DAILY EDITION.

Saturday, October 23, 1920.

What Will Young People Do in Life?

What will young people do in life? What do you expect your boys and girls to be? Are they being educated for the work they expect to take up? These are questions for all parents to answer. Most girls nowadays learn some business or profession by which they can earn money for themselves. A girl should be none the worse wife or mother for having been a good stenographer, teacher, sales girl or telephone operator. She may take up a musical career or go in for one of the learned professions. But after all the life work of the average girl will be housekeeping and raising a family. Most girls marry and most of those who marry have children. The normal girl likes children and looks forward to having some of her own. To what extent are the girls being educated in the art and science of caring for children? The man who employs a stenographer must be assured that she is able to do the work, that she is accurate and can write so many words a minute and transcribe neatly and correctly. There are other things also to be learned if a good job is to be obtained.

The greatest vocation in the world is that of raising one's own children. The average girl goes into the profession with very little training and with no guarantee that she can do the work successfully or even that she understands the rudiments of the work. The result is easily seen.

What About Educating the Boy?

The boy is going to be an engineer. He is apprenticed to the work after having completed, perhaps, a mathematical school education. He is taught everything necessary and he in time becomes a leader in his profession. Incidentally he takes up the greatest duty of life. He gets married. In these days there are few servants. People must do their own housework. There are times in married life when the man has to do the work of the house. What does he know about it? Can he cook? Is he able to carry on while his wife is laid up. If not, what is going to happen? These are questions to seriously consider. It seems as if there should be an examination in household science for every person contemplating matrimony.

Every Man and Woman Should Marry.

The married life is the natural life. Every young man and woman should marry. Those who do not are apt to become different. We sometimes hear it said that old maids are cross, and it is often true. Bachelors have not carried out the natural life work. All should marry, but all should be educated for marriage. It is no wonder that marriage is often a failure, considering the haphazard manner in which the duties are undertaken.

Sunday Sermon on Duty Toward the Race.

We know of no better subject for a Sunday sermon than this of the duty of young men and women to the race and to each other. Professor Alexander when he was here two years ago gave a lecture on "Love, Courtship and Marriage," which was the best attended lecture he gave. Young and old were there. So today people are interested in these problems of life. They are anxious for education but the teachers are few and often without experience in the subjects they essay to teach. Most of our clergy are married men and have experience in these matters. Why not look to them for help? This little preachment is for the purpose of drawing attention to the subject rather than of discussing it seriously. It is a good Sunday subject and worthy of the best thought of the best minds.

FREE OF TERRIBLE KIDNEY TROUBLE

After Three Years of Suffering, "FRUIT-A-TIVES" Brought Relief

MADAME HORMIDAS FOISY

624 Champlain St., Montreal.

"For three years, I was ill and exhausted and I suffered constantly from Kidney Trouble and Liver Disease.

My health was miserable and nothing in the way of medicine did me any good. Then I started to use 'Fruit-a-tives' and the effect was remarkable.

I began to improve immediately and this wonderful fruit medicine entirely restored me to health. All the old pains, headaches, indigestion and constipation were relieved and once more I was well.

To all who suffer from Indigestion, Constipation, Rheumatic Pains or great Fatigue, I advise the use of 'Fruit-a-tives'."

Madame HORMIDAS FOISY.

PRINCE RUPERT TIDES

Saturday, October 23.

High, 10:30 a.m., 18.2 feet.

22:48 p.m., 17.7 feet.

Low, 4:8 a.m., 7.3 feet.

16:53 p.m., 7.6 feet.

Sunday, October 24.

High, 11:9 a.m., 19.2 feet.

23:35 p.m., 18.7 feet.

Low, 4:56 a.m., 6.8 feet.

17:37 p.m., 6.1 feet.

The time used is Pacific Standard, for the 120th Meridian west.

It is counted from 0 to 24 hours from midnight to midnight.

The table given is for Port Simpson but the time for Prince Rupert varies only a few minutes on some days and on others is the same. The range of the tide may be computed as 5 per cent greater at Prince Rupert than at Port Simpson both at springs and neaps. Therefore the rise in the Prince Rupert harbor is slightly greater than Port Simpson. The height is in feet and tenths of feet above the average level of lower low water.

TIMBER SALE X 2324.

Sealed tenders will be received by the Minister of Lands not later than noon on the 9th day of December, 1920, for the purchase of Licence X 2324, to cut 2,350,000 feet of spruce, cedar and hemlock on an area adjoining Lot 1936, Selwyn Inlet, Q. C. I. District.

Two (2) years will be allowed for removal of timber. Further particulars of the Chief Forester, Victoria, B. C., or District Forester, Prince Rupert, B. C.

GRANBY GETS MUCH COPPER

Not Quite as Much in September as Previous Months, says Report

CONCENTRATOR MAY BE ERECTED AT ANYOX

The Granby Consolidated Mining, Smelting & Power Company produced 2,239,174 pounds of copper in September, according to a report received by Walter J. Nicholls & Company, says the Spokane Spokesman-Review. This is comparable with 2,471,200 pounds in August and 2,400,000 in July. A table issued in New York shows that the production in every month but one of the current year was in excess of 2,000,000, while six months of 1919 were below the 2,000,000 mark, although one month was above 3,000,000.

Half Year's Profit

The report received yesterday states that a net profit of \$443,586 was obtained after the deduction of charges, but not of tax, in the six months ended on June 30 last. In the six months ended on December 31, 1919, the gross profits were \$599,487 and the net profit \$59,900, according to a report.

Concentrator Proposed

From an unofficial source it is learned that the company has considered the installation at Anyox, B.C., of a concentrating plant having a capacity of 2,000 tons daily. Its cost is estimated at \$1,000,000.

For a year and a half an experimental mill of 100 tons daily capacity has been in service. It is reported to have demonstrated the responsiveness of Granby ore to concentration. The installation of the 2,000-ton plant will reduce the cost of producing copper and make available a large quantity of ore that does not reach the smelter, it is pointed out.

Ore in Sight

The Hidden Creek mine of the Granby Company has 11,000,000 tons of ore designated as No. 1 and containing 2.4 per cent copper and 14,000,000 tons designated as No. 2 ore, containing about 1.25 per cent copper, it is reported. Smelting is said to have been limited mainly to the No. 1 ore, but the No. 2 would become available after concentration. The ratio of concentration would be about 10 into 1, it is estimated. This alone is expected to save much smelting which entails a large consumption of coke.

The Man in the Moon SAYS:-

THAT a hunting trip may be reported as two men, one smelly launch, two rifles, one long tramp over the mountains, one glimpse of a deer in the distance, one long long trip home.

THAT even a brown elephant is dear at a dollar unless you have some use for him.

THAT all should forestall their worries by doing their Christmas shopping early.

THAT in Alaska they are having an election and to outsiders the newspapers are extremely funny. Of course there's nothing funny about us during an election campaign.

THAT the only people who can afford to spend a lot of time running other people down is the elevator man or the owner of a high powered car.

THAT many a woman in Prince Rupert likes to wear jewels, but not the consistency kind.

THAT the Seattle lady named Ima Cooty should marry a man Billy French.

THAT, judging by the American papers, the politicians must be a rotten lot.

THAT judging by the Canadian papers all the politicians are angels, don't you think.

THAT the latest sweepstake is guessing how many candidates will run in Prince Rupert. The next will be as to which of the six will be left at the post.

THAT someone wants to know how many times a man has to run for office before he becomes a wicked politician.
