

Follow The King

As head of the Church of England in British Columbia I earnestly appeal to all our Church members to follow the noble example set by our King.

Many are willing to do so but feel the need of something to make their decision definite. To such I would recommend the signing of the following pledge:

I promise, by God's help, to abstain from the use of intoxicating liquor as a beverage while the War lasts.

FRENCH CRUISER LEON GAMBETTA, VICTIM OF AUSTRIAN SUBMARINE.

JURY FINDS KAISER GUILTY OF MURDER

London, May 11.—The coroner's jury which has been inquiring into the sinking of the Lusitania yesterday brought in the following verdict:

"We find the deceased met death from prolonged immersion and exhaustion in the sea, eight miles south, southwest of Old Head of Kinsale, on Friday, May 7, owing to the sinking of the Lusitania by torpedoes fired by a German submarine.

"We find this appalling crime was committed contrary to the international law and the conventions of all civilized nations.

"We also charge the officers of the said submarine and the Emperor of the government of Germany, under whose order they acted, with the crime of wholesale murder before the civilized world.

"We desire to express our sincere condolence and sympathy with relatives of the deceased, the Cunard Company and the United States, many of whose citizens perished in this murderous attack upon an unarmed liner."

GERMANY'S LATEST WAR TELESCOPES

The Germans have adopted several ingenious devices to cope with problems not foreseen at the start of the war, such as armored-car destroyers, quick-firing guns on motor-cycles, canal gunboats, and other similar inventions.

A wonderful stereo-telescope produced by the famous firm of Beiss deserves inclusion. Every battery of German artillery is provided with one. It is a remarkable instrument, which can be used behind cover out of sight of the enemy. The outstanding features are two long, slender arms, rather like the antennae of an insect. Though absolutely invisible at a very short distance, the antennae can give the hidden operator a very extensive view.

To ensure the accurate dropping of bombs from aeroplanes, the Germans have an airgun appliance which pushes the bomb out from the back of the aeroplane with the same velocity as that at which the aeroplane is flying, thus doing away with the curve with which the bomb would fall if merely dropped by hand. Quite a number of small German aeroplanes are fitted with wireless apparatus capable of transmitting messages a distance of thirty miles, but another ingenious method of signaling is to blow puffs of a powder chalk through the engine-exhaust.

The Krupp illuminating projectile is a shell containing two magnesium bodies filled with parachutes, so that at night-time it illuminates for a few minutes the ground over which it hangs.
