss Caldwell's Recipe for *RASPBERRY BISCUITS

2 cups flour
4 teaspoons Magic Baking Powder
½ teaspoon salt
2 tablespoons sugar
4 tablespoons shortening
⅔ cup milk
Tea-cubes of sugar
Raspberry juice or syrup

Mix and sift the dry ingredients. Cut the hard, cold shortening into them with a knife, using a quick, short, chopping motion; or reduce the hard cold fat to tiny particles with a pastry blender or a steel-pronged fork. When the mixture resembles a very coarse meal, add the liquid, mixing quickly and lightly.

Turn out the dough on a slightly floured board; pat it down lightly or roll it to a thickness of about one inch. Shape with a small cutter or cut in squares with a floured knife.

Dip the small lumps of sugar into syrup from canned or fresh raspberries . . . Press a lump into each biscuit . . . forcing it well down into the dough so that it will not run down the sides when melted.

Place the biscuits on a greased pan or baking sheet and bake in a very hot oven, 450° F., 12 to 15 minutes.

MAGIC Baking Powder ensures better baking results

NEWS OF THE MINES

AROUND PRINCE RUPERT

Big Missouri Expected to Develop Into Big Gold Producer—Development of Telkwa Coal Mine—About Premier Affairs

It may be reasonably concluded, from the fact that a pilot mill has been erected on the property by the Consolidated Mining & Smelting Co., that there is a good chance of the Big Missouri eventually becoming a producing gold mine. The deposit is a low grade gold ore carrying appreciable but, at present, valueless amounts of zinc. The values are obscurely and irregularly distributed and cannot be satisfactorily outlined by ordinary sampling methods. It was for this reason principally that the sampling mill has been established on the property. There has been much activity in Big Missouri stock recently and it has been making heavy gains.

Under the direction of F. M. Dockrill, there is now a well equipped camp, accomodating more than a dozen men, at the Bulkley Valley coal mine up Goat Creek near Telkwa. There is a bunker that holds 300 tons of coal and operates on a gravity system. From the mine to the railway, a distance of some seven miles, a good road has been provided. In the mine itself there is a 13-foot seam of high class steam coal which may also be used for domestic purposes. The development of the mine consists of two tunnels about 20 and 250 feet long and eight or ten feet wide with the full 13-foot height of the seam. A connection has been made so that ore cars may travel into the mine In one direction and out in another. Up to now only about a dozen men have been employed but it is expected that there will soon be a considerable increase. Next fall, it is expected mining will be carried on in a large way. The Bulkley Valley coal property is two miles square. A few days ago there were 100 tons of coal in the bunkers. Mr. Dockrill visited Prince Rupert a few days ago with a view to developing a market here for his coal.

Shareholders of the Premier Gold Mining Co. Ltd., who may have expected that some information on the company's affairs would have been given with the dividend payment in January, in view of the reduction in the dividend rate from 6c to 3c, were disappointed as no letter accompanied the checks. Dr. J. T. Mandy, resident mining engineer ,however, in his preliminary report for 1930, comments as follows on Premier operations: "This company has operated continuously. Earnings are naturally affected adversely by the low price of silver. New ore is being picked up from time to time in small shoots lateral to the main zone between No 2 and No. 3 levels. Development of the sixth level ore shoot has been steadily carired on. This shoot is characterized by irregular silification and erratic values. Improvements in the mill that promise increased efficiency have been worked out. Intensive search for new lateral ore bodies has been carried out with three diamond drills on the higher altitude ground east of the main ore zone." Official announcement has been made that the Prosperity mine, in which Premier hold a 76% interest, made a net profit of $209,021 in the 13 months of its operation up to November 3 last. In November profit was $16,884 with gross smelter value of $42,430 and production costs of $25,767.

SHIPMENT OF TOTEMS

Transaction Said to be Regular Yet Native Relics Are Being Held Up

Interviewed in regard to a recent shipment of totem poles from Prince Rupert to New York, delivery of which has been intercepted by the government, W. E. Collison Indian Agent here, stated that the two poles were secured from the Naas River Indians by permission of the Indian Department. Dr. C. Marius Barbeau of the archeological department at Ottawa had secured the sanction of the Superintendent-General of Indian Affairs , Dr. Scott, to ship two poles to the museum of the American Indian at New York. They had been purchased from the natives on the Naas River over a year ago and arrived here last November. A week or two ago they were shipped and the transaction is said to have been perfectly regular.

Mr. Collison stated that the law provided that no poles were to be shipped out of the country except by the permission of the Superintendent-General. This permission was secured by Dr. Barbeau It was his (Mr. Collison's) duty to see that the law was enforced and there was nothing illegal about the matter.

A third pole was to have been shipped to the Toronto Art Gallery but it had not yet arrived from the Naas.

The poles were ordinary Indian totems.

The local railway freight agent stated that he had no knowledge of totems being shipped from Prince Rupert.

Mrs. G. E. Gulick was winner of first prize in bridge last night at the fortnightly tournament of the Ladies of the Royal Purple. Mrs. C. C. Marshall had the low score. In whist, Capt. J. J. Mulligan had the high score and Mrs. H. Skattebol, low.

Mrs. Angelo Astori was convener for the evening assisted by Mrs. H. A. Ross and Mrs. Tom Caroff.

Union steamer Camosun, Capt. James Findlay, returned to port at 11.30 this morning from Anyox Stewart and other northern points and sailed at 1.30 this afternoon for Vancouver and waypoints.

Twenty Years Ago

In Prince Rupert

January 27, 1911

Prince Rupert workers, at a crowded meeting, unanimously passed a resolution to the effect that a committee should go before the city council and demand 45c per hour for common labor on city work. The meeting opened with a stirring rendition of "The Red Flag."

Painters are now busy in the new school building on Seventh Avenue. The building, within a few days, will be ready for occupancy.

The American steamer Cottage City arrived from Alaska and, after a brief stay, proceeded to Seattle.
