

Prepare for Poultry Profits

GROWING fleshy and healthy—getting to the egg and market stage—putting on the profits for you—that is the business of the young "chickies" who have got their baby growing safely over. You can keep them going—growing—thriving best by feeding them the scientifically balanced ration.

Royal Standard Growing Food

This has been proved by poultrymen to be the "right" ration for this rapidly-growing phase—a dry grain food, properly proportioned with bone added—a diet that is not only fresh, bone and feather-forming, but delicious as well. Selected grains, young peas, corn, barley—a mixture they eat with hungry relish. Send for samples of this and see how they enjoy it.
