Master Belts of Industry

Goodyear has solved the problem of belting the great main drives of industry—the backbone of production.

Experience, in a thousand Canadian plants, says Goodyear Extra Power Belts.

Because these belts are strong—with the strength of properly selected fabric, every thread perfect.

Yet flexible, hugging pulleys, taking advantage of every inch of pulley surface. Flexible because in Goodyear Extra Power Belting high-grade rubber is forced through and through the fabric in generous quantities. Every strand is cushioned in it.

No stitching to stiffen or weaken the belt. No separation of plies.

Its friction surface grips, even through dampness or dust. No slipping with Extra Power. No need for extra tight belts, pulling pulleys out of line. No need for belt dressing. No lost power.

The testimony for Goodyear Extra Power on main drives is very complete. For instance:—

The Norfolk Milling Company, of Simcoe, writing about their main drive belt, purchased a year ago, say:—

"Has been in continuous operation for one year, and has not stretched nor given us the slightest bit of trouble."

There are many others—some selected at random are:—

- Saskatchewan Steel Company, Ltd., Windsor, Ont.
- Dominion Sugar Company, Ltd., Chatham, Ont.
