Munro and Mrs. they embedied their discoveries was realized on the sale. from research into the power

As electric smelting of iron in the manufacturing of steel is considered the most efficient and 'economical process the need of quantities of power can be readily seen. Some of the numerous power sites on the British Columbia coast will eventually have to be developed for this special purpose. There are a number of these sites in the immediate vicinity of Prince Rupert and some of these sites are located at tideand other raw materials necessary for steel production can be delivered at low cost and the products can be shipped from the works in ocean going vessels at any time of the year.

Large Investment.

Such power, however, cannot be economically developed unless the plant is built to the fullest possible capacity at the start. This, usually, involves an invest-of business in the province. ment that is too large for any commercial undertaking. If, however, there could be established, a group of industries for a record book of all the pelts and the electric smelting of iron. ferromanganese and other metal book is to be open at all times products, for the production of to the inspection of the game nitrates, calcium carbide and warden and in August a complete other electro-chemical products, return must be made to the prowould be created to make it poseconomical value of the power sites in the district. Further Investigation.

Owing to the summer engagements of the members of the "WESTERN BAPTIST" committee appointed they had little to report last year. It is clear that a great deal more expensive scientific investigation Rev. will have to be undertaken before lany practical consideration of the establishment of the steel and iron industry can be taken up. whole subject and when his re- East.

the Frovince. NEW GAME ACT AND FUR TRADE

Provides for Licensing of Trappers, Keeping of Records and Making Returns.

The new Game Act, which was passed at the last session of the B. C. legislature, makes several new provisions for regulation of water where ore, limestone, coke fur trading in the North. The enforcement of the Act will come under the jurisdiction of the provincial police.

A resident fur trader's license costs \$25, a non-resident's \$10 and an agent's \$200. The license, may be obtained from the provincial game warden and expires on May 31, following date of issue. A separate license is required for each established place

On certain skins and pelts a royalty must be paid and to this ERNIE LOFQUIST end the trader is required to keep skins purchased or acquired. This thirty days, or both.

THE ORIGINAL LIGHT WEIGHT PORTABLE, GASOLINE OPERATED DRAG SAW & POWER PLANT (Frequently Imitated Never Equalled)

The "WEE MacGREGOR" Drag Saw is an inexpensive practical and proven machine, peculiarly adapted for the rapid and accurate cutting of wood under any conditions, on land or water. With equal facility and proportionate rapidity it will cut the small or large log up to seven feet in diameter. Depending upon size and character it will cut from either green or dry logs, 20 to 30 cords of wood a day.

So light is its weight it can easily be carried from one point to another. One man can move it on the log and two men from log to log. It has sawn a 2-foot log in 50 seconds, a 4-foot log in 3 minutes and a 6-foot log in 6 minutes. Its operating cost for gasoline, oir and grease is approximately 4 cents a cord.

Full operating instructions are furnished with each machine, and its mechanism is so simple it can be operated and kept in order by any person. Its power can be harnessed to the feed cutter, the pump, the circular saw, the churn or the separator. We carry in stock at all times in our Vancouver Warehouses a full line of services

parts. In case of emergency there is no long wait for delivery. Write For Our New Illustrated Folder. Sent Free If You Mention This Paper,
