To Save and Maintain Our Salmon Fisheries

Continued From Page One.

Fraser River fishery demonstrates what will happen if things are to go on as they have been going.

"We have overdone the thing. We have drawn, and are drawing, too heavily upon our supply of salmon and of halibut. What we need is a complete and radical change of policy; a departure altogether different from past and existing methods.

The Time Has Come.

"The time has come when the Government should step in and take over our salmon fisheries and administer them for the benefit of the people as a whole and for all time. They should step in and take over the salmon fisheries just as the British and United States Governments have taken over the fur-seal fisheries of the North Pacific. Instead of licensing existing and new companies and individuals to take and handle our salmon fisheries the Government should take them over and handle them. By so doing the fish will be given full protection. There will be a radical reduction in equipment and a consequent reduction in overhead expenses that will materially reduce the retail price of both fresh and canned salmon. And at the same time the Government, being serious in its desire to help returned men, can do so by taking control of the salmon fisheries and install returned men to operate them.

"The governments of Great Britain and the United States took over the fur seal industry because it was essential to the preservation of the fur-seal. The fur-seal was threatened with extinction. Corporate and individual enterprise was killing them off. The Governments took them out of the hands of corporations and individuals and adopted a policy that has materially increased the numbers in the herds of fur-seals.

Sole Government Control.

"There is no inherent difficulty in taking over the salmon fisheries. The existing operating companies in the salmon fisheries have no operating rights beyond those granted them from year to year. The government is under no obligation to renew the licences formerly granted to them. I suggest that the Government should assume the sole control of the entire salmon industry, even though that may mean compensation where it can be shown that compensation is due. Many of the salmon plants on the Fraser are at present a liability and not an asset of the owning companies. The plants of Northern British Columbia will in a short period be as valueless as the plants on the Fraser if the existing policy of depletion is continued. The history of the Fraser will be repeated. The salmon fisheries of British Columbia will be depleted as Alaska is being depleted. The Government should bear this in mind in taking over existing plants that may be found necessary for the work under government control. The Government can, by combining its efforts, reduce overhead expenses by several hundred per cent. It can in consequence sell cheap. It can put up as good, if not a better and more uniform pack. Being a Government-guaranteed product it will be in greater foreign demand. And what is of greater importance it will ensure the continuance of the salmon runs.

Trawl Fish Too.

"Government owned and operated fisheries, and I do not continue the suggestion that Government ownership be confined to the salmon fisheries alone, for I would include trawl-caught fish, which together with the salmon would prove a valuable adjunct to the two transcontinental railway lines owned and operated by the Government. By the addition of large freezing and cold storage plants at or near Prince Rupert and Vancouver, the Pacific terminal ports of Government-owned railway lines, the Government will be in a position to supply the Northwest Provinces and Eastern Canada with fish at cheap prices, employ returned men, and to dominate the local fish food markets, to the immediate and lasting benefit of the fish and the people.

Give the Fish a Chance!

"The fish of the province belong to the people of Canada. They constitute one of their greatest natural assets. When our minerals and our timber are drawn upon they are lessened to that extent. Minerals cannot be replaced. Our forests may, at great expense, be restored by re-forestation, but they then will not

be available for several generations. Our fisheries, on the other hand, will last for all time if they are properly handled. Depleted runs can be restored. The runs of former years may even be enlarged. All that is necessary to maintain our salmon supply is to ensure that a sufficient number of fish reach the spawning grounds. If the beds are well seeded there will be a certain return. The fish will do all the work necessary, provided the Government gives them a chance to do so. They will perpetuate themselves without cost. They will entirely disappear if left to corporate and individual control.

"The policy here advocated will meet with the approval of the people of Canada, since it means that the fisheries will be maintained in their interest, and that they may have fish at a cheaper price.

Sane Business.

"The policy proposed is a practical and sane business thing for the Government to undertake. It is a business that will pay dividends in a greater supply of fish, and at a cheaper price, not only to the people of today, but to our people that are to come after. Government control and operation is, in my opinion, the solution of this great economic question.

"The Privy Council decided that the right to administer the fisheries of this province rested with the Dominion, and that the right to fish was a public right subject to regulation by the Dominion. Provided the Dominion Government is not prepared to accept the policy here advocated, and operating our fisheries, I maintain that the Dominion should surrender that right to British Columbia.

"We are facing rapidly changing conditions, and the time is opportune to assure the conservation of the Pacific Coast fisheries for the present and the future benefit of the whole people of Canada rather than sacrifice this great provincial and national asset to satisfy the shortsighted greed of a small minority."

NOTICE OF CANCELLATION OF RESERVE.

NOTICE IS HEREBY GIVEN that the windbreak Reserve covering the belt of land ten chains in width and situate along the north shore of Graham Island, notice of which appeared in the "British Columbia Gazette" of the 28th January, 1909, is cancelled in so far as it relates to that portion following the beach southerly to the southern shore of Indian Reserve No. 1 and Indian Reserve No. 3.

G. R. NADEN,
Deputy Minister of Lands
Department of Lands,
Victoria, B. C.,
November 17th, 1919.

LAND ACT.

How to Foil Wind and Weather on Washday

From now until spring a battle that endangers health must on washday be waged with rain and sleet.

That, or drying the washing in the cellar or attic, with its attendant inconvenience and sour smells.

Of course we can not order weather to our fancy, but if you would laugh at mud and water, save your health and keep your hands and face free from chapping and roughness, telephone us.

Next, bundle up your family washing and have our driver call for it.

In our laundry your things are initialed where the mark never shows. Everything is sorted, too—table linen is washed only with table linen, hosiery with hosiery. There is no indiscriminate mixing. And it is laundered in fleecy suds of silky softness.

The weather, and the hardship of fall and winter washing need never be a source of worry. Use your telephone and let us help you.

"Wee MacGregor" DRAG SAW

The Original Light Weight, Portable, Gasoline Operated Drag Saw and Power Plant.

(Frequently Imitated—Never Equalled)

This tested, proven, gasoline driven, portable drag saw, with its 4 h.p. motor, according to conditions, will do the work of from two to ten men, and cut from 20 to 30 cords of wood a day, at an approximate cost of 4 cents a cord for fuel. With its pulley attachment, it will pump water, drive the circular saw, run the chain or separator. It is light and can easily be carried from one point to another. One man can move it on the log. Two men can carry it from log to log. It has sawn a 2-foot log in 50 seconds—a 6-foot log in 4 minutes. These are but a few of its features—14 of them exclusive, possessed by no one other similar machine.

WEE MacGREGOR SAW MANUFACTURING CO.
