Pacific Milk

Makes Butter

Several have asked that the recipe for making butter be repeated as they missed it. Empty 1 small tin of Pacific Milk into a saucepan. Heat it to the boiling point.

As it cools, about lukewarm, add ¼ pound of butter. Allow this to melt. Add a pinch of salt.

Then beat it until cool and put in the refrigerator or out-of-doors to set.

Prince Rupert as A Public Library Radiating Centre

(Continued From Page One.)

ent collection. They would also have the advice and help of the trained librarian at the centre and the help in the purchase of books which such a trained person is only able to give.

Local Plan.

For Prince Rupert it would be necessary to have a building or commodious room heated and lighted. Miss Stewart suggests, from information supplied her, that the Red Cross hut might be removed to connect up with the present reading room and that the women's reading room should also be in the same building. It would be much easier to handle if all were together. The library would co-operate with the schools and ladies' societies and would be the centre for intellectual development. If it were possible there should be an auditorium connected but that is not necessary at first. The essentials are a trained librarian and a collection of books with a place in which to house them.

A librarian would cost about \$1,500 a year and the other, co-incident expenses would not be high. Books could be purchased partly from a city grant and partly from a tag day or entertainments or similar means well known to those interested in civic welfare schemes.

For Other Towns.

The associated libraries would be supplied with collections of books according to their needs. For instance, a small library of 100 books could be secured by payment of \$50 a year, the actual computed cost of the service. These could be changed from time to time as arranged, the associated library to pay all transportation charges.

The scale of fifty cents per volume per year has been worked out by Miss Stewart and those collaborating with her in the scheme for Vancouver Island, of which Victoria is the radiating centre. Already Duncan, Nanaimo and Alberni have joined the scheme and others are expected to come in soon. The money contributed from outside points is at once invested in new books in addition to the sum contributed at the centre.

Scope of Organization.

Directly after the new year commences Miss Stewart is going to Nelson, to organize a centre and a number of the surrounding points have already agreed to join.

For Prince Rupert it is suggested that Anxox, Alice Arm, Stewart, Queen Charlotte Island points, Surf Inlet, Swanson Bay, Ocean Falls, Terrace, Usk, Hazelton, Smithers, Telkwa, Vanderhoof, and Prince George might co-operate and other places could come in from time to time as they became interested.

The plan as outlined is already in operation in various parts of the United States, but could be modified to suit local conditions. It has all the appearances of a workable plan.

ANCIENT JEWELRY SEEN IN NEW YORK

NEW YORK, Dec. 29.—Jewelry worn by an Egyptian princess of the twelfth dynasty, 1900 years before the Christian era, is now on display at the Metropolitan Museum of Art. It is declared to be the finest collection of personal adornment ever brought out of Egypt.

When marauders entered the tomb of Princess Sathathorinut at some odd moment in the last 3,800 years, they took away her mummy and even the wonderfully wrought funeral trappings, but overlooked a niche containing the wonderfully wrought ornaments she wore in attending the ancient equivalent for a first night at the opera.

Professor William Flinders Petrie, head of a British archaeological society, dug the collection out in 1914, and today it looks as bright as if it had just come from the makers.

The jewels are identified as belonging to the princess by her name and the name of her father in cartouches on the larger pieces.

HEALTH OFFICIALS ON THE WARPATH

Crusade is Being Started Against Violent Sneezing in Public.

The epidemic of colds which is now sweeping the country has led health officials to start an educational campaign showing the dangerous effects of violent sneezing in public.

"Check your Sneezes"—"Every public sneeze is a public danger"—"Think twice before sneezing once"—are slogans which are being emphasized in the effort to check the epidemic and the results it threatens. A prominent feature of the campaign is the education of the public to the necessity of treating every case of cold in the head promptly. If taken at once it is declared that simple treatment will give relief in a single night, and the patient can remain steadily at work.

The treatment recommended for colds is the compound of Aspirin, Phenacetine, Quinine, Eucalypti, Citrate of Cascara and Camphor Monobromate. This is now offered the public under the name of Reid's Grip Fix. Every home should have a box on hand while the epidemic of colds prevails. It comes in capsule form and acts quickly. Two capsules, taken two hours apart, over a period of six hours gives effective results with one capsule at a time thereafter to complete the work.

Grip Fix is not a patent medicine, but when the following described lands—Grip Fix as there is no home treatment for colds which equals it. On sale at 35 cents per box at all druggists.
