Progress---Petty Officer Evans Died Jan 17th.

land, regarding the ill-fated British Antarctic expedition party under Captain Scott. The records

which have been found show that after leaving Petty Officer Evans on January 4, 1912, Scott

and his party marched an average of twelve miles daily and reached the pole on January 17th.

Scott's observations by theodolite on January 18th fixed the pole within half a mile of Amund-

sen's observations. Scott's party followed Amundsen's tracks and found his camp within three

much anxiety to the party, but good progress was made on the return trip over the great plateau

during medium weather. The descent of Beardmore Glacier was accomplished during thick

delay. The surplus food was consumed and Evans died January 17th. Bad ice and illness of

Captain Oates further hampered the progress, sometimes only three miles a day being made.

Then came the blizzard which caused the death of the remainder of the party. A searching

party found ten bodies half covered with snow on November 10th. A cairn of snow with a cross

was erected over them and a brief record attached. Dr. Atkinson declares that there were no ap-

### GLACIER CREEK BORE IS PROGRESSING

During January-Twenty Men on Pay Roll.

Referring to mining activity in and around Stewart, the Portland Canal Miner says:

"Notwithstanding the loss of ten shifts out of the sixty-four for the month of January, the big bore being driven under Glacier Creek by the Portland Canal Tunnels, Ltd., penetrated the hill 209 feet during the first 13 days of the year. On the 31st ult. the tunnel measured 392 feet from An Enthusiastic Annual Meeting the starting point, and General Manager W. J. Elmendorf, who left on Thursday for Victoria, expected that an average of over two hundred feet a month would An enthusiastic meeting of the be easily maintained. The loss held on the evening of Tuesday, in ventilation, but this has now feet of ten inch ventilation piping that has been manufactured Hon. Pres.-Rt. Hon. Sir Wil- locally by T. W. Falconer. The two shifts are now breaking thirteen holes to a round, being 7.6x8 feet, and, according to the manager, the rock is excellent to work in. Three additional waste cars of twenty cubic feet capacity have been ordered. So far there has been ample water to supply The general tone of the meet- power for the compressor plant. in the fall before the work will system, the object of the under-

### MINING OUTLOOK IN STEWART BRIGHT

Be a Hummer.

That things are quiet in min-

ing circles in the Portland Canal district at the present time cannot be gainsaid and there are probably as may Stewartites in Prince Rupert at the time of writing as there are in the little lie and the reason underlying the mining burg itself. However, this fact is no criterion of the coming extinction of the camp. As a matter of fact, the prospects are extremely bright for the comis possible to settle all disputes ing season. The latest arrival from Stewart, Mr. George R. Bruggy, upon being interviewed quiry into the dispute and take this morning was most cheerful the necessary procedure to bring and optimistic and evinces absolute faith in the future of the mining business, especially in Ray relation to rich quartz deposits stated that he could not see why known to exist on the Salmon River. He himself is heavily interested in mining property and has just sent down another shipment of ore samples to the Vancouver Mining Club. Included in these are specimens of the ore found at the recent rich strike on Dan Lindeburg's property, known as the Seven Mile group, also free gold samples from Pearson & Peterson's property at Eight Mile. Both of these are located on the Salmon River, which runs into the Portland Canal about a mile below Stewart. There is no question but that the future of this district is assured, time being necessary, however, to accomplish the preliminary work, the excessively heavy snow fall and glacial formation being a severe handicap to initial development. Mr. Bruggy predicts a large influx of mining men and others this coming spring. The extension of the Canadian Northeastern Railroad to the Groundhog district is confidently looked for-
