

IN THE SUPREME COURT OF BRITISH COLUMBIA.

IN THE MATTER OF THE WINDING UP ACT, BEING CHAPTER 144 OF THE REVISED STATUTES OF CANADA AND AMENDING ACTS AND IN THE MATTER OF THE PRINCE RUPERT FISH AND GOLD STORAGE COMPANY, LIMITED. Notice is hereby given that the liquidator of the above named company, limited, by order of Mr. W. E. Burritt, district registrar of the Supreme Court at Prince Rupert, B. C., of the 24th day of November, A. D. 1913.

WILLIAMS & MANSON,
Solicitors for the said Liquidator.

CERTIFICATE OF IMPROVEMENTS.

Ground Hog, Mountain Goat and Eagle mineral claims, situated in the Skeena Mining Division of Cassiar District.

Where located: About six miles back from the mouth of Falls Creek, Goose Bay, Observatory Inlet.

Take notice that I, Wm. T. Kergin, Free Miner's Certificate No. B43339, acting as agent for George Rudge, Free Miner's Certificate No. B33997, P. C. Coates, Free Miner's Certificate No. D 72539, and Wm. T. Kergin, Free Miner's Certificate B43339, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claims.

And further take notice that action under section 37, must be commenced before the issue of such Certificate of Improvements.

Dated this 24th day of September, A. D. 1913.

CERTIFICATE OF IMPROVEMENTS.

Platnam mineral claim, situated in the Skeena Mining Division of Cassiar District.

Where located: About six miles back from the mouth of Falls Creek, Goose Bay, Observatory Inlet.

Take notice that I, Wm. T. Kergin, Free Miner's Certificate No. B43339, acting as agent for Wm. R. Lord, Free Miner's Certificate No. B70101, and P. C. Coates, Free Miner's Certificate No. D77629, intend, sixty days from the date hereof, to apply to the Mining Recorder for a Certificate of Improvements, for the purpose of obtaining a Crown Grant of the above claim.

And further take notice that action under section 37, must be commenced before the issue of such Certificate of Improvements.

Dated this 24th day of September, A. D. 1913.

Skeena Land District.—District of Coast Range V.

TAKE NOTICE that Hume Cronyn, of London, Ontario, occupation manager of a Trust company, intends to apply for permission to purchase the following described lands:

Commencing at a post planted at the north east corner of Lot 1968, thence south 80 chains west 80 chains, east 80 chains, east 80 chains to point of commencement, containing 640 acres more or less.

HUME CRONYN.
Dated November 25th, 1913.
Pub. Dec. 15—Feb. 9, 1914.

Skeena Land District.—District of Coast Range V.

Take notice that Elbert M. Morgan, of Prince Rupert, B. C., occupation manager of a Trust company, intends to apply for permission to lease the following described lands:

Commencing at a post planted on the east shore of Banks Bay, opposite Mink Trap No. 1, and situated two (2) miles and fifty-three (53) chains more or less north and one (1) chain more or less west of (17) chains more or less west of A. L. 260, and sixteen (16) chains more or less north three (3) miles and forty-eight (48) chains more or less west of Green Top Island, thence west twenty (20) chains, thence north forty (40) chains, thence east twenty (20) chains, thence south following the shore line to point of commencement, containing eighty (80) acres more or less.

ELBERT M. MORGAN.
Dated 27th October, 1913.
Pub. Nov. 17, 1913—Jan. 12, 1914.

Skeena Land District.—District of Coast Range V.

Take notice that Herbert W. Lees, of Edmonton, Alberta, occupation manager, intends to apply for permission to purchase the following described lands:

Commencing at a post planted on the northeast corner of a bay a little to the eastward of Skilah Bay, Stephens Island, on the foreshore and adjacent to the application to purchase lot of L. R. W. Beavis, thence north twenty chains, thence west twenty chains, thence south twenty chains, thence east twenty chains following the shore line to the point of commencement and containing forty acres more or less.

HERBERT W. LEES.
Per His Agent, L. R. W. Beavis.
Dated October 15th, 1913.
Pub. Nov. 10, 1913—Jan. 5, 1914.

