

## We have another Small Shipment of PRATT'S FLY CHASER

Keep the animals contented. It is humane—sanitary—profitable to keep flies away.

The demand far exceeds the supply

The efficiency of Pratt's Fly Chaser is shown in the fact that the sales increase yearly to such an extent that the supply is divided among the various states and provinces. Pratt's Fly Chaser is taken up so quickly that we are forced to make a second small shipment. This is now on hand. Get your supply now.

## KENORA TO SELL HER POWER PLANT

No Opposition to Deal by Which Backus Interests Acquire Rights.

KENORA, Aug. 13.—The agreement for the sale of the municipal power plant to the Backus interests was discussed at a public meeting here, at which Mayor George A. Toole and Peter Heenan, M.P.P., were the chief speakers. There was no opposition either at this or a previous meeting, and the indications are that the by-law will meet with almost unanimous approval at the hands of the ratepayers. In the negotiations Mayor Toole said that the town had taken nothing for granted; expert engineers and chartered accountants had been engaged, with the result that the town knew its position regarding the power.

During the past six years the plant had lost \$50,000, whereas, had the town been purchasing power for \$20 per horsepower, as per agreement with Backus, for a like period, the profit for the lighting plant would have been \$30,000. As there will be another power plant here, the town services will also be better protected, it was asserted.

## URGES HEAVIER PUNISHMENT OF LAW BREAKERS

Attorney-General W. E. Raney of Ontario has sent out a letter to all magistrates of the province calling attention to the fact that many minimum fines of \$200 have been imposed and that the \$2,000 fine has been imposed for the sale of scores of cases of liquor.

"The object of prosecutions under the Ontario Temperance Act is not revenue, but prevention," says the letter, in remarking that the high and low fines merely constituted a high and low license fee. This is regarded as calculated to bring the magistrates and administration of justice into public contempt and derision. Attention is then called to the act of the last session under which magistrates are given power to order imprisonment for first violations of the act, and urging the magistrates to exercise this discretion. Replies and suggestions for better enforcement of the law are asked from the magistrates.

CANADA anticipates a period of growth.

Her raw materials remain the envy of her competitors.

She commands capital and skilled workmanship.

Her position in the British Empire gives her prestige and opportunity.

But whether she realizes her hopes fully or only partially rests to no small degree upon her steam railways.

CLOSER to Orient or Europe than is any other part of the NewWorld, Canada would lose this advantage if her railways proved unable to carry her goods quickly to these well-placed ports.

She must be prepared for any development of traffic east-bound or west—or south.

HER rail service must be elastic and dependable. It must have reserve capacity, whether to roll a bumper wheat crop east, or some other Canadian product west-bound for Siberia or the Antipodes.

Elasticity, dependability and reserve capacity are profoundly affected by the overwhelming increase in operating expenses as compared to revenue.

THIS is another reason why increased freight rates are necessary in the public interest!
