Much valuable education can be and is being conveyed in an interesting manner by the movies shown at the three local houses. In striking contrast to the thoughtfully clean and instructive picture shows they present is the above, which will probably never pass the provincial censor.

Many a September purchase is really decided in July.

Many a woman is gathering information to-day that will influence her selection of a stove two months hence.

Many a man is thinking right now about the store he will patronize for his Fall suit and overcoat.

Many an October piano purchase is really determined on the porch of a summer hotel or home in August.

How unwise, then, to put off the Advertising of these and

similar articles until the actual time of their use arrives.

One advertisement seldom makes a sale. It is the repeated impressions created by Advertising that develops purchases by a discriminating public-and these impressions are seldom built up in a day, a week or a month.

Yet some manufacturers and merchants still procrastinate until the first nip of frost is feltand then besiege the public with belated announcements of Fall clothes, kitchen ranges, home furnishings, winter underwear, and other articles usually purchased in the Fall.

Purchased in the Fall—5h, yes—but decided upon in the Summer. Decided in favor of the goods that are continuously advertised.

It's the Advertising read in July that bears fruit in September and October. For to-day's impressions inevitably lead to to-morrow's sales.