IN THE MATTER OF an Application for the issue of a fresh certificate of title for an undivided one-half interest in Section 10, Township 5 S., Range 10 E., District No. 3529 C. Satisfactory proof of the loss of the above Certificate of Title having been furnished.

NOTICE IS HEREBY GIVEN that it is my intention to issue at the expiration of one month after the first publication hereof a fresh Certificate of Title to the above mentioned lands in the name of C. B. Strong, which Certificate of Title was issued on the 12th November, 1897, at 11:40 o'clock A. M., as No. 3529 C. Land Registry Office, Prince Rupert, B. C., 27th October, 1913.

H. F. MACLEOD,
District Registrar.

A "HUMPTY-DUMPTY" VIEW

of the Bully in the wall game at Eton School, England. The celebration of St. Andrew's Day at Eton at which this event takes place. It is called the Wall Game an dis between Collegers and Oppidans, and a favorite place with the boys for watching it is from the top of the wall itself, whence this picture was taken. It is observed that the two "walls" who occupy the enviable position in the bully next to the wall, wear padded clothing.

In the Letter Box

To the Editor of The Daily News:

Dear Sir: In view of the many unreliable publications now before the public in connection with the proposed hydro-electric agreement, I feel it my duty to ask for space for the following remarks:

In quoting Mr. R. H. Thompson's figures as compared with Mr. Duncan's it must be borne in mind that Mr. Thompson dealt with the installation on ONE 500 K. W. UNIT ONLY. Mr. Duncan is dealing with the ultimate installation of 3600 horse power. And Mr. Duncan in his estimates has made allowances for several items which Mr. Thompson, according to his report, did not consider himself in a position to include in his estimates.

I have reason to believe that the government, in dealing with applications for water rights in our vicinity, have had the future needs of our city in view, and I also believe the government in the public interests will grant us necessary considerations to enable us to develop our own power. We have certain rights at Woodworth Lake and have taken steps to secure a larger power at Work Channel. Under the terms of our own Hydro-Electric Bylaw, ratified by special legislation, we are under certain obligations as far as the Woodworth power is concerned.

In local newspapers an ad. has appeared lately claiming to set out the "proposed rates of the Prince Rupert Hydro-Electric Co." In my opinion the rates set out in the said advertisement are not the rates proposed to the City of Prince Rupert. And the latest ad. claims to set out what the cost of light and power will be if the agreement is passed. In submitting these last figures the company claims to have based their calculations on Mr. Duncan's figures. In my opinion no man can make these calculations within 100 per cent of accuracy, and it is absolutely incorrect to bring our electrical superintendents in as a basis for these figures. They are merely calculations based on assumptions, and I do not think they can be verified at this time by any person. In this connection they are merely published to confuse the public.

In the proposed agreement the company tells us to shut down our present and proposed plants until such time as our consumption exceeds 3000 h. p. Why should any private company dictate to the city how they shall run their own utilities? I think this is up to the citizens to decide, not to the company.

Attention has very properly been called to the "primary charge" of one dollar per month per h. p. maximum demand. It is well for the public to carefully consider also this point.

The general tendency of the agreement seems to be that all—even the slightest—dispute under the agreement shall be settled by arbitration. I think arbitration is generally regarded to be the most expensive way of settling any dispute of this nature. Read the agreement carefully and you will find that it leaves the city a subject to such litigations, the cost of which no man can estimate. Take this also into consideration in considering the proposed prices.

In conclusion allow me to quote one or two outside opinions

with regard to the proposed agreement:

"Primary charge" is a real money-maker for the company and from the city's point of view should be cut out. The 'primary charge' in connection with the 'secondary charge' (See B) make the rates to the city from 50 to 300 per cent greater than the city can generate with its own water power plant.

"The rates submitted by the company are out of the question and should not be seriously considered. A rate of 1c per k. w. hour subject to a minimum monthly charge of \$1 per h. p. would be a fair rate to the city and would allow the company a large profit."

I will confine myself to these remarks and ask the ratepayers to give them due consideration. As the matter looks to me I feel it my duty to strongly advise the public to vote against the proposed agreement.

Your obedient servant,
JOHN DYBHAVN.
Prince Rupert, Dec. 31, 1913.

