SAVE YOUR SIGHT

EYESIGHT—The most valuable of all the senses—is the most neglected and the least understood. Many suffer from ill, which, upon examination, can be traced directly to defective eyesight.

The removal of the cause will often restore the delicate and run-down sufferer to robust health. When glasses are properly prescribed, they restore the vision to normal and eliminate all eye strain.

Grimsby of Pacific

The Port of a Tremendous Country of Vast Potentials.
By G. A. WOODLAND, in Imperial Oil Review

Situated as it is in a district rich beyond description in natural resources and which are on the very eve of enormous developments, Prince Rupert bids fair within a very short time to rival its older competitors to the south. Although in its infancy the port has wonderful geographical advantages and at the present time is the home of the greater part of the fishing fleet which operates in the North Pacific.

Waters Teem With Fish.

No other port of its age and size in the world, and very few others, if any at all, can compare favorably with Prince Rupert in the richness of its waters. Out of 1,616,157 cases of salmon packed in British Columbia in 1918, 1,047,491 cases, or practically two-thirds of the catch, was made in this district.

Over 25,000,000 pounds of halibut was landed during the same year, while close upon 3,000,000 pounds of ground fish such as plaice, whiting, sole, skate, brill, black cod, grey cod, ling cod and herrings were taken in the same period. The total value of the combined catches being approximately \$18,000,000. Inland rivers and lakes abound with many species of trout, white fish and other edible fish. Prince Rupert is also acting as a receiving house for the Alaska fish products and most of the fish caught in those waters go through this port to eastern markets.

Rich Mineral Deposits.

Words fail to adequately describe the mining possibilities of northern British Columbia. Rich deposits of gold, silver, copper, lead, zinc, iron and coal abound in many districts and developments are going on apace.

Anyox, located some eighty miles to the north of Prince Rupert, is the seat of the largest copper mines and smelters in Canada. They are owned by the Granby Mining, Smelting and Power Company, and immense new coking ovens were recently added to their plant at a cost of \$2,000,000. These people are large users of Imperial Oil products.

Another mine of great richness is situated on an arm from the main channel called Alice Arm and is known by the name of the "Dolly Varden." At least 750,000 tons of rich silver and lead ores are already blocked out, and this mine is now in full operation.

Further up the coast at a place called Stewart, the Premier mine is located and is also under active operation and producing silver ore ranging from \$300.00 to \$3,000.00 per ton. This mine is one of the biggest ever discovered in North America.

Forest Products.

It is estimated that we have a clear standing growth of forty billion feet, board measure, of marketable spruce, and in a very short space of time twenty-five mills have sprung up enabling the manufactured product to be shipped to Eastern Canada, the United States and Europe.

Queen Charlotte Islands is the home of the famous Sitka spruce, millions of feet of which have been shipped overseas to be used in the manufacture of aeroplanes.

The district holds a vast fortune in pulp wood, too. Millions of cords are still in standing growth. Two large pulp and paper mills have already been established, but there is still room for many more. Ample water power is easily obtained, and the very near future will see quite an awakening in this industry.

Farming and Ranching.

The interior of northern and central British Columbia, tapped by the Grand Trunk Pacific Railway Company, of which Prince Rupert is the Pacific terminus, presents wonderful opportunities for mixed farming and live stock raising. The type of country may be classified as plateau and valley lands. As the soil is very rich and natural vegetation very heavy live stock does exceedingly well. Horses, cattle and sheep are raised successfully.

Settlers Coming Fast.

Settlers from the burnt-out portions of the prairie and as far south as Oregon and the Dakotas are coming in very fast. It will only be the matter of very few years before the country will be well settled and a big producer.

The climate of the interior varies a great deal, and although

the winters are colder, than on the coast, it may be likened to that of Ontario, except that there is a natural dryness about the air.

A Coming Port.

Residents of this new country are very jealous of its possibilities and confidently foretell the recognition that is coming to Prince Rupert.

Prince Rupert is 400 miles nearer the Orient than any other Pacific port now in existence. This fact alone will mean great savings of time and cost in favor of using this route for transportation and commerce.

The Grand Trunk Pacific Railway, too, was well and wisely constructed. Throughout the coast mountain division a grade of less than half of one per cent is maintained. This grade will allow a speed of forty miles an hour on all trains and results in the handling of more freight at a less cost than on any other railroad in America.

Imperial Oil Limited is fully alive to the possibilities of the port. We believe that it will eventually be one of the leading centres of commerce on the Pacific coast and a most important distributing centre for all kinds of petroleum products.

Harold Hestrup, of Alice Arm, who came to town last week suffering with a severe cold, is sufficiently recovered to be about again.
