HAZELTON MINING NOTES

Excellent progress is being made with the organization of the New Hazelton District Mine Owners' Association. The membership committee is now busy completing it and scans and on Tuesday evening of next week the plans will be perfected and the actual work got going at full speed. As far as the membership committee could ascertain the entire district was enthusiastically in favor of the movement and it is now only a matter of collecting the funds to launch the work.

Word has been received from R. P. Tremble, who has spent the summer in and around Port Wells in south east Alaska, that he was coming to New Hazelton before snow flies to look over the mining properties. He intimates that he is ready to take up the development of another group.

J. W. Stewart left Thursday after spending a few days in town in the interests of his firm. While here he paid a visit to the Silver Standard mine on Glen mountain in company with D. McLeod. The big improvement in the drift on the No. 3 vein was very gratifying to him and he stated that every effort will be put forth to bring the mine around to a permanent producing property.

Duke Harris reports that they are taking the best ore out of the mine this week that has yet been struck. They are working in a

drift to the north from the shaft on the hundred foot level.

It is reported from the operators at Howson Basin that they have struck a twenty-one foot seam of commercial coal on the property where Messrs. Jefferson, Beaudette and Dockerill have been working all summer. This coal, it is generally understood, is for the Grand Trunk Pacific, and the striking of the big seams of commercial value is one of the most important strikes made this season. The entire northern interior will receive great benefit, but the district surrounding will be particularly benefited. It is also generally understood that several good big seams will be proved in the same district.

"Every miner at the Silver Standard now is working in ore, and by the time sufficient snow has fallen to make sleighing possible from the mine to New Hazelton, Superintendent Haskins will have one or two train loads of high grade ore ready to go to the smelter," said H. W. C. Jackson on his return from a trip of inspection to that property.

The showings of ore on the surface of the three veins, which have been opened to depths of 250 to 300 feet, are most impressive because of their width, continuity and richness. All three veins are much wider on the lower levels than they were on the surface, and wherever ore has

been encountered at depth it has proved to be of equal richness with that found in any of the levels above. The best ore is an intimate mixture of galena, zinc and grey copper in a quartz gangue, and the highest values are usually obtained when the black jack predominates.

A new strike of hundred dollar ore was made recently by Frank Brown and James Dean on Rocher de Boule Mountain and on the New Hazelton side. The boys state that while they have not made any particular investigation the indications are that it will prove one of the biggest producers in camp. They have six claims and have named it the Chicago group. The first assays gave 70 ounces in silver, 12 per cent. copper and \$5 in gold.—Omineca Herald.

Government Elevator at Port Arthur

Port Arthur, Sept. 3.—The Dominion Government grain elevator at Port Arthur is nearing completion, and from present indications will be able to handle grain by September 20. The structural work is nearly completed and most of the machinery is on the site and is now being put in place.

Hunters who were out Labor Day report the shooters so numerous that it was scarcely safe to be in the bush. It is reported that one young man had his hat shot off.

John McRae, E. J. Hicks and T. Marks returned Monday night from a two days' hunting expedition up Denis Arm. They succeeded in shooting three nice deer.
