CAPABLE OF HANDLING GRAIN FASTER than any other similar structure in the world, this new port of Montreal grain elevator is scheduled to be opened this spring. Designed by C. D. Howe Co. Ltd., it cost \$16.000,000 and is part of the port's \$130,-090,000 improvement program. The elevator is one quarter of a

mile long 232 feet high and can hold 5,500,000 bushels. It can unload a giant grain-carrying laker of 1,000,000 bushels in less than a day. At the same time an ocean freighter can be filled at another part of the elevator. -- CP Wirephoto
