

# Brandram's BB B LEAD

HEY used it for the stage-coach of olden days in England—we use it in Canada today. Compare it with any other white lead or white paint, and you will decide that your house-or anything you wish to have truly white and remain white-must be painted with this brand which has survived as the leading white lead for nearly two centuries.

Thinned with linseed oil and turpentine, it makes a perfect white paint. Combined with coloring matter, it makes the satisfactory tinted paint of any shade. It is the basis for that finest of ready-mixed paint, B-H "English" Paint.

Made in a modern Canadian factory, and by the same process as was employed for its manufacture by its inventor in England, it is today the only survivor of all the patented white lead processes of that earlier generation. It has survived because it results in a white lead of exceptional fineness, whiteness and durability.

"Wee MacGregor" DRAG SAW THE ORIGINAL LIGHT WEIGHT PORTABLE, GASOLINE OPERATED DRAG SAW & POWER PLANT (Frequently Imitated Never Equalled)

The "WEE MacGREGOR" Drag Saw is an inexpensive practical and proven machine, peculiarly adapted for the rapid and accurate cutting of wood under any conditions, on land or water. With equal facility and proportionate rapidity it will cut the small or large log up to seven feet in diameter. Depending upon size and character it will cut from either

green or dry logs, 20 to 30 cords of wood a day. So light is its weight it can easily be carried from one point to another. One man can move it on the log and two men from log to log. It has sawn a 2-foot log in 50 seconds, a 4-foot log in 3 minutes and a 6-foot log in 6 minutes. Its operating cost for

gasoline; oir and grease is approximately 4 cents a cord. Full operating instructions are furnished with each machine, and its mechanism is so simple it can be operated and kept in order by any person. Its power can be harnessed to the feed cutter, the pump, the circular saw, the churn or the separator.
