MINING AUTHORITY SPEAKS ABOUT IRON PROSPECT IN NORTH

Cleo. A. Clothier, district mining engineer, in speaking of the steel industry which is causing so much discussion at the present time says that very promising indications of magnetite as well as limonite exists in this district. The chief indications of magnetite have been found on Louise, Moresby and Porcher Islands.

"Work of proving up these indications has never been carried on and, as yet, very little can be said in regard to the depth," said Mr. Clothier. "Until the depth is ascertained by extensive diamond drilling no estimate as to the tonnage can be formed. However, there is every indication that there are large quantities of it for some of the surface showings reach a width of 75 feet.

"Limonite is more valuable as an element in the making of steel but on account of its scarcity it is not used as much as magnetite. There is plenty of limonite at Copper River but that is the only body of this mineral that exists to any extent in the north as far as has been discovered."

The halibut schooner Panama arived this morning from the fishing banks, but has not yet sold her catch. The trawler Andrew Kelly was in yesterday morning with 90,000 lbs. for the Cold Storage.
