LIFE-SAVING GROWTH of British Columbia's uterine testing program for women is demonstrated by Dr. H. K. Fidler, Director of the Cytological-Diagnostic Service at the B.C. Cancer Institute. As a result of this early detection program, which checked 93,746 tests from B.C women in 1961, the incidence of invasive, or adwanced, cancer of the cervix among the province's women is down 31 per cent.
