A MESSAGE:

This home inspection blank is for use by school children. Your home should be a safe place in which to live. Your parents can help you inspect your home and also assist you in answering these questions. If the answer to any question is "YES", color the square RED that has the number of the question in it. If any question does not apply to your home, color its numbered square anyway. When you are done, the uncolored squares will stand out and show which fire or accident hazards in your home need correction.

1. Have your parents explained to you ALL of the ways by which you could escape from ANY room, day or night, if fire should break out and you should smell smoke?

2. Is the phone number of the Fire Department posted prominently near your telephone? 3. Do you know where the nearest city fire alarm box is and can you operate it?

4. Are all the electric fuses (except the main fuses) smaller than 30-amperes in size? 5. Are all electric cords to lamps and appliances in good condition, unfrayed, with unbroken connectors on the end that plugs into the wall outlet?

6. Are all electric light bulbs so arranged or guarded that they can never touch any material and set it on fire?

7. Is your TV set always kept a few inches away from any furniture or draperies so the heat coming out from it will not set them on fire?

8. Do all ashtrays hold cigarettes firm enough so they cannot fall onto the rug while unattended? 9. Is smoking in bed or while lying down elsewhere not allowed at

10. If your home has a fireplace, does it always have a closed spark screen in front of it when the fireplace is used? 11. Does your home have a door between the basement and the first

floor and is it always closed at night? 12. Does your home have any fire extinguishers and are they fully charged, ready for use at any time?

13. Are all heated devices such as the furnace, water-heater, etc., connected to a chimney by a well supported substantial metal smokepipe? 14. Has someone inspected your furnace and chimney for cracks, leaks,

or clogging within the last year? 15. Are the walls, floor and ceiling protected where they are fairly close to a heating stove, furnace, kitchen stove or smokepipe? (Con-

crete floors do not need protection.) 16. Is the attic and basement storage neatly arranged or packaged and is all the household trash removed every week?

17. Is all gasoline or kerosene kept outside the home and is it in strong, metal cans with every opening always kept tightly closed?

18. If paints are stored in the basement or garage, are these containers always kept tightly closed?

19. Does mother keep her oil mop in a metal can or hung up off the floor in an open place? 20. Do your parents carefully instruct any baby-sitter on what to do in emergencies?

21. Do you know what to do if the clothing of a playmate catches on fire?

22. Is all soiled apparel sent out to a dry cleaner or is cleaning done at home by mother using ONLY non-flammable types of cleaning fluids?

23. Are your Xmas tree lights in good condition—is there an Underwriters' tag or label on 24. When party or holiday decorations are used in your home, are they flame-proofed be-

fore they are hung up? 25. If the lot next door is vacant, have all weeds and rubbish been removed?

26. Does your home have a complete first-aid kit—can you use it?

27. Are all medicines and household chemicals stored so children cannot get their hands on them?

28. Do you or your parents know how to perform artificial resuscitation or mouth-to-mouth breathing?

29. Is the phone number of your family doctor posted near your telephone:

30. Are all guns and ammunition securely locked up so no one can get them out and play with them? 31. Is it impossible for anyone using the bathtub to reach out and touch any electric outlet, switch, light or radio that might give them a

32. Does mother always turn cooking utensil handles inward so they

cannot be reached by little children? 33. Does mother always use a non-slip floor wax for polishing floors?

34. Are all ladders in good condition and are they used instead of standing on a chair to reach things? 35. Are all window screens securely fastened so no child can fall out of

the window if one gives way? 36. Are all stairways well lighted, with stair treads in good repair, and

do they have handrails? 37. When you are done playing, do you always put your toys away so

no one can trip over them and get hurt? 38. Do all small throw rugs in your home have non-slip material fastened or applied to their undersides?

39. Does mother throw away all flimsy plastic cleaner's garment bags so children can never play with them?

40. Are all garden tools in the garage stored so that children cannot bump into their sharp edges?

41. Are all dad's power tools so stored that children cannot operate them or cut themselves on them? 42. If there are any abandoned wells near your home that are not safely covered or any abandoned refrigerators with their doors and latches

still on them, have your parents told the police about them? 43. If trash is burned outdoors, does some adult stay at the fire until it

is entirely out so children cannot play around it or its hot ashes? 44. Are old newspapers and magazines kept in cartons or tied into bundles and are they disposed of regularly?

45. Does your bicycle have a bell, electric light and rear reflectors and is it in good usable condition?

This blank was prepared as a public service to schools by the Federation of Mutual Fire Insurance Companies of Chicago, Illinois.
