Firostina survivors live death partnership

PHILADELPHIA (4) — To this yet they ignore the threat. One day the 90,000 survivors of the psychological mechanism used Hiroshima atomic bomb live in is denial --- the refusal to think sort of partnership with about threatening or disturbing death, a psychiatrist says.

They feel: "I almost died, 1 should have died. I am not wholly alive."

That was the report Thursday of Dr. Robert Liston of Yale OTTAWA (P)—Business failures

His report came with others Bureau of Statistics said today. from a panel of researchers analyzing how Americans are responding to the threat of nu-|sons were injured in traffic acclear disaster.

Dr. Lifton told a session of couver. Police say 37 persons the American Association for were injured in the seven days the Advancement of Science that ending Boxing Day compared the Hiroshima survivors—called with six dead and 77 injured the Hibakusha, or those who last year. were exposed to the bomb—ex-1 perience a continuing encounter. with death.

Three to four weeks after the bomb, apparently healthy people began suffering from radiation sickness and dying.

This brought a shocking realization that the bomb had changed their bodies. Victims! began to bleed in the skin and internally. Some lost their hair. Years after — in the period 1948 to 1952—there was an increase in leukemia among those who had been close to the centre of the blast.

Dr. Lester Grinspoon, Harvard medical school psychiatrist, said Americans are living in a time when their lives are threatened,
