We have another Small Shipment of PRATT'S FLY CHASER

Keep the animals contented. It is humane—sanitary—profitable to keep flies away.

The demand far exceeds the supply

FARMERS know that cows give more and better milk, that calves put on flesh faster and that horses have more vim, and usually when not worried with flies. Flies are not only annoying—they are carriers of germs and contagion. They not only make cattle nervous and sick—they eat up farmers' profits. It is humane to use Pratt's Fly Chaser which effectively keeps them away because the animals suffer money in their dumb way from these stinging pests.

The efficiency of Pratt's Fly Chaser is shown in the fact that the sales increase yearly to such an extent that the supply is divided among the various states and provinces pro rata. Our original shipment was taken up so quickly that we ordered a second small one successfully. This is now on hand. Get your supply now.

Order your supply of Pratt's Fly Chaser at once. Remember Pratt's is a guaranteed product. It DOES the work.
