Garde States Alice Arm and Stewart Should have Mechanical Ore Samplers

"If there was one thing that was emphasized to me more than anything else on my recent trip to Alice Arm, it was the need for government controlled ore samplers at that point and Stewart," said A. C. Garde, M. E., to a News representative yesterday afternoon.

"The question is an old one. There is not a mining camp of any importance in North America, indeed the world, that has not one and why these places should not have them is more than I can see. They have the same relative effect to mining as grain elevators have to grain growing.

"These mechanical ore samplers would be even more important to the small miners than the large companies. The latter are always able to take care of themselves. It is a fact that the small mine operators are at the mercy of the smelters and the returns are, in many cases, far from satisfactory. The miner would be able to take his ore, high grade or low grade, and in any quantities and have it tested and the smelters, having representatives at the samplers, would buy the ore up at prices fixed by the government examination.

Case in Point

"While I was at Alice Arm one especial case was brought to my notice where a small shipment was sent to a smelter. The returns were far from satisfactory and had a disastrous result on the miner thus affected. If ore samplers were in operation, such cases as this would be entirely avoided. I am speaking not from hearsay but from actual facts gained at first hand.

Mr. Garde is still confident in the future of the Alice Arm district. He looked for a prosperous season there this year and predicts great things for the camp, not from a "bonanza" standpoint only, but from the steady development of average ores.

Steel Industry

Mr. Garde also states, speaking of the Copper River iron and coal question, that mining men in authority as well as the Grand Trunk Pacific Railway and the governments are getting together and are beginning to realize the potential possibilities, both for the railroad and this city, involved in the development and operation of these mining fields, more especially in regard to the establishment of the steel industry near Prince Rupert.

ANOTHER VICTIM OF RHEUMATISM

Entirely Well After Six Weeks' Treatment With "FRUIT-A-TIVES"

MR. AMEDEO GARCEAU

82 Hickory St., Ottawa, Ont.

"I was for many years a victim of that terrible disease, Rheumatism. In 1913, I was laid up for four months with Rheumatism in the joints of the knees, hips and shoulders and was prevented from following my work, that of Electrician.

I tried many remedies and was under the care of a physician; but nothing did me any good. Then I began to take 'Fruit-a-tives' and in a week I was easier, and in six weeks I was so well I went to work again.

I look upon this fruit medicine, 'Fruit-a-tives', as simply marvellous in the cure of Rheumatism, and strongly advise everyone suffering with Rheumatism to give 'Fruit-a-tives' a trial."

The table given is for Port Simpson but the time for Prince Rupert varies only a few minutes on some days and on others is the same. The range of the tide may be computed as 5 per cent greater at Prince Rupert than at Port Simpson both at springs and neaps. Therefore the rise in the Prince Rupert harbor is slightly greater than Port Simpson.

The height is in feet and tenths of feet above the average level of lower low water.
