WAR ORDERS

The placing of war orders in the United States and Canada is arousing considerable interest, as well defined channels are now being cut in this connection. It is impossible to obtain complete official details, either from the governments or the companies concerned, as to the values of these orders. Reliable figures obtained by The Monetary Times, however, partly from both of those and from other sources, put beyond dispute the fact that the orders placed in Canada for war materials, munitions and equipment, by the Canadian, British, French and Russian governments, have a value of at least \$400,000,000. Large shipments are going forward to Europe but a steady and continuous volume of shipments probably will not be under way before the early autumn.

The exports of manufactures from Canada are being increased rapidly as a direct result of the war orders. For the month of May, the exports of manufactures had a value double that of the May exports a year ago, and the figures are still growing. Important shipments from Canada, such as those of several thousand box cars and fifty locomotives to Russia, and a thousand coal cars to France may lead, after the war, to important trade relations with the countries fighting by Great Britain's side. There are possibilities of a large business in future, especially with Russia, and Canadian manufacturers are planning, individually and collectively, ways and means to obtain this trade.

New industries are being created in the Dominion, as a result of the demand for war orders. A large copper refinery is likely to be established in British Columbia in connection with the manufacture of shrapnel shells. Various by-products of the coke ovens

of the steel plants are being utilized in the manufacture of high explosives, another new industry in Canada.

With regard to the reported utterances of Lord Curzon, in the house of lords last week, as to alleged unsatisfactory features of the shell-making industry in Canada, it should be stated that the only part of a complete shell that is not made or cannot be made in Canada today is the copper band, and that will be soon manufactured here. Deliveries from Canada may have been comparatively poor because Canadian manufacturers had first to install the necessary machinery and learn how to make shells. Transportation facilities also have not been good. The deliveries should improve from now on.—Monetary Times.

BUSINESSLIKE BUYING

There is one side of the war which, from this time forward, is to be handled on a business basis not altogether to the advantage of the producers in this country. D. A. Thomas, the Welsh "coal king," one of the shrewdest business men in England, who has accumulated an enormous fortune and who in the present emergency has tendered his services to his country, has been sent to the United States as purchasing agent, not merely for England but for all England's allies. It was stated at the start that his work would be confined largely to the purchase of munitions of war, but there are indications that the purchase of food supplies will engage a considerable part of his time.

England proposes to establish the price which it will pay for wheat this year and not

SKIMMED MILK 5c per quart. BUTTERMILK 10c per quart, two quarts for 15 c. Delivered to any part of the city—Prince Rupert Dairy—Phone Green 252 tf.

THE SULTAN OF TURKEY

So ill that an attempt is being made to appoint a regent. A German surgeon has operated on the monarch.

permit the price to be put up, if it is possible by shrewd manipulation and buying to keep it down. The food supplies for England, France, Belgium and Italy will be purchased in this country by one agency, and those countries will not be bidding against each other for supplies as they did last year.

The harvest of the greatest crop in history has commenced. There will be nearly a billion bushels of wheat raised this year. The supply, supplementing that which comes from other sources, is ample to meet the foreign needs, even under war conditions, after supplying domestic requirements. With knowledge of that fact there is no rush of foreign buyers or the one great foreign buyer into this market. There is no disposition to pay a fancy price.

That is probably the reason why the price has sagged to the present level. There is not the slightest probability that the anticipated \$2 a bushel will be reached or anything approaching that figure. There will be no bidding of one nation against another. The foreign combination proposes to dictate the price if it can.—Seattle P. I.

Coughing scatters germs —Stop it

Coughing increases the irritation of the already inflamed mucous membranes and is moreover apt to carry disease to others.

Mathieu's Syrup of Tar and Cod Liver Oil promptly stops coughing, and soon, thanks to its tonic properties, effects a permanent cure.

The wonderful popularity of Mathieu's Syrup of Tar and Cod Liver Oil is specially due to its great value as a permanent lung and bronchial healer.

Sold everywhere, 35c large bottles.

J. L. MATHIEU CO., Prop., Sherbrooke, P.Q.

For headaches use Mathieu's Neratine. For colds use Mathieu's Syrup of Tar and Cod Liver Oil. Always get the genuine and pay the price which is the same everywhere.

Corporation of the City of Prince Rupert.

TAKE NOTICE that (1). The Council of the Corporation of the City of Prince Rupert intends to construct as a Local Improvement, a four-foot plank sidewalk on Claude Street, from the existing plank road on Eighth Avenue to the centre of Seventh Avenue, thence along Seventh Avenue from the centre of Claude Street, to the existing sidewalk on Donald Street, and intends to specially assess the cost upon the land abutting directly on the work.

(2). The estimated cost of the work is \$234.00, of which none is to be paid by the Corporation. The estimated special rate per foot frontage is \$0.26. The special assessment is to be paid in one year.

(3). A petition against the work will not avail to prevent its construction. Dated this 19th day of June, 1915. ERNEST A. WOODS, Clerk.