NEW LIFEBOAT FIRST BUILT IN CANADA

Built Like a Grand Piano—First Time Attempted in This Country

The first lifeboat of its kind to be built in the Dominion of Canada, the new \$12,000 Dominion Government lifesaving powerboat for the Uluetlet lifesaving station, is complete and ready for her trials at the Daffoe boatyard in Vancouver. Every bit of the boat, apart from the timber used in her, was made in Vancouver, and the timber was all dressed, finished and fitted in the yards. Of Honduras mahogany principally, the boat is as fine to look at as a millionaire's grand piano, polished smooth as ice and richly ruddy-hued in the natural color of the wood. Forty-foot oak stringers run the length of the craft at the gunwale and as sponsons. The boat is 36 feet over all, 8 feet 10 inches beam, and 5 feet deep. She is diagonally planked and all fastenings are copper, while all fittings are gunmetal or copper. There are two and a half tons of copper fastenings alone in the boat.

In a small wood-built craft the word "unsinkable" may be used more positively than it may in regard to a Titanic. This lifeboat is unsinkable. She has eight watertight compartments filled with copper air tanks. There are 100 air tanks altogether. With half her bottom torn out the boat would still float. Besides being watertight below her deck, the boat has numerous large scuppers through which any water shipped will flow out, while one-way valves prevent any water from coming in.

Immense care has been taken in the design and construction of the boat to render her serviceable for lifesaving purposes. To describe the hundred and one details of equipment would take long, but amongst notable fittings are the steering gear of immense strength but simplicity itself, the provision of special rowlocks for steering by oar in case the rudder should carry away, the fitting of a fog bell and whistle, and the triplication of ignition gear for the engine.

From 35 to 40 horsepower is the power of the engine, a Holmes lifeboat motor six cylinders, and especially made for this boat. The engine is run entirely from the outside of its watertight compartments aft, and the

GENERAL NEWS

Scientists have estimated that the smoke nuisance costs Pittsburgh nearly \$10,000,000 a year or about \$20 for each resident.

A material resembling celluloid but clearer, tougher and more durable has been invented in England for automobile wind shields.

Mirrors can be backed with almost any metal in 30 seconds by a new process of electrodeposition in the presence of hydrogen gas.

In Japan recently there was completed a railroad bridge nearly seven miles long, built of native materials at a cost of \$375,000.

Pennsylvania, West Virginia, Illinois and Ohio produce more than 40 per cent. of the value of the minerals found in the United States.

The French army has adopted a bicycle with a removable front and a folding frame that enables it to be carried on a man's back.

Painting the names of streets on the cement curbing at corners instead of on pole supported signs is being tried by a California city.

A mirror supported by a bracket to be held in the mouth has been invented by a Parisian to leave a woman's hands free to arrange her hair.

boat is likely to develop a ten-mile speed or more.

It is essential that this boat shall be self-righting, and a heavy brass keel is fitted for the purpose of bringing her on to an even keel again after a capsize. There is also a heavy brass centreboard for use when the boat is under sail. She is equipped with two masts, carrying lugsails and a big foresail, and can make great sailing.

SMALLPOX PATIENTS RUNNING LOOSE

Barber Shaves One of Them and Is Now Among the Numerous Victims

Walla Walla, Jan. 1.—That the smallpox patients of the country pesthouse, recently numbering half a dozen men, left the premises and came to this city at will, in addition to raiding nearby chicken houses and enjoying midnight feeds and card games, were the complaints made to the county commissioners in session this afternoon.

It was alleged that one patient came into a barber shop here, got a shave, and gave the disease to the proprietor of the shop and exposed himself to many others.

Three more cases were discovered and sent there today by the health authorities, and now the commissioners are considering placing an armed guard over the premises to maintain a strict quarantine. This brings the total number of smallpox cases discovered in this city during the past few weeks up to about 20.

Canon of St. Andrew's

On New Year's Day Bishop Du Vernet announced to St. Andrew's congregation, Prince Rupert, that he had appointed Rev. G. A. Rix a canon of St. Andrew's Cathedral and a member of the Cathedral Chapter.
