

# PORT SIMPSON VOTES THANKS TO VISITORS

Appreciates Manner in Which the Political Issues are Placed Before Them by Mr. Pattullo.

A Liberal meeting was held at Port Simpson on Saturday night in the interests of the candidature of Hon. T. D. Pattullo, minister of lands, which was well attended by voters, ladies predominating. Dr. Spencer presided. The speakers were A. R. Mallory of Port Clements and L. W. Patmore, H. F. Pullen and the candidate from Prince Rupert. At the close a vote of thanks to the visitors was unanimously passed for placing the issues so clearly before them.

Mr. Patmore discussed the matter of finance and explained particularly the value of the work of the minister of lands during the four years he had been in the Legislature. His record was a matter of comment everywhere and this district was not sufficiently appreciative of the splendid work that had been done. He spoke of the candidates, showing that Mr. Pattullo was the only man they could logically support.

**Aeroplane Spruce.**  
Mr. Mallory was very brief but he explained that it was the work of the minister of lands in connection with aeroplane spruce production that had placed the Islands on the map as they had never been before and the people there recognized this and would give Mr. Pattullo a substantial majority.

Mr. Pullen spoke of the candidates. Mr. Burrough was organizer for the Loggers' Union and former general secretary of the O. B. U. and announced himself as a revolutionary Socialist and not caring about reforms. He was a sincere man but, if elected, would use his position at Victoria for socialist propaganda, something that did not get you anywhere. Mr. Newton as usual announced himself and it was by means of his newspaper that he was able to get before the public. This being a candidate was a habit with him. He wrote a series of editorials in which he scathingly attacked his opponent in language which was anything but such as a public man should use. These editorials were a source of great amusement to the community and did not hurt anybody. However a man of that type was hardly the man they wanted in the Legislature. He did not represent anybody and did not stand for anything except himself and his own aggrandizement.

The Conservatives, the speaker said, had been for weeks searching for a candidate, but so far had not been able to find one. Mr. Kirkpatrick had come to Prince Rupert and gone carefully over the district and had decided that it was no job for him. Mr. Orme had been offered it and had refused. Mr. Heattie had been suggested but had not as yet accepted. The Conservatives might choose a man on Monday night, but whether they did so or not the man who would win, and that by a large majority, was T. D. Pattullo.

**Women in Politics.**  
Mr. Pattullo spoke of the fact that women were taking more interest in politics than they had done heretofore and that was due to the legislation passed by the present administration who gave them the vote. They all remembered the time when a man had to join the Conservative Association in order to get a job. That was all changed now. He told of

Goodyear Klingtite Belts driving the sugar cane crushers of Cuba, Mexico and Central America

## Canadian Success Promotes World-Wide Sale

As a result of the way Goodyear builds and sells belting and industrial hose in Canada, you will find these Goodyear products saving and serving in over 1,000 of Canada's finest industrial plants and mines.

The analysis of conditions, the scientific specification and application of belts, which Goodyear men make in Canadian plants they are now making all over the world.

To meet the requirements of world-wide trade it has been necessary to make some changes in the names of Goodyear Belts.

For example, Goodyear Extra Power is now Goodyear Klingtite Belt.

But the change is a change in name only.

This world-wide use of Goodyear Belting and Industrial Hose,

Canadian-made, will multiply many times the fund of data and experience available to Canadian Goodyear users.

The problems overcome and the lessons learned in the factories of Japan and China, in the mills of India, in the workshops of South America, in the mines of South Africa, by the industries of every country, can now be applied by Goodyear men to Canadian industrial.

When the Goodyear belting man comes to talk to you, this information guides him in advising with you. His help is valuable—and costs you nothing. Phone, wire or write nearest branch.

**The Goodyear Tire & Rubber Co. of Canada, Limited**  
Branches: Halifax, St. John, Quebec, Montreal, Ottawa, Toronto, Hamilton, London, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver. Service stocks in smaller cities.

the benefits accruing to the country by the operation of the Land Settlement Act, of the thousands of settlers who as a result of that policy had come into the valleys along the line of the G. T. P. railway.

**Social Legislation.**  
Dealing with the social legislation of the Government, Mr. Pattullo spoke of the Minimum

Wage Act, the Mothers' Pension Act, the Women's Franchise Act, the Equal Guardianship Act, and the measure providing for support for deserted wives. He claimed that in finance, in development of natural resources and in social legislation the Government had done real work which he knew the people appreciated. The administration of John Oliver and his

cabinet had been an honest, courageous and forward administration. Under it the north had not been neglected, as his opponents had charged.

**Good Work.**  
At the close Dr. Spencer said undoubtedly the Government had done good work. He could not, however, understand how it was that men who had been convicted

under the Prohibition Act had been released when they got to Victoria. Mr. Pattullo explained that this was done by the chief justice of the province and had nothing to do with the Government of British Columbia. The meeting then adjourned.
