Jellicoe's Report An Interesting One.

Admiral Jellicoe has reported to the Canadian Government in regard to the needs of the country from a naval point of view and the report has been laid before Parliament. It will now be for the people of the country to decide whether or not they want a navy and if they want it, how much money they will spend on it. It is to be assumed that the matter will be left in abeyance for the present and will be discussed during the next election campaign in order that the people may be completely informed in connection with it.

When the time is ripe for a navy it certainly must be a Canadian navy. We must build our own war ships as we have built our merchant ships. We can do it just as well as they do it elsewhere. From an efficiency point of view it may be better to contribute to an Imperial navy, but the Canadian people can never become interested in that great silent monster as they would in their own little back yard fleet.

To have war ships does not mean much to a country unless she is in a position to man them. A navy is not made, it grows. There has to be a building force behind it, but the navy consists even more in its personnel than in its ships. It is an institution and it must be in close touch with the other activities of the country. It should be an outgrowth of those activities rather than something grafted on. With the development of a merchant marine, the thought must naturally occur, how are we going to defend it?

Commence in Small Way at First.

The Laurier Government made a start with a navy years ago and everything looked very good on paper, but they were very slow in getting to work, so slow that the people got tired of waiting. Then when the Conservatives came in power they upset all the plans and started on a new tack and did much less than their predecessors. Those were in days when the country could afford to spend money. Now the burden of war debt is so great that it is doubtful if the country will be prepared for any extra expenditures for some years to come.

What might be done, it would seem, would be to build a few of the smaller vessels first, submarines for instance, for the defense of the Canadian ports. The work could be extended from time to time and men could be trained so that when the larger ships were built they would be really a part of a naval system and not so many white elephants.

Must Pay Debts Before Having Luxuries.

The first thing for Canadians to do is to pay their debts. To spend large sums of money on warships or anything else not actually needed would be foolish just now. Get the finances of the country into better shape and then talk about new enterprises. As long as our dollar is not worth its face value in the markets of the world, and as long as we have to borrow in order to pay the running expenses of the country, we are in a bad way. If we spend money now it must be first on schemes for developing the natural resources of the country so that we may take our rightful place in the world commercially. Then when we have taken that place will be time enough to plan to defend it.

GUARD AGAINST THE 'FLU'

Serious Outbreaks of Influenza
all over Canada

GOOD HEALTH IS THE SUREST SAFEGUARD

"FRUIT-A-TIVES" Brings Vigor and
Vitality and Thus Protects
Against Disease

There can be no doubt that the situation regarding the spread of Influenza throughout Canada is one of grave concern. It is quite true that the number of cases does not constitute an epidemic such as caused the suffering and sorrow during the terrible days of 1918. Yet there is no disguising the fact that everyone should be on their guard against the disease.

In Montreal alone, from January 20th to February 21st, three thousand, one hundred and twenty-two cases of Influenza and 189 deaths from the disease were reported to the Health Department.

If the outbreak had come at the beginning of the winter instead of the end, we might reasonably feel that the very cold weather would check the spread of the disease. But coming as it has, at the end of the winter, there is grave fear that an epidemic may occur. For spring, with its slush and rain under foot, its dampness and chill, its constant changing from cold to warm and back again, is a prolific source of coughs and colds, pleurisies and pneumonia.

The best protection, in fact, the only safeguard against the 'Flu, is, GOOD HEALTH.

Those who are not as well and strong as they should be; those who are underweight; those who are "run-down" through overwork or sickness; should build up at once. What they need is a Blood-purifier, a body-builder, a strength-giver, like "Fruit-a-tives", the wonderful fruit medicine.

"Fruit-a-tives" regulates the kidneys and bowels, causing these organs to eliminate waste regularly and naturally as nature intended. "Fruit-a-tives" keeps the skin active, and insures an abundant supply of pure, rich blood. "Fruit-a-tives" tones up and strengthens the organs of digestion, sharpens the appetite, brings restful sleep and renews the vitality of the nervous system. "Fruit-a-tives" contains everything that an ideal tonic should have; to purify the blood, to build up strength and vigor, and to regulate the eliminating organs, so that the whole system would be in the best possible condition to resist disease.

Now is the time to build up your health and strength, not only as a precaution against the ravages of Influenza, but also to protect you against "spring fever" and the inevitable reaction which comes with the appearance of warmer weather. Get a box of "Fruit-a-tives" today and let this fruit medicine keep you well.

"Fruit-a-tives" is sold by all dealers at 50c a box, 6 boxes for \$2.50, trial size 25c, or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.
